A modern outdoor deck with wood-look tiles, a lounge chair, and a sofa, overlooking a lake and mountains. The deck is made of light-colored wood-look tiles. A wicker lounge chair with a white cushion is positioned on the deck. To the right, there is a wicker sofa with white cushions and a decorative pillow. The deck is bordered by a glass railing. In the background, there is a large body of water, mountains, and a house on a hillside.

**Mohawk's position as the
global flooring leader helps meet
a fundamental need around the
world, which, in turn, creates a set of
compelling growth opportunities.**

Accelerate
GLOBAL SALES
GROWTH

THROUGH \$3.2 BILLION IN CAPEX & ACQUISITIONS

Since 2016, we have invested in CapEx and acquisitions to propel sales growth. These investments in six product categories and 12 countries allow us to capitalize on rapidly growing flooring categories, enter new regions and enhance manufacturing capabilities and capacity. We plan to invest an additional \$550 to \$580 million in capital expenditures through 2019. As these investments are fully integrated and optimized, Mohawk will be positioned to reap the benefits through increased incremental sales and enhanced margins.

Deliver
**HIGHER MARGIN
PRODUCTS**

WITH PROPRIETARY DESIGNS & FEATURES

From differentiated attributes that deliver advanced performance to those that enhance aesthetic appeal, Mohawk is a leader in establishing new and innovative frontiers across its flooring portfolio. The results are products — superior slip-resistant ceramic tile, proprietary waterproof wood and super soft and stain-resistant carpet fibers to name a few — that provide a superior competitive position, command premium price points and deliver enhanced profitability.

Capture the
LVT
OPPORTUNITY

IN NORTH AMERICA & EUROPE

The newest flooring category is taking the market by storm with explosive growth on two continents. Consumers love LVT for versatility, affordability, ease of installation and low maintenance. To capitalize on the extraordinary growth opportunity LVT presents, we have invested strategically in five new state-of-the-art production facilities in the U.S. and Belgium, which, once optimized, will position us as a global leader in this exciting new category.

Enhance
ACQUISITION
RESULTS

THROUGH INVESTMENT & SHARED EXPERTISE

Acquiring and successfully integrating premier flooring companies around the world is a core competency at Mohawk. Our most recent additions include Godfrey Hirst, the largest flooring provider in Australia and New Zealand, and Eliane, a leading ceramic tile manufacturer in Brazil — one of the largest tile markets in the world. As with past acquisitions, we are investing in resources and leveraging internal expertise to grow sales, improve margins and efficiencies and create additional competitive advantages in the local markets.

TO OUR SHAREHOLDERS

Our relentless focus on our growth priorities is helping Mohawk fulfill its fundamental purpose: Grow Profitability and Increase Shareholder Return.

Jeffrey S. Lorberbaum
Chairman and
Chief Executive Officer

After five consecutive years of record earnings, 2018 proved more difficult than we anticipated, with inflation increasing dramatically, luxury vinyl tile (LVT) impacting other U.S. flooring products and most of our markets slowing. In this environment, we selectively invested \$1.5 billion to enhance our long-term performance, primarily in new product categories and geographies through greenfield projects and acquisitions, cost-saving initiatives and buying back shares. Our industry has faced periods with volatile costs and shifts in consumer preferences before, and we have always navigated through them to emerge stronger with a more competitive position.

In 2018, inflation in the U.S. was driven primarily by dramatically increasing material costs, escalating transportation and energy costs and constrained chemical supply. The tight U.S. labor market increased employee turnover, which impacted both our efficiencies and training costs. Our ability to offset these pressures was hindered by continuous inflation, more competitive imports due to a stronger dollar and end-user substitution of LVT for other alternatives.

In the U.S., LVT is taking share from other flooring and will become a significantly larger part of our portfolio. Our LVT manufacturing and import strategies are progressing, and we believe our margins will improve in the future. In the U.S. and Europe, we are adding more talent to our new LVT operations to increase our production, efficiency and differentiation in 2019.

Across most regions, growth slowed through the year due to softening economies, slowing home sales, higher mortgage rates and political uncertainty. The largest flooring channel is residential remodeling, which is expected to strengthen as home sales slow.

We are managing through these conditions, while enhancing the long-term growth and profitability of our business. To accomplish this, we continued our strategy of acquiring leading businesses in new markets and implementing major greenfield projects to establish new product categories in the U.S., Europe and Russia.

GLOBAL ACQUISITIONS

In July, we finalized our acquisition of Godfrey Hirst, which positioned us as the largest flooring supplier in Australia and New Zealand. With the Australian housing market slowing, we are investing to expand Godfrey Hirst's commercial carpet position and leveraging Mohawk's resources to enhance product and material strategies. We anticipate bringing greater value to the market with more innovative products and a comprehensive offering of hard surface products distributed under our brands. We also are growing Godfrey Hirst's U.S. sales by positioning the brand's New Zealand wool collections as part of Mohawk's luxury carpet range.

In November, we extended our position as the world's largest ceramic tile provider by finalizing the purchase of Eliane in Brazil. Eliane is an industry leader, with the best brand and a premium position

in one of the world's largest ceramic markets. The Brazilian market is strengthening, and both our sales and margins are expanding. We have ordered the first phase of new equipment to enhance Eliane's operations and margins following the strategy we used to dramatically improve Marazzi's profitability. We are formulating strategies to optimize sales in Central and South America from our operations in Brazil and Mexico.

In Europe, we extended our direct distribution strategy by acquiring hard surface distributors in Italy, Switzerland and the Netherlands, which will broaden our customer base and improve our service in these countries. We also acquired Berghoef, the largest mezzanine flooring provider in Europe, and expanded the business by leveraging our existing manufacturing resources and sales organization.

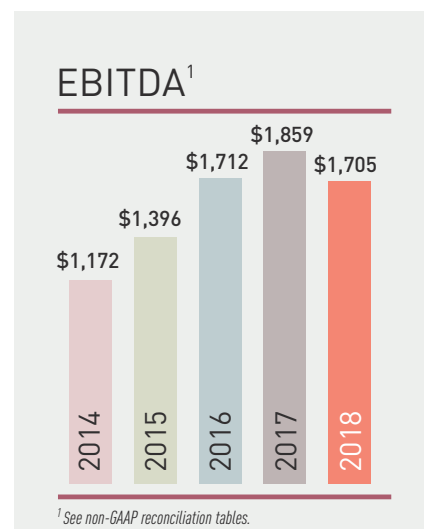

STRATEGIC EXPANSIONS

While these acquisitions provide us with substantial growth and profit opportunities, we will also benefit from multiple internal investments in new products and markets that expand the scope of our business.

In the U.S., our new state-of-the-art quartz countertop plant is manufacturing basic products as we ramp up production and optimize our processes and formulations. Our existing ceramic tile sales channels and countertop distribution will bolster our presence in the market. For years, we have been one of the largest U.S. distributors of stone slabs and quartz countertops, and now we are complementing those offerings with our own U.S.-manufactured quartz as well as porcelain slabs imported from our Italian operations. With this product extension, we now manufacture options for all kitchen and bath surfaces, creating a coordinated offering for residential and commercial spaces.

MARAZZI PORCELAIN TILE
Art Grey Rectificato (floor), Grande Metal Look Porcelain Slabs (wall) and D_Segni Colore Decoro Mix (desk)

Earlier in 2018, we began to supply the European market with carpet tile from our new plant in Belgium. The products showcase sophisticated styling for commercial applications along with exceptional performance features that distinguish them in the marketplace. As in Australia, we are utilizing the design and technical expertise of our U.S. carpet team to deliver style and innovation and ensure the efficient operation of our industry-leading facility. To grow our carpet tile business, we have built an experienced European sales team that will also represent our other commercial hard surface collections,

providing the architect and design community a single source for superior flooring.

As planned, our new sheet vinyl plant in Russia commenced operations in December and is producing goods to satisfy commitments to major customers. Sheet vinyl is one of the most widely used flooring categories in Russia; and, as we refine the plant's processes and costs, we will expand our customer base and introduce innovative collections. We have prepped the Russian market by delivering products from our European plants with superior

visuals, fielding an experienced sales force and leveraging relationships from our Russian businesses.

SELECTIVE INVESTMENTS

These three projects, along with our new U.S. and European rigid and flexible LVT lines, will increase production throughout 2019 as we work to align output and cost. As we progress through the year, we believe these investments will position us to improve our sales and margins. We will better realize the potential of these projects in 2020 and beyond as volume and efficiencies increase. When we launched all these initiatives, we realized that they would create some pressure on our short-term results because of start-up costs and market uncertainties. In the long-term, these investments will make us much stronger, more profitable and more competitive in our major markets. The start-up costs that we have incurred during the past years remain part of our 2019 outlook, although at a reduced level, and will be largely behind us when we reach 2020.

While these greenfield projects represent major product and geographic expansions, we are also completing other significant initiatives to increase our product innovation, grow our sales and

reduce our costs. We are increasing the specialization of our ceramic plants in Italy, Spain, Poland and Bulgaria to improve our competitive advantages. For example, we are moving production of our outdoor ceramic tile production to Poland, where we have added new lines dedicated to this category. We have increased the production and size capabilities at our Bulgarian plant to enhance our sales in lower price points across Europe. In Italy, we are gaining traction with our large porcelain slabs, which are used for floors, walls and countertops. Our ceramic tile expansion in Mexico is now maturing and delivering cost savings as well as manufacturing more advanced products at higher average selling prices and better margins. In Russia, we are extending our market-leading ceramic position with premium sanitary ware, as well as launching production of porcelain slabs. We also have added capacity in the U.S., Europe and Russia to meet growing demand for our premium waterproof laminate that has reinvigorated the category and extended its applications into kitchens, baths and laundry rooms.

To lower our costs, we have invested in backward integration initiatives across the enterprise. In the U.S., we shuttered aging extrusion assets and replaced them with new equipment that operates with significantly

greater efficiency. We have added trucks and trailers to our North American fleet, allowing us to better serve our customers and control transportation costs. In Belgium, we are improving our cost position for board manufacturing by doubling our production of adhesives, and, in Tennessee, we began operating a new power generating facility to reduce our energy costs at our new quartz plant.

LOOKING FORWARD

Since going public in 1992, we have ensured that our allocation of capital delivers proper returns for investors. Historically, we have accomplished this through selective acquisitions and internal investments. In 2018, we took advantage of stock prices that we believe undervalued our business and purchased about \$274 million of Mohawk stock, reducing our share count by 2.3 million or the equivalent of 3 percent of all outstanding shares. We continue to operate with a strong balance sheet, extensive liquidity and historically low debt leverage. We remain open to strategic acquisitions and can take advantage of opportunities when they present themselves.

As we enter 2019, many macroeconomic conditions around the world could impact our results. Economies have been slowing in most of our

markets, oil volatility is making our costs unpredictable, and the housing markets in many regions are under pressure. Although our outlook is cautious because of these issues, we expect our results to improve as we progress through the year.

During 2018, we announced two changes within our senior leadership team. After 25 years with Mohawk, Frank Boykin, our CFO, will retire and continue to provide consulting services to benefit the business. We are pleased to welcome Glenn Landau as our new CFO, to lead our strong financial team and maintain the high standards that Frank established during his time with us. Also, Paul De Cock was appointed President of our Flooring North America segment in 2018. Paul has

two decades of experience in the industry and joined Mohawk in 2005 with the Unilin acquisition. Paul previously led the flooring business for our Flooring Rest of World segment and, earlier in his Mohawk career, he led our U.S. hard surface business. He has changed the management structure to improve our marketing, operations and innovation for each flooring category.

Our 2018 results fell below the standards we have established for ourselves. While many factors were beyond our control, we are taking the appropriate steps to manage through market uncertainties, and we are confident our investments and acquisitions will significantly enhance our long-term business. Today, our business has leading

positions in all of our markets with substantial resources, a broader product portfolio and a more diverse geographic footprint.

To our shareholders, customers and employees, we appreciate your dedication and continued support, which equip the Company to maximize opportunities in challenging conditions and to realize the potential of those opportunities in the rewarding times to follow.

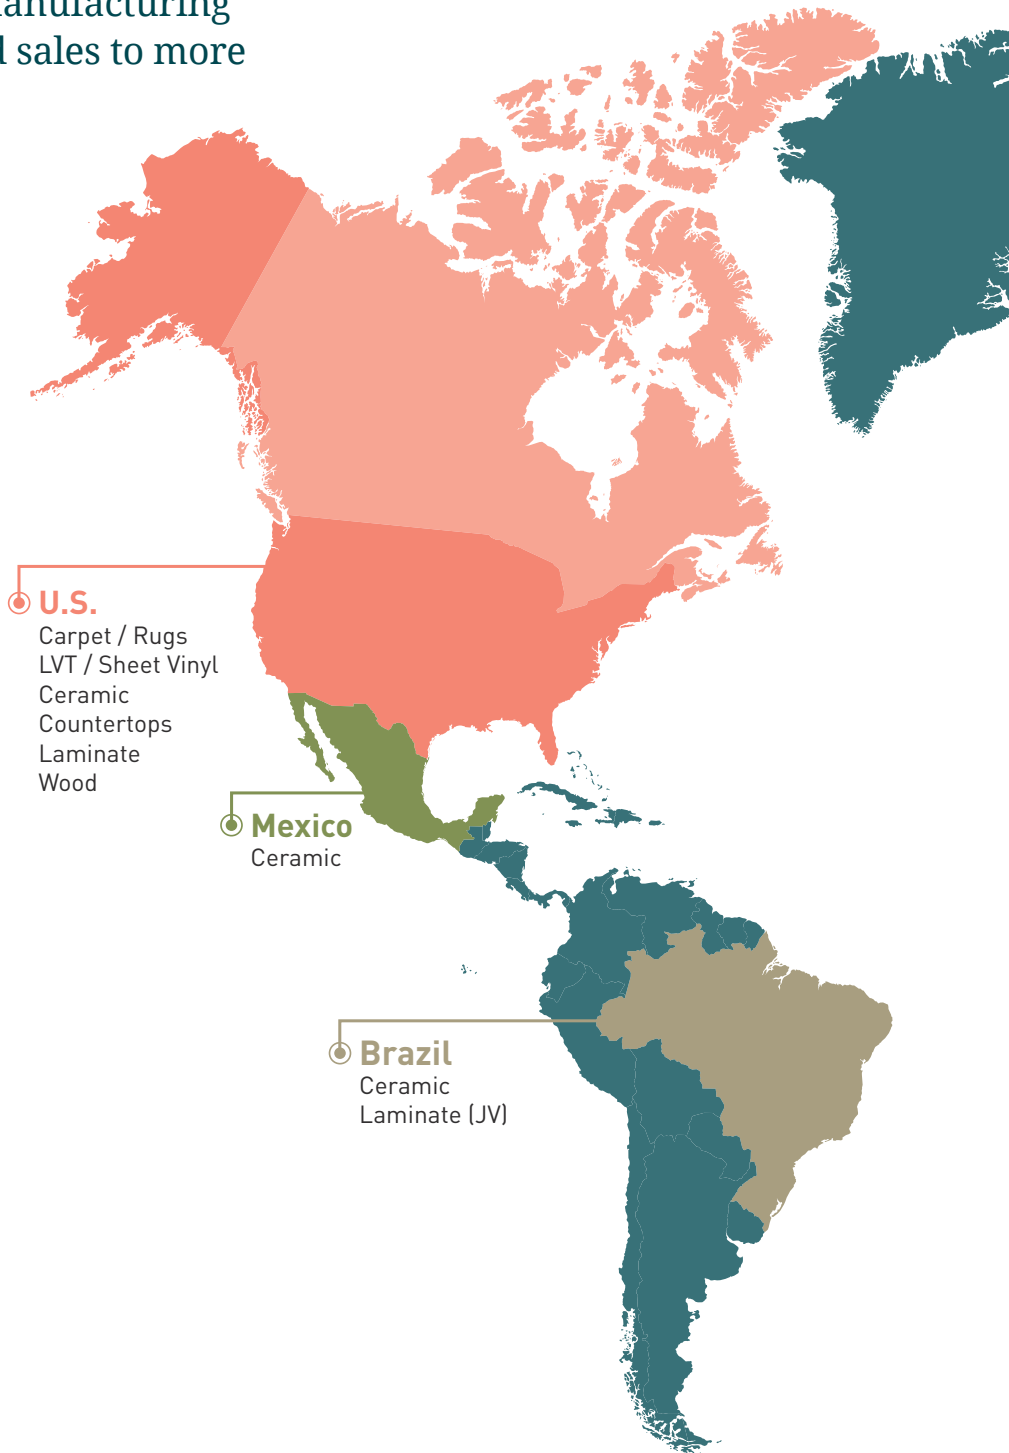

Jeffrey S. Lorberbaum
Chairman and Chief Executive Officer

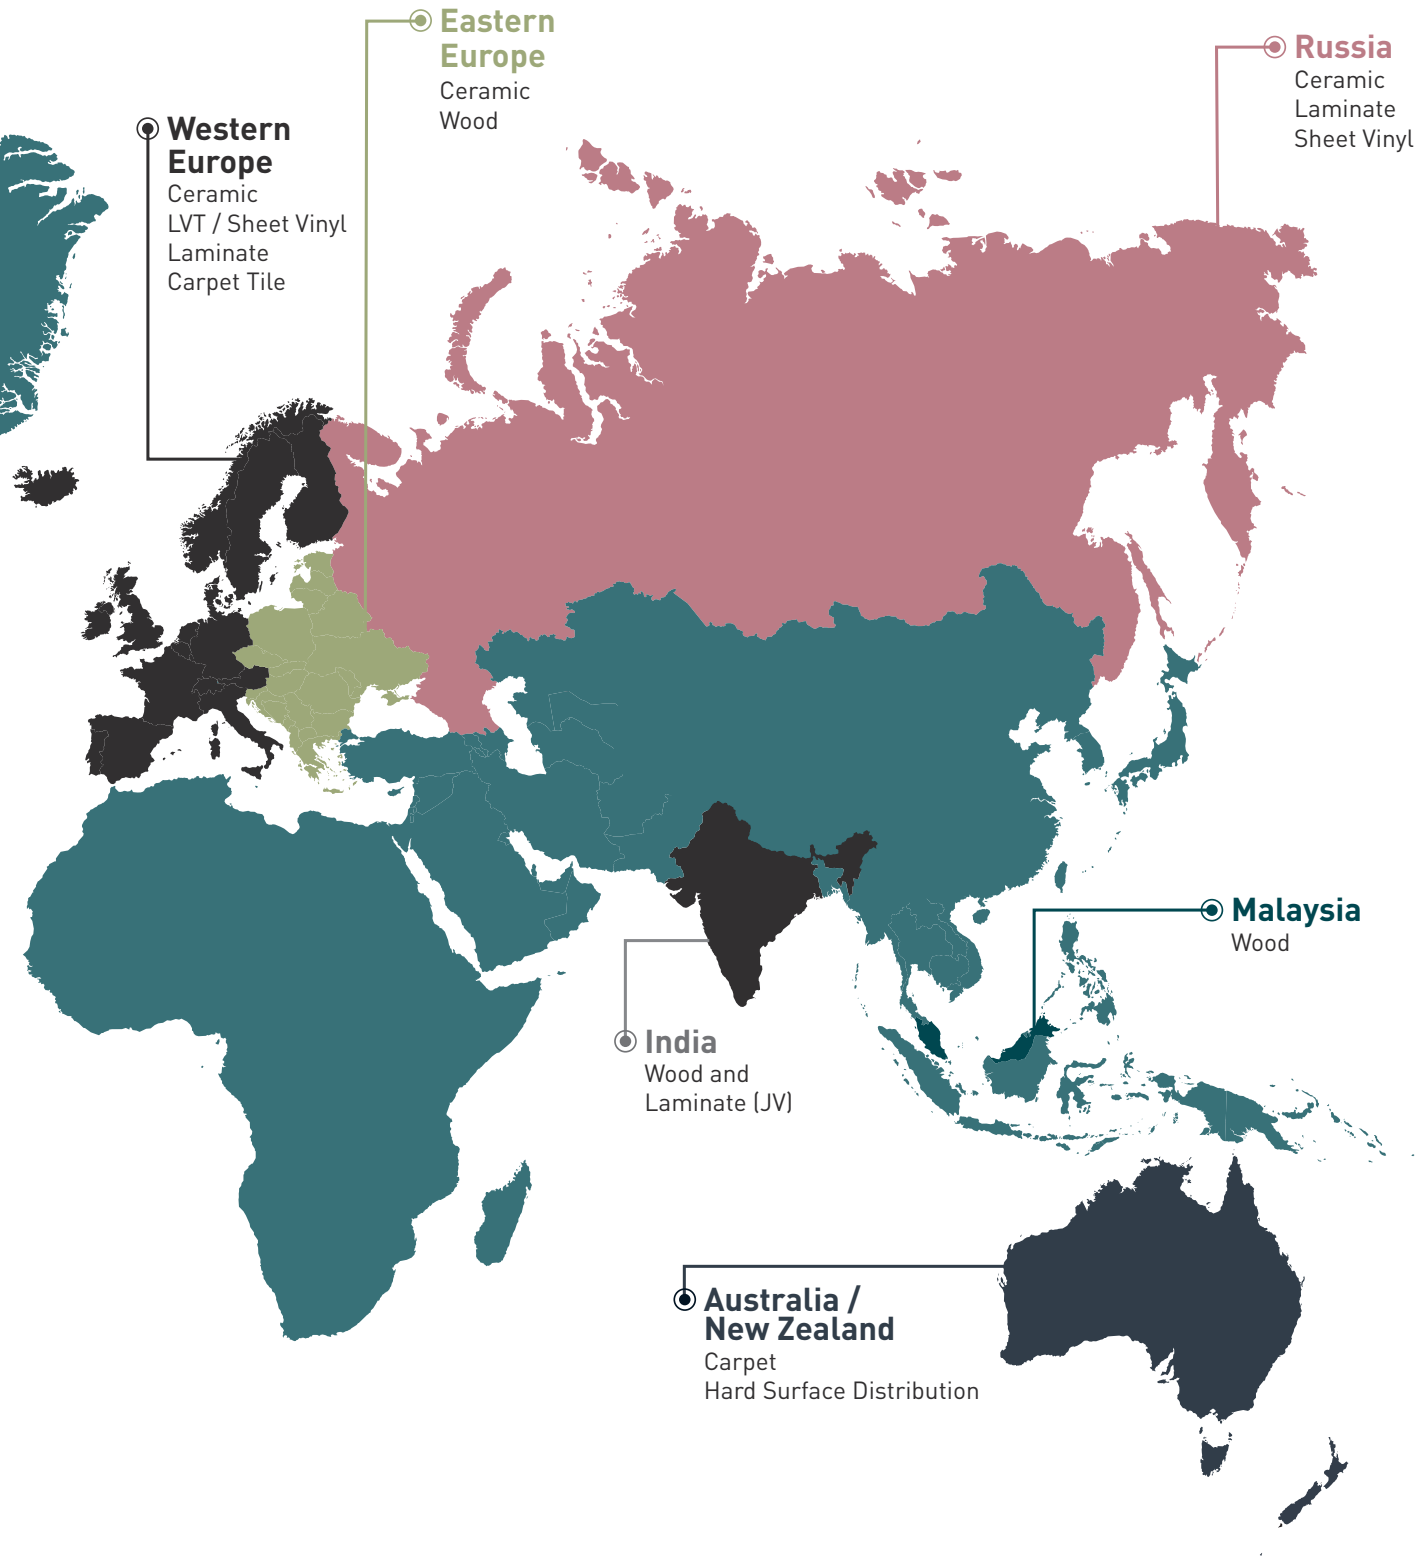

FUNDAMENTAL INVESTMENTS

Mohawk today is the largest flooring manufacturer in the world with leading positions across all flooring categories and a global reach that counts manufacturing operations in 19 nations and sales to more than 170 countries.

We are well positioned to capitalize on new regions and innovative technologies that expand flooring options for consumers around the world. That's why we've invested more than \$8 billion in acquisitions and capital investments over the past five years to seize new opportunities and further leverage our product portfolio, flooring expertise and vertically integrated operations.

We maximize these global opportunities through a decentralized management approach that empowers those who are closest to the customers in local markets in which we operate. Mohawk divisions also share best practices throughout the world as we import and export ideas among regions to explore new ways to drive top-line sales and profitable growth.

Global Ceramic

FUNDAMENTAL FOCUS:

- Expand sales and margins through product innovation
- Drive growth through new product categories
- Establish leadership in new markets

INVESTMENT & INNOVATION

AMERICAN OLEAN PORCELAIN TILE
 Union Floor Tile, Modern Weave
 Misale Wall Tile

The versatility of ceramic tile continues to expand through digital printing that mimics virtually any look, as well as shapes and sizes to appeal to every imagination. We've also introduced StepWise™ that delivers an entirely new performance attribute — superior slip resistance. Our global ceramic business also now encompasses the full spectrum of countertop surfaces: stone for high-end, contemporary luxury; quartz for an upscale look with down-to-earth durability; and porcelain slabs that provide scale and beauty with the inherent benefits of porcelain construction.

STRATEGIC BUSINESS INITIATIVES: 2016-2018

Investment	Benefit
Modernization of European Ceramic	Enhance manufacturing productivity and expand premium product offering
Emil Acquisition	Extend design leadership and strengthen European and export business
Mexican Ceramic Expansion	Expand capacity and upgrade product offering to increase share in Mexico and South America
Polcolorit Acquisition	Enter Northern and Central Europe with low-cost operations
U.S. Quartz Countertop Facility	Complement stone countertop offering with manufactured product
Russian Ceramic Manufacturing	Expand capacity to increase share of Russian tile market
Eliane Acquisition	Enter Brazilian ceramic market with leading position

 Dreams of Paris — Agnettes

A CONVERSATION WITH CHRIS WELLBORN

President, Global Ceramic

Q: What sort of effect has the growing popularity of luxury vinyl tile (LVT) had on the ceramic category?

A: LVT and other forms of multi-layer flooring are growing fast and impacting all other flooring categories. The impact on ceramic tile is mostly in residential remodel applications in the U.S., where the cost of installation is relatively high and LVT offers a more affordable option.

Q: How will the acquisition of Eliane in Brazil strengthen your global business?

A: Brazil is one of the largest tile markets in the world and growing. Eliane is a leader in that market with one of the most recognized brands, a strong management team and broad customer base. It's a powerful opportunity for us. We're investing in new capabilities that will enable Eliane to introduce more high-end products, such as large glazed porcelain tiles, to the market and further strengthen the business' competitive position. The combined assets of Eliane and our business in Mexico provide us a strong base to grow in the very large South American ceramic tile market.

Q: How are you responding and positioning the business for further growth in the U.S.?

A: We're emphasizing the superior aesthetics, longevity and natural characteristics of ceramic tile. We're also focused on moving up-market with new products such as large porcelain panels and large, structured, complex wall tiles. Finally, we're testing a new installation method to increase the speed and reduce the cost of tile installation.

Q: In what areas of the world are you seeing your best growth opportunities?

A: Some of the fastest-growing markets will be Mexico, South America, Russia and Eastern Europe. We also expect there will be opportunities to make accretive acquisitions in some of our more mature markets as the industry continues to consolidate. At some point in the future, we'll also look at opportunities in the world's two largest markets, China and India, as they develop and mature.

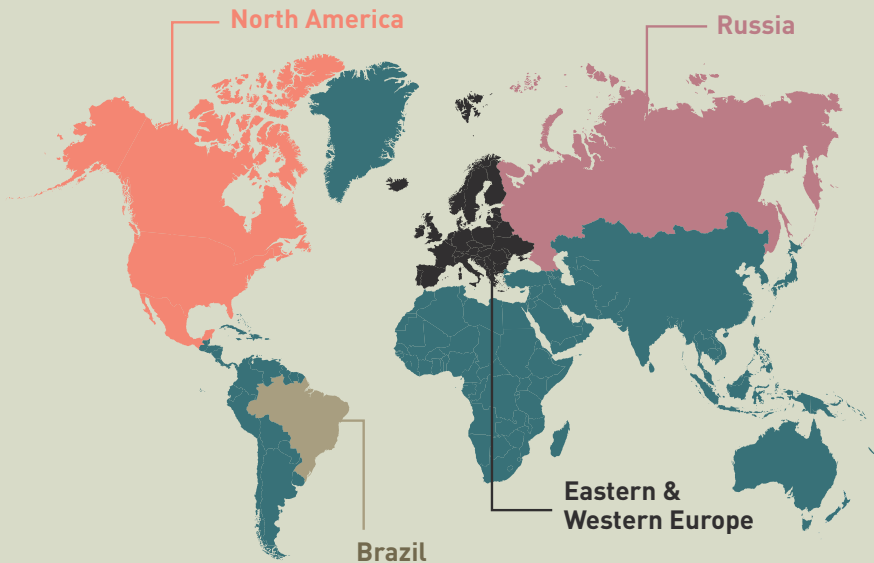

Q: How does the expansion of the countertop business complement the ceramic business?

A: There are many synergies that will allow us to leverage both our customer relationships and sales efforts. The best example is in the builder and specified commercial market segments. We can add countertops to the complete line of flooring products that we already sell to these customers and who have purchased solid stone countertops from us for many years. The growing popularity of quartz and porcelain countertops provides us with a much bigger opportunity to further leverage our national distribution and showroom network.

Rug Product Extensions	Introduce new product lines, including printed and outdoor rugs and industrial mats
LVT Manufacturing Plant #2	Add new rigid manufacturing and product expansion
Carpet Manufacturing Expansion	Increase proprietary recycled polyester carpet technology

A CONVERSATION WITH PAUL DE COCK

President, Flooring NA

We are complementing our manufacturing strategy with sourced products to round out our product offering.

Q: What sort of opportunity does Luxury Vinyl Tile (LVT) represent for Mohawk?

A: LVT is an extremely attractive opportunity for Mohawk. The LVT category is currently growing at more than 20 percent per year. The multiple product variations, with different visuals and benefits, provide unique solutions for different consumer needs. Mohawk's expertise in other modular, clickable and floating hard surfaces offers us a unique opportunity to combine our best-in-class technologies into this variety of new platforms and outperform the market growth.

Q: What accounts for the explosive popularity of LVT?

A: The LVT technology can mimic virtually any look and offers many attractive performance attributes: it's waterproof and affordable to install in comparison to other flooring surfaces.

Q: What has been your strategy for building an LVT presence in North America?

A: We like to participate in categories for the long term, and the best way to do so is through vertical integration. That's why we've invested in two state-of-the-art LVT manufacturing plants that will provide us with direct operational control of the complete LVT manufacturing value chain.

Q: Is Mohawk concerned that LVT is taking share from other categories?

A: Since we are a market leader in every flooring category, we win whenever a consumer selects a Mohawk product. LVT is re-igniting consumer enthusiasm for new flooring, and therefore ultimately it benefits Mohawk. As for category cannibalization, the product lines are blurred these days. Premium laminate now has water resistant features, and our new Pergo Extreme vinyl floors offer exceptional dent resistance whereas our Mohawk vinyl floors have an unprecedented pet proof warranty. Our goal is to offer all end-users a flooring solution that matches their needs. We know that hard surfaces have been taking share from soft surfaces for more than a decade, and we are excited about the opportunities to further grow our hard surface businesses.

Q: Mohawk continues to be a market leader in its legacy carpet business. What opportunities are you pursuing in soft-surface?

A: We have a significant opportunity to grow share in North America, where we have some of the best manufacturing assets in the industry. Our brands have strong equity among both residential and commercial customers, and we possess an enviable product portfolio with innumerable proprietary technologies. We're using all of these strengths to capture a greater share of the soft surface market.

Q: What other competitive strengths does Mohawk bring to the North American market?

A: A critical and perhaps often underappreciated advantage is Mohawk's distribution capabilities. We can deliver flooring product to every corner of North America within 48 hours. It underscores the importance of our vertical integration strategy, which guarantees strong controls over virtually every phase of the value chain.

Russian Sheet Vinyl Manufacturing	Expand product offering in Russia with domestic production
Flooring Distribution Acquisitions	Grow sales in key European countries through direct distribution

A CONVERSATION WITH BERNARD THIERS

President, Flooring ROW

Q: How would you prioritize the top three growth opportunities within the ROW segment?

A: *The number one opportunity, by far, is the growing popularity of Luxury Vinyl Tile (LVT). This is followed by the sheet vinyl business in Russia. And the third opportunity is carpet tile, which is enabling us to expand our position significantly in commercial channels throughout Europe. We've made significant manufacturing investments in each of these areas and look forward to seeing these plants reach their full operating potential.*

Q: Are the growth dynamics of LVT in Europe similar to those in North America?

A: *I would describe LVT growth in Europe as an evolution compared to the U.S., where it is more of a revolution. LVT is growing rapidly in Europe, but in a somewhat more controlled manner. Our capabilities are well aligned with that current growth. We have three LVT production lines operating in Belgium, with two already at full capacity. Our newest line can also produce rigid LVT. We are just starting sales of rigid products, which offers us an opportunity to grow aggressively with this new category. Our total LVT capacity makes us the largest vertically integrated player in the European market.*

Q: Why are carpet tile and sheet vinyl attractive opportunities?

A: *Our current penetration of the market in Western Europe is largely skewed toward residential channels. With the addition of carpet tile and LVT, we now have a comprehensive portfolio of products that we can offer commercial customers and will push aggressively to grow share in that channel. Our new sheet vinyl expansion is focused on Russia where the market is huge because of its value and affordability to consumers with limited purchasing power. By manufacturing product in market, we can avoid logistics expense, import fees and currency exchange risks — all of which better positions us for profitable growth.*

Q: What are your plans for Godfrey Hirst in Australia and New Zealand?

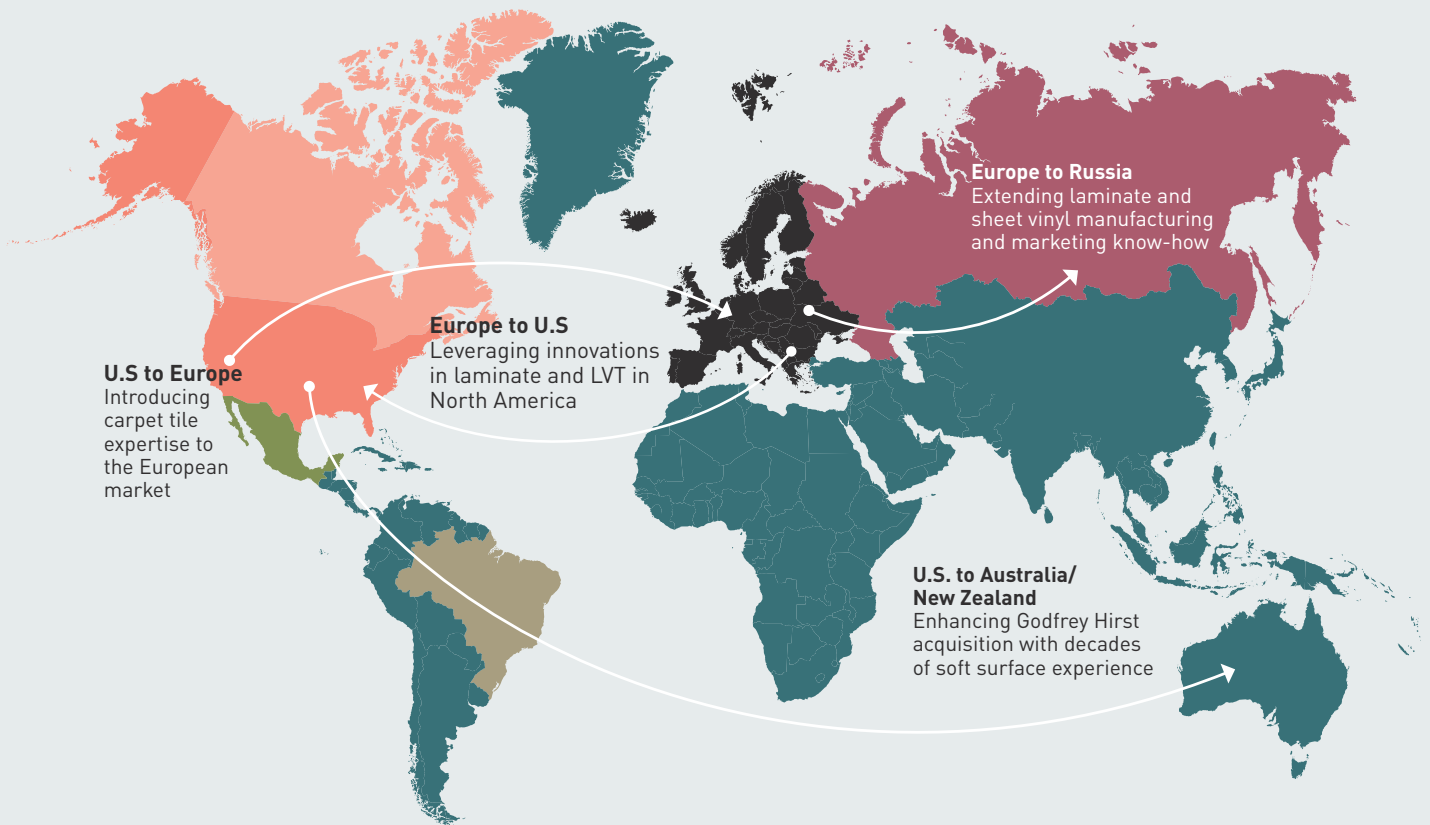

A: *We plan to build on Godfrey Hirst's leading position in the Oceania soft surface market through two significant opportunities. First, we're extending our soft surface expertise in North America to improve the efficiency of Godfrey Hirst's manufacturing operations and to share new products and innovative technologies. And second, we'll position them to go after the growing hard surface market in Oceania by making our broad portfolio of laminate, LVT and hardwood products available in the market.*

Q: Your segment also includes non-flooring products. What are the growth dynamics in the European board and insulation markets?

A: *In the board business, our goal is to increase margins by expanding our offering of decorative wood-based panels and growing share in commercial channels. Insulation is a growing business due to strong interest in increasing the energy efficiency of buildings. We are operating five insulation plants in Western Europe, and we have the capacity to grow our sales in this attractive market.*

25 YEARS OF LEADERSHIP

Frank Boykin
Chief Financial Officer

This annual report is dedicated to Frank Boykin, who is retiring after 25 years of exceptional leadership and consummate professionalism. Frank joined Mohawk in 1993 as corporate controller when Mohawk was a \$700 million carpet manufacturer and had recently become a public company. In 2005, he became Mohawk's chief financial officer and built an excellent finance team while supporting the Company's rapid growth and diversification of products and regions.

Frank created a financial structure that strengthened the Company's balance sheet and drove Mohawk's expansion through his leadership in mergers and acquisitions. His career has been marked by numerous accomplishments, including Mohawk's listing on the NYSE, entry into the S&P 500 and 19 consecutive years on the Fortune 500. As evidence of the respect Frank has earned from his peers, he has been honored as CFO of the Year by both the Atlanta Business Chronicle and Institutional Investor Magazine.

Mohawk's global team extends good wishes and sincere appreciation to Frank as he enters retirement to spend more time with his wife, children and grandchildren and to pursue his many interests.

PART I

ITEM 1. BUSINESS

General

Mohawk Industries, Inc. (“Mohawk” or the “Company”) is a leading global flooring manufacturer that creates products to enhance residential and commercial spaces around the world. The Company’s vertically integrated manufacturing and distribution processes provide competitive advantages in carpet, rugs, ceramic tile, laminate, wood, stone, luxury vinyl tile (“LVT”) and vinyl flooring. The Company’s industry-leading innovation develops products and technologies that differentiate its brands in the marketplace and satisfy all flooring related remodeling and new construction requirements. The Company’s brands are among the most recognized in the industry and include American Olean®, Daltile®, Durkan®, Eliane®, Feltex®, Godfrey Hirst®, IVC®, Karastan®, Marazzi®, Mohawk®, Pergo®, Quick-Step® and Unilin®. The Company has transformed its business from an American carpet manufacturer into the world’s largest flooring company with operations in Australia, Brazil, Canada, Europe, India, Malaysia, Mexico, New Zealand, Russia and the United States. The Company had annual net sales in 2018 of \$10.0 billion. Approximately 61% of this amount was generated by sales in the United States and approximately 39% was generated by sales outside the United States. The Company has three reporting segments, Global Ceramic, Flooring North America (“Flooring NA”) and Flooring Rest of the World (“Flooring ROW”) with net sales in 2018 representing 36%, 40% and 24%, respectively, of the total. Selected financial information for the three segments, geographic net sales and the location of long-lived assets are set forth in Note 16—Segment Reporting.

The Global Ceramic Segment designs, manufactures, sources, distributes and markets a broad line of ceramic, porcelain and natural stone tile products used for floor and wall applications in residential and commercial channels for both remodeling and new construction. In addition, the Global Ceramic Segment manufactures, sources, and distributes other tile related products, including natural stone, quartz and porcelain slab countertops, as well as installation materials. The Global Ceramic Segment markets and distributes its products under various brands, including the following: American Olean, Daltile, Eliane, EmilGroup®, KAI®, Kerama Marazzi, Marazzi, and Ragno®, which it sells through company-owned and franchised operations, independent distributors, home centers, floor covering retailers, ceramic specialists, commercial contractors and commercial end users. The Global Ceramic Segment operations are vertically integrated from the production of raw material for body and glaze preparation to the manufacturing and distribution of ceramic and porcelain tile.

The Flooring NA Segment designs, manufactures, sources and distributes its floor covering product lines in a broad range of colors, textures and patterns in the residential and commercial markets for both remodeling and new construction. The Segment’s product lines include broadloom carpet, carpet tile, rugs and mats, carpet pad, wood, laminate, medium-density fiberboard (“MDF”), LVT and sheet vinyl. The Flooring NA Segment markets and distributes its flooring products under various brands,

including the following: Aladdin Commercial®, Durkan, IVC, Karastan, Mohawk, Mohawk Group®, Mohawk Home®, Pergo, Portico®, and Quick-Step which it sells through floor covering retailers, distributors, home centers, mass merchants, department stores, e-commerce retailers, shop at home, buying groups, builders, commercial contractors and commercial end users.

The Flooring ROW Segment designs, manufactures, sources and distributes laminate, wood flooring, LVT and sheet vinyl, broadloom carpet and carpet tile, as well as roofing panels, insulation boards, mezzanine flooring, MDF, and chipboards, used in the residential and commercial markets for both remodeling and new construction. In addition, the Flooring ROW Segment licenses certain patents related to flooring manufacturers throughout the world. The Flooring ROW Segment markets and distributes its flooring products under various brands, including the following: Balterio®, Feltex, Godfrey Hirst, Hycraft®, Itec®, IVC, Leoline®, Moduleo®, Pergo, Quick-Step, Unilin and Xtratherm®, which it sells through retailers, wholesalers, independent distributors and home centers.

Business Strategy

Mohawk’s Business Strategy provides a consistent vision for the organization and focuses employees around the globe. The strategy is cascaded down through the organization with an emphasis on five key points:

- Optimizing the Company’s position as the industry’s preferred provider by delivering exceptional value to customers
- Treating employees fairly to retain the best organization
- Driving innovation in all aspects of the business
- Taking reasonable, well considered risks to grow the business
- Enhancing the communities in which the Company operates

The Mohawk Business Strategy provides continuity for the Company’s operating principles and ensures a focus on exceeding customer expectations.

Strengths

Market Position

Mohawk’s fashionable and innovative products, successful participation in all sales channels, creative marketing programs and extensive sales resources have enabled the Company to build market leadership positions in multiple geographies, primarily North America, Brazil, Europe, Russia and Australasia, as well as export products to more than 170 countries. In North America, Mohawk’s largest marketplace, the Company has leveraged its brands, breadth of offering and award-winning merchandising to build strong positions across all product categories. In Europe and Russia, similar advantages have supported market leadership in ceramic, premium laminate and sheet vinyl. The 2018 acquisition of Godfrey Hirst provided the Company with the largest position in carpet to complement the leading hard surface presence in Australasia that had grown through the earlier acquisition of national distributors in both Australia and New Zealand. In 2018, the Company acquired Eliane, a leading ceramic tile manufacturer in Brazil, the world’s third largest ceramic market. The Eliane brand is highly regarded for innovative design and strength

in high-end porcelain floor and wall tile. Eliane is Brazil's largest ceramic tile exporter. The Company also has established a strong position in the fast-growing LVT market on both sides of the Atlantic following the 2015 acquisition of IVC and subsequent investments to expand production in both North America and Europe.

Product Innovation

Mohawk drives performance through product innovation and improvements across all categories. In ceramic, this includes proprietary Reveal Imaging® printing that replicates the appearance of other surfaces, such as long planks with the visuals and texture of natural wood as well as tiles that mimic natural stone, cement, textiles and other alternatives. In Italy, the Company has recently begun manufacturing porcelain large scale slabs that replicate the look of stone but are harder and more durable. The slabs are being sold in the European and North American markets and are used for floors, walls and countertops. In the U.S., the Company has begun to manufacture quartz countertops that, along with its stone and porcelain slabs, represent a comprehensive array of surface options. In carpet, exclusive fiber technologies include the unique bio-based SmartStrand® and its brand extensions that represented the first super soft stain resistant products on the market and the patented Continuum™ process that adds bulk and softness to polyester fiber, differentiating the Company's products in this fast growing component of the carpet market. These fiber advantages have been extended into the Company's rug production, as well, adding luxurious feel and performance enhancements to the Company's design leadership. In laminate, the Company's installation technology revolutionized the category, and the Company continues to deliver new innovations with more realistic visuals and surface embossing in register that precisely recreates the appearance of wood and water resistance that has extended the category into kitchens and baths. In wood flooring, the Company is introducing longer and wider planks in increasingly popular engineered collections, as well as introducing more fashion-forward stains, finishes and surface protection. The Company's vinyl offerings reflect significant investments in leading-edge technology that yield incredibly realistic reproductions of stone, wood and other materials with embossed finishes that accentuate the beauty of the products.

Operational Excellence

Mohawk's highly efficient manufacturing and distribution assets serve as the foundation for successful growth. By leveraging continuous process improvement and automation, the Company's operations drive innovation, quality and value. Through its commitment to sustainability practices, the Company has also optimized natural resources and raw materials. Since 2013, the Company has invested approximately \$4 billion to expand capacity, introduce differentiated new products and improve efficiencies. In particular, the Company's capital investments have improved recently acquired businesses by upgrading their product offerings, expanding their distribution and improving their productivity. For more than a decade, Mohawk's training and development programs have been ranked among the best by Training magazine, and Forbes designated Mohawk as one of the Best Large U.S. Employers from 2016 through 2018.

Sustainability

The Company believes that it is the industry leader in sustainable products and processes. The Company's extensive use of recycled content in its products includes the annual use of over 6.2 billion plastic bottles to create polyester carpet fiber and more than 42 million pounds of tires to produce decorative crumb rubber mats. In all, the Company diverts more than 6.5 billion pounds of waste from landfills each year, with 47 of the Company's manufacturing sites internally certified as Zero Process Waste to Landfill facilities. The Company's commitment to sustainability extends beyond its products to resource utilization, including a 442-million gallon reduction in water use since 2015, lower greenhouse gas emissions and increased energy efficiency. The Company also produces energy through solar panels, windmills and a waste to energy program using scrap material. The Company's commitment to safety and wellness helps to retain a talented workforce. The Company currently operates 19 on-site, near-site or virtual Healthy Life Centers to assist employees with management of chronic conditions as well as the treatment of acute illness. The Company's annual sustainability report details these and other initiatives and may be accessed at <http://www.mohawksustainability.com>.

Sales and Distribution

Global Ceramic Segment

The Global Ceramic Segment designs, markets, manufactures, distributes and sources a broad line of ceramic tile, porcelain tile and natural stone products, including natural stone, quartz and porcelain slab countertops. Products are distributed through various channels, including independent distributors, home centers, Company-operated service centers and stores, ceramic specialists, commercial contractors, and directly to commercial end users. The business is organized to address the specific customer needs of each distribution channel with dedicated sales forces that support the various channels.

The Company provides customers with one of the ceramic tile industry's broadest product lines—a complete selection of glazed floor tile, glazed wall tile, mosaic tile, porcelain tile, quarry tile, stone products, porcelain slab countertops, quartz countertops and installation products. In addition to products manufactured by the Company's ceramic tile business, the Company also sources products from other manufacturers to enhance its product offering.

The Global Ceramic Segment markets its products under the American Olean, Daltile, Eliane, EmilGroup, KAI, Kerama Marazzi, Marazzi and Ragno brand names. These brands are supported by a fully integrated marketing program, displays, merchandising boards, literature, catalogs and internet web-sites. Innovative design, quality and response to changes in customer preference enhances recognition in the marketplace. The Company is focused on sales growth opportunities through innovative products and programs in both the residential and commercial channels for both remodeling and new construction.

The Global Ceramic Segment utilizes various distribution methods including regional distribution centers, service centers, direct shipping and customer pick-up from manufacturing facilities. The Segment's sales forces are organized by product type and sales channels in order to best serve each type of customer. The Company believes its distribution methods for

the Global Ceramic Segment provide high-quality customer service and enhance its ability to plan and manage inventory requirements.

Flooring NA Segment

Through its Flooring NA Segment, the Company designs, markets, manufactures, distributes and sources carpet, laminate, carpet pad, rugs, wood, LVT and sheet vinyl in a broad range of colors, textures and patterns. The Flooring NA Segment positions product lines in all price ranges and emphasizes quality, style, performance and service. The Flooring NA Segment markets and distributes its product lines to independent distributors, floor covering retailers, home centers, mass merchandisers, department stores, e-commerce retailers, shop at home, buying groups, commercial contractors and commercial end users. Some products are also marketed through private labeling programs. Sales to customers focused on residential products represent a significant portion of the total industry and the majority of the Segment's sales.

The Company has positioned its brand names across all price ranges. IVC, Karastan, Mohawk, Pergo, Portico and Quick-Step are positioned to sell in the residential flooring markets. Aladdin Commercial and Mohawk Group are positioned to sell in the commercial market, which is made up of corporate office space, educational facilities, institutional facilities, healthcare/assisted living facilities and retail space. The Company also sells into the commercial hospitality space (hotels, restaurants, gaming facilities, etc.) under its Durkan brand.

The Segment's sales forces are generally organized by sales channels in order to best serve each type of customer. Product delivery to independent dealers is facilitated predominantly on Mohawk trucks operating from strategically positioned warehouses and cross-docks that receive inbound product directly from the Company's manufacturing operations.

Flooring ROW Segment

The Flooring ROW Segment designs, manufactures, markets, licenses, distributes and sources laminate, wood, broadloom carpet, carpet tile, LVT and sheet vinyl. It also designs and manufactures roofing elements, insulation boards, MDF and chipboards. Products are distributed through separate distribution channels, consisting of retailers, independent distributors, company-operated distributors, wholesalers and home centers. The business is organized to address the specific customer needs of each distribution channel.

The Flooring ROW Segment markets and sells laminate, wood, broadloom carpet, carpet tile, sheet vinyl and LVT flooring products under the Balterio, Feltex, Godfrey Hirst, IVC, Moduleo, Pergo and Quick-Step brands. The Flooring ROW Segment also sells private label laminate, wood and vinyl flooring products. The Company believes Quick-Step and Pergo are leading brand names in the European flooring industry, and that Godfrey Hirst and Feltex are leading brand names in the Australasian flooring market. In addition, the Flooring ROW Segment markets and sells insulation boards, roof panels, MDF and chipboards in Europe under the Unilin and Xtratherm brands. The Segment also licenses its intellectual property to flooring manufacturers throughout the world.

The Company uses regional distribution centers and direct shipping from manufacturing facilities to provide high-quality customer service and enhance the Company's ability to plan and manage inventory requirements.

Advertising and Promotion

The Company's brands are among the best known and most widely distributed in the industry. The Company vigorously supports the value and name recognition of its brands through both traditional advertising channels, including numerous trade publications and unique promotional events that highlight product design and performance and social media initiatives and Internet-based advertising. The Company has invested significantly in websites that educate consumers about the Company's products, helping them to make informed decisions about purchases and identifying local retailers that offer the Company's collections. In 2016, the Company introduced Omnify™, a new Internet platform that automatically syncs updated product and sales information between the Company and its U.S. aligned retailer websites, ensuring that consumers have access to the most accurate and timely information.

The Company actively participates in cause marketing partnerships with such well known programs as Susan G. Komen® (breast cancer research), Habitat for Humanity® (housing for low income families), HomeAid® (housing for homeless families) and Operation Finally Home® (housing for disabled veterans), which include both traditional media partnerships as well as promotional events generating national press coverage. The Company also sponsors a European cycling team to promote its Quick-Step brand through logo placements and use of the team in its advertising and point-of-sale displays.

The Company introduces new products, merchandising and marketing campaigns through participation in regional, national and international trade shows as well as exclusive dealer conventions. The Company supports sales with its retail customers through cooperative advertising programs that extend the reach of the Company's promotion as well as with innovative merchandising displays that highlight the Company's differentiated products and provide samples to consumers. The cost of providing merchandising displays, product samples, and point of sale promotional marketing, is partially recovered by the purchase of these items by the Company's customers.

Manufacturing and Operations

Global Ceramic Segment

The Company's tile manufacturing operations are vertically integrated from the production of raw material for body and glaze preparation to the manufacturing and distribution of ceramic and porcelain tile. The Company believes that its manufacturing organization offers competitive advantages due to its ability to manufacture a differentiated product line consisting of one of the industry's broadest product offerings of colors, textures and finishes and its ability to utilize the industry's newest technology, as well as the industry's largest offering of trim and decorative pieces. In addition, the Global Ceramic Segment also sources a portion of its collections to enhance its product offerings. The Global Ceramic Segment continues to invest in equipment that utilizes the latest technologies, which supports the Company's efforts to increase manufacturing capacity, improve efficiency, meet the growing

demand for its innovative products and develop new capabilities.

Flooring NA Segment

The Company's carpet and rug manufacturing operations are vertically integrated and include the extrusion of triexta, nylon, polyester and polypropylene resins, as well as recycled post-consumer plastics, into fiber. The Flooring NA Segment is also vertically integrated in yarn processing, backing manufacturing, tufting, weaving, dyeing, coating and finishing.

The segment is also vertically integrated with significant manufacturing assets that produce laminate flooring, high density fiber board, engineered and pre-finished solid wood flooring, fiberglass sheet vinyl and luxury vinyl tile. The Flooring NA Segment continues to invest in capital projects, such as the expansion of the Company's North American LVT, premium laminate and engineered wood manufacturing capacity. Other investments in state-of-the-art equipment support market growth, increase manufacturing efficiency and improve overall cost competitiveness.

Flooring ROW Segment

The Company's laminate and vinyl flooring manufacturing operations in Europe are vertically integrated. The Company believes its Flooring ROW Segment has advanced equipment that results in competitive manufacturing in terms of cost and flexibility. In addition, the Flooring ROW Segment has significant manufacturing capability for engineered wood flooring, LVT and sheet vinyl. The 2018 acquisition of Godfrey Hirst established vertically integrated broadloom carpet and carpet tile operations in Australia and New Zealand, including the production of wool yarn. The Flooring ROW Segment is also vertically integrated in manufacturing, tufting, weaving, dyeing, coating and finishing.

The Flooring ROW Segment continues to invest in capital expenditures, such as LVT and laminate expansions, as well as new carpet tile and sheet vinyl plants in Europe and Russia, respectively, utilizing the latest advances in technologies to increase manufacturing capacity, improve efficiency and develop new capabilities including state-of-the-art, fully integrated production that will leverage the Company's proven record of bringing innovative and high-quality products to its markets. The manufacturing facilities for roofing elements, insulation boards, MDF and chipboards in the Flooring ROW Segment are all configured for cost-efficient manufacturing and production flexibility and are competitive in the European market.

Inputs and Suppliers

Global Ceramic Segment

The principal raw materials used in the production of ceramic tile are clay, talc, industrial minerals and glazes. The Company has long-term clay mining rights in North America, Russia, Bulgaria and Brazil that satisfy a portion of its clay requirements for producing tile. The Company also purchases a number of different grades of clay for the manufacture of its tile. Glazes are used on a significant percentage of manufactured tiles. Glazes consist of frit (ground glass), zircon, stains and other materials, with frit being the largest ingredient. The Company manufactures a significant amount of its frit requirements.

The Company believes that there is an adequate supply of all grades of clay, talc and industrial minerals that are readily available from a number of independent sources. If these suppliers were unable to satisfy the Company's requirements, the Company believes that alternative supply arrangements would be available.

Flooring NA Segment

The principal raw materials used in the production of carpet and rugs are polypropylene, polyester, triexta, nylon, caprolactam, recycled post-consumer plastics, synthetic backing materials, latex and various dyes and chemicals, the majority of which are petroleum based. The Company uses wood chips, wood veneers, lumber, paper and resins in its production of laminate and wood products. In its vinyl flooring operations, the Company uses glass fiber, plasticizers and polyvinyl chloride (PVC) resins. Major raw materials used in the Company's manufacturing process are available from independent sources, and the Company obtains most of its raw materials from major suppliers that provide inputs to each major product category. If these suppliers were unable to satisfy the requirements, the Company believes that alternative supply arrangements would be available. Although the market for raw materials is sensitive to temporary disruptions, the North American flooring industry has not experienced a significant shortage of raw materials in recent years.

Flooring ROW Segment

The principal raw materials used in the production of boards, laminate and wood flooring are wood, paper and resins. The wood suppliers provide a variety of wood species, providing the Company with a cost-effective and secure supply of raw material. In its vinyl flooring operations, the Company uses glass fiber, plasticizers and PVC resins. Major raw materials used in the Company's manufacturing process are available from independent sources, and the Company has long-standing relationships with a number of suppliers. The principal raw materials used in the production of broadloom carpet and carpet tile are polypropylene, polyester, triexta, nylon, caprolactam, recycled post-consumer plastics, synthetic backing materials, latex and various dyes and chemicals, the majority of which are petroleum based. Although the market for raw materials is sensitive to temporary disruptions, the flooring industry has not experienced a significant shortage of raw materials in recent years. If these suppliers were unable to satisfy the requirements, the Company believes that alternative supply arrangements would be available.

Industry and Competition

The Company is the largest flooring manufacturer in a fragmented industry composed of a wide variety of companies ranging from small, privately-held firms to large multinationals. In 2017, the U.S. floor covering industry reported \$25.4 billion in sales, up approximately 4.8% over 2016's sales of \$24.5 billion. In 2017, the primary categories of flooring in the U.S., based on sales, were carpet and rugs (45.4%), resilient (includes sheet vinyl and LVT) and rubber (17.0%), ceramic tile (14.3%), wood (13.7%), stone (5.7%) and laminate (3.9%). In 2017, the primary categories of flooring in the U.S., based on square feet, were carpet and rugs (51.2%), resilient (includes sheet vinyl and LVT) and rubber (21.2%), ceramic tile (14.3%), wood (7.2%), laminate (4.6%) and stone (1.5%). Each of these categories is influenced by the residential and commercial construction, and residential

and commercial remodeling end-use markets. These markets are influenced by many factors including changing consumer preferences, consumer confidence, spending for durable goods, interest rates, inflation, availability of credit, turnover in housing and the overall strength of the economy.

The principal methods of competition within the floor covering industry generally are product innovation, style, quality, price, performance technology and service. In each of the markets, price and market coverage are particularly important when competing among product lines. The Company actively seeks to differentiate its products in the marketplace by introducing innovative products with premium features that provide a superior value proposition. The Company's investments in manufacturing technology, computer systems and distribution network, as well as the Company's marketing strategies and resources, contribute to its ability to compete on the basis of performance, quality, style and service, rather than price.

Global Ceramic Segment

Globally, the ceramic tile industry is significantly fragmented. Certain regions around the world have established sufficient capacity to allow them to meet domestic needs in addition to exporting product to other markets where their design and/or technical advantages may drive consumer preferences. Some mature markets have seen industry consolidation driven by mergers and acquisitions, however most markets are comprised of many relatively small manufacturers all working with similar technologies, raw materials and designs. During 2017, the estimated global capacity for ceramic tile was 146 billion square feet, with selling prices varying widely based on a variety of factors, including supply within the market, materials used, size, shape and design. While the Company operates ceramic manufacturing facilities in eight countries, the Company has leveraged advantages in technology, design, brand recognition and marketing to extend exports of its products to approximately 160 countries. As a result of this global sales strategy, the Company faces competition in the ceramic tile market from a large number of foreign and domestic manufacturers, all of which compete for sales of ceramic tile to customers through multiple residential and commercial channels. The Company believes it is the largest manufacturer, distributor and marketer of ceramic tile in the world. The Company also believes it is the largest manufacturer, distributor and marketer of ceramic tile in specific markets, including the U.S., Europe and Russia, as well as maintaining leading positions in the Mexican and Brazilian markets. The Company has leveraged the advantages of its scale, product innovation and unique designs in these markets to solidify its leadership position, however the Company continues to face pressures in these markets from imported ceramic products as well as alternate flooring categories.

Flooring NA Segment

The North American flooring industry is highly competitive, with an increasing variety of product categories, shifting consumer preferences and pressures from imported products, particularly in the rug and hard surface categories. Based on industry publications, in 2017, the U.S. flooring industry had carpet and rug sales in excess of \$11.5 billion out of the overall \$25.4 billion market. The Company believes it is the largest

producer of rugs and the second largest producer of carpet in the world based on its 2017 net sales. The Company differentiates its carpet and rug products in the market place through proprietary fiber systems, state-of-the-art manufacturing technologies and unique styling as well as leveraging the strength of some of the oldest and best known brands in the industry. The Company also believes it is the largest manufacturer and distributor of laminate flooring in the U.S. as well as one of the largest manufacturers and distributors of solid and engineered wood flooring. The Company's leading position in laminate flooring is driven by the strength of its premium brands as well as technical innovations such as water resistance, realistic visuals, beveled edges, deeply embossed in register surfaces and patented installation technologies. The U.S. resilient industry is highly competitive, and according to industry publications, grew over 17% in 2017. Based on industry publications, the U.S. flooring industry for LVT and sheet vinyl in 2017 had market sales of \$4.5 billion of the overall flooring market. The Company believes that it is one of the largest manufacturers and distributors of LVT and sheet vinyl in the U.S. The Company's sheet vinyl operations produce fiberglass backed products, which have proven more popular with consumers in the past several years.

Flooring ROW Segment

The Company faces competition in the non-U.S. laminate, wood, LVT and sheet vinyl flooring business from a large number of domestic manufacturers as well as pressures from imports. The Company believes it is one of the largest manufacturers and distributors of laminate flooring in the world, with a focus on high-end products, which the Company supplies under some of the best known and most widely marketed brands in its regions. In addition, the Company believes it has a competitive advantage in its laminate flooring markets as a result of the Company's industry-leading water resistance, realistic visuals and embossed in register surfaces as well as patented installation technologies, all of which allow the Company to distinguish its products in the areas of design, performance, installation and assembly. In wood flooring, the Company has extended the strength of its well-known laminate brands and its installation technologies to add value to its wood collections. The Company faces competition in the non-U.S. vinyl flooring channel from a large number of domestic and foreign manufacturers, but believes it has a competitive advantage in its LVT and sheet vinyl markets due to industry-leading design, patented technologies, brand recognition and vertical integration. The Company has elevated the performance of its sheet vinyl collections and is now aggressively placing the product in commercial applications. After initially extending its geographic footprint by acquiring national hard surface distributors in Australia and New Zealand, the Company acquired Godfrey Hirst in 2018, making the Company the largest manufacturer of carpet in both countries. The Company is integrating its soft and hard surface businesses to provide a comprehensive offering to residential and commercial customers in the region. In Australia and New Zealand, the Company faces competition from a large number of domestic and foreign manufacturers, but believes it has a competitive advantage in its carpet and hard surface offering due to industry-leading design, patented technologies, brand recognition and vertical integration. Through a 2015 acquisition, the Company has extended its insulation panel business to the U.K. and Ireland while expanding sales in its core Benelux Region.

Patents and Trademarks

Intellectual property is important to the Company's business and the Company relies on a combination of patent, copyright, trademark and trade secret laws to protect its interests.

The Company uses several trademarks that it considers important in the marketing of its products, including American Olean, Daltile, Durkan, EmilGroup, Feltex, Godfrey Hirst, IVC, Karastan, Marazzi, Moduleo, Mohawk, Mohawk Home, Pergo, Quick-Step and Unilin. These trademarks reflect innovations in design, performance and installation, that represent competitive advantages and provide differentiation from competing brands in the market.

The Flooring ROW Segment owns a number of patent families in Europe and the U.S., some of which the Company licenses to manufacturers throughout the world. The Company continues to explore additional opportunities to generate revenue from its patent portfolio, including in applications for LVT.

Sales Terms and Major Customers

The Company's sales terms are substantially the same as those generally available throughout the industry. The Company generally permits its customers to return products purchased from it within specified time periods from the date of sale, if the customer is not satisfied with the quality of the product.

During 2018, no single customer accounted for more than 10% of total net sales and the top 10 customers accounted for less than 20% of the Company's net sales. The Company believes the loss of one major customer would not have a material adverse effect on its business.

Employees

As of December 31, 2018, the Company employed approximately 42,100 persons, consisting of approximately 21,000 in the United States, approximately 9,800 in Europe, approximately 3,900 in Mexico, approximately 3,900 in Russia and approximately 3,500 in other countries. The majority of the Company's European, Russian and Mexican manufacturing employees are members of unions. Less than 1% of the Company's U.S. employees are party to a collective bargaining agreement. Additionally, the Company has not experienced any major strikes or work stoppages in recent years. The Company believes that its relations with its employees are good.

Available Information

The Company's Internet address is *mohawkind.com*. The Company makes available the following reports it files on its website, free of charge, under the heading "Investors":

- annual reports on Form 10-K;
- quarterly reports on Form 10-Q;
- current reports on Form 8-K; and
- amendments to the foregoing reports.

The foregoing reports are made available on the Company's website as soon as practicable after they are filed with, or furnished to, the Securities and Exchange Commission ("SEC").

ITEM 1A. RISK FACTORS

In addition to the other information provided in this Form 10-K, the following risk factors should be considered when evaluating an investment in shares of the Company's Common Stock. If any of the events described in these risks were to occur, it could have a material adverse effect on the Company's business, financial condition and results of operations.

The floor covering industry is sensitive to changes in general economic conditions, such as consumer confidence, income and spending, corporate and government spending, interest rate levels, availability of credit and demand for housing. Significant or prolonged declines in the U.S. or global economies could have a material adverse effect on the Company's business.

Downturns in the U.S. and global economies negatively impact the floor covering industry and the Company's business. During times of economic uncertainty or decline, end consumers tend to spend less on remodeling their homes, which is how the Company derives a majority of its sales. Likewise, new home construction—and the corresponding need for new flooring materials—tends to slow down during recessionary periods. There may be downturns in the foreseeable future that could cause the industry to deteriorate globally or in the local markets in which the Company operates. A significant or prolonged decline in residential or commercial remodeling or new construction activity could have a material adverse effect on the Company's business and results of operations.

The Company may be unable to predict customer preferences or demand accurately, or to respond to technological developments.

The Company operates in a market sector where demand is strongly influenced by rapidly changing customer preferences as to product design, product category and technical features. Failure to quickly and effectively respond to changing customer demand or technological developments could have a material adverse effect on the business.

The Company faces intense competition in the flooring industry that could decrease demand for the Company's products or force it to lower prices, which could have a material adverse effect on the Company's business.

The floor covering industry is highly competitive. The Company faces competition from a number of manufacturers and independent distributors. Maintaining the Company's competitive position may require substantial investments in the Company's product development efforts, manufacturing facilities, distribution network and sales and marketing activities. Competitive pressures may also result in decreased demand for the Company's products, force the Company to lower prices or prevent the Company from raising prices to keep up with inflation. Moreover, fluctuations in currency exchange rates and input costs may contribute to more attractive pricing for imports that compete with the Company's products, which may put pressure on the Company's pricing. Any of these factors could have a material adverse effect on the Company's business.

Changes in the global economy could affect the Company's overall availability and cost of credit.

A downturn in the U.S. or global economies could impact the Company's ability to obtain financing in the future, including any financing necessary to refinance existing indebtedness.

Further, negative economic conditions may factor into the Company's periodic credit ratings assessment by Moody's Investors Service, Inc. ("Moody's"), Standard & Poor's Financial Services, LLC ("S&P") and Fitch, Inc. Any future changes in the credit rating agencies' methodology in assessing the Company's credit strength and any downgrades in the Company's credit ratings could increase the cost of its existing credit and could adversely affect the cost of and ability to obtain additional credit in the future. The Company can provide no assurances that downgrades will not occur. The cost and availability of credit during uncertain economic times could have a material adverse effect on the Company's financial condition.

If the Company were unable to meet certain covenants contained in its existing credit facilities, it may be required to repay borrowings under the credit facilities prior to their maturity and may lose access to the credit facilities for additional borrowings that may be necessary to fund its operations and growth strategy.

On March 26, 2015, the Company entered into a \$1,800 million, senior revolving credit facility (the "2015 Senior Credit Facility"). As of December 31, 2018, the amount utilized under the 2015 Senior Credit Facility was \$1,452.3 million resulting in a total of \$347.7 million available. The amount utilized included \$1,339.8 million of commercial paper issued, \$57.9 million of direct borrowings, and \$54.6 million of standby letters of credit related to various insurance contracts and foreign vendor commitments.

If the Company's cash flow is worse than expected, the Company may need to refinance all or a portion of its indebtedness through a public and/or private debt offering or a new bank facility and may not be able to do so on terms acceptable to it, or at all. If the Company is unable to access debt markets at competitive rates or in sufficient amounts due to credit rating downgrades, market volatility, market disruption, or weakness in the Company's businesses, the Company's ability to finance its operations or repay existing debt obligations may be materially and adversely affected.

Additionally, the Company's credit facilities include certain affirmative and negative covenants that impose restrictions on the Company's financial and business operations, including limitations on liens, indebtedness, fundamental changes, asset dispositions, dividends and other similar restricted payments, transactions with affiliates, payments and modifications of certain existing debt, future negative pledges, and changes in the nature of the Company's business. In addition, the 2015 Senior Credit Facility requires the Company to maintain a Consolidated Interest Coverage Ratio of at least 3.0 to 1.0 and a Consolidated Net Leverage Ratio of no more than 3.75 to 1.0. A failure to comply with the obligations contained in our current or future credit facilities or indentures relating to our outstanding public debt could result in an event of default or an acceleration of debt under other instruments that may contain cross-acceleration or cross-default provisions. We cannot be certain that we would have, or be able to obtain, sufficient funds to make these accelerated payments.

Fluctuations in currency exchange rates may impact the Company's financial condition and results of operations and may affect the comparability of results between the Company's financial periods.

The results of the Company's foreign subsidiaries are translated into U.S. dollars from the local currency for consolidated reporting. The exchange rates between some of these currencies and the U.S. dollar in recent years have fluctuated significantly and may continue to do so in the future. The Company may not be able to manage effectively the Company's currency translation risks, and volatility in currency exchange rates may have a material adverse effect on the Company's consolidated financial statements and affect comparability of the Company's results between financial periods.

The Company has significant operations in emerging markets, including Brazil, eastern Europe, Malaysia, Mexico and Russia, and therefore has exposure to doing business in potentially unstable areas of the world.

Operations in emerging markets are subject to greater risk than more developed markets, including in some cases significant legal, economic and political risks. Market conditions and the political structures that support them are subject to rapid change in these economies, and the Company may not be able to react quickly enough to protect its assets and business operations. In particular, developing markets in which the Company operates may be characterized by one or more of the following:

- complex and conflicting laws and regulations, which may be inconsistently or arbitrarily enforced;
- high incidences of corruption in state regulatory agencies;
- volatile inflation;
- widespread poverty and resulting political instability;
- compliance with laws governing international relations, including U.S. laws that relate to sanctions and corruption;
- immature legal and banking systems;
- uncertainty with respect to title to real and personal property;
- underdeveloped infrastructure;
- heavy state control of natural resources and energy supplies;
- state ownership of transportation and supply chain assets;
- high protective tariffs and inefficient customs processes; and
- high crime rates.

Changes in any one or a combination of these factors could have a material adverse effect on the Company's business.

In periods of rising costs, the Company may be unable to pass raw materials, labor, energy and fuel-related cost increases on to its customers, which could have a material adverse effect on the Company's business.

The prices of raw materials, labor, energy and fuel-related costs vary significantly with market conditions. Although the Company generally attempts to pass on increases in raw material, labor, energy and fuel-related costs to its customers, the Company's ability to do so is dependent upon the rate and magnitude of any increase, competitive pressures and market conditions for the Company's products. There have been in the past, and may be in the future, periods of time during which increases in these

costs cannot be recovered. During such periods of time, the Company's business may be materially adversely affected.

The Company may be unable to obtain raw materials or sourced product on a timely basis, which could have a material adverse effect on the Company's business.

The principal raw materials used in the Company's manufacturing operations include triexta, nylon, polypropylene, and polyester resins and fibers, which are used in the Company's carpet and rug business; clay, talc, nepheline syenite and glazes, including frit (ground glass), zircon and stains, which are used in the Company's ceramic tile business; wood, paper and resins, which are used in the Company's wood and laminate flooring business; and glass fiber, plasticizers, and pvc resins, which are used in the Company's vinyl and luxury vinyl tile business. In addition to raw materials, the Company sources finished goods. For certain raw materials and sourced products, the Company is dependent on one or a small number of suppliers. An adverse change in the Company's relationship with such a supplier, the financial condition of such a supplier or such supplier's ability to manufacture or deliver such raw materials or sourced products to the Company could lead to an interruption of supply or require the Company to purchase more expensive alternatives. An extended interruption in the supply of these or other raw materials or sourced products used in the Company's business or in the supply of suitable substitute materials or products would disrupt the Company's operations, which could have a material adverse effect on the Company's business.

The Company makes significant capital investments in its business and such capital investments may not be successful or achieve their intended results.

The Company's business requires significant capital investment to expand capacity to support its growth, introduce new products and improve operating efficiencies. Since 2013, the Company has invested approximately \$4 billion in capital projects and intends to make similar capital investments in future periods, including between \$550–\$580 million of capital investments in 2019. While the Company believes that many of its past capital investments have been successful, there is no guarantee that the return on investment from the Company's recent or future capital projects will be sufficient to recover the expenses and opportunity costs associated with these projects. Furthermore, a meaningful portion of the Company's capital investment is based on forecasted growth in its business, which is subject to uncertainty such as general economic trends, increased competition and consumer preferences. If the Company does not accurately forecast its future capital investment needs, the Company could have excess capacity or insufficient capacity, either of which would negatively affect its revenues and profitability.

The Company relies on information systems in managing the Company's operations and any system failure or deficiencies of such systems may have an adverse effect on the Company's business.

The Company's businesses rely on sophisticated software applications to obtain, process, analyze and manage data. The Company relies on these systems to, among other things:

- facilitate the purchase, management, distribution, and payment for inventory items;

- manage and monitor the daily operations of the Company's distribution network;
- receive, process and ship orders on a timely basis;
- manage accurate billing to and collections from customers;
- control logistics and quality control for the Company's retail operations;
- manage financial reporting; and
- monitor point of sale activity.

The Company also relies on its computer hardware, software and network for the storage, delivery and transmission of data to the Company's sales and distribution systems, and certain of the Company's production processes are managed and conducted by computer.

Any event that causes interruptions to the input, retrieval and transmission of data or increase in the service time, whether caused by human error, natural disasters, power loss, computer viruses, system conversion, cyber attacks including and not limited to hacking, intrusions, malware or otherwise, could disrupt our normal operations. There can be no assurance that the Company can effectively carry out our disaster recovery plan to handle the failure of our information systems, or that we will be able to restore our operational capacity within sufficient time to avoid material disruption to our business. The occurrence of any of these events could cause unanticipated disruptions in service, decreased customer service and customer satisfaction, harm to the Company's reputation and loss or misappropriation of sensitive information, which could result in loss of customers, increased operating expenses and financial losses. Any such events could in turn have a material adverse effect on the Company's business, financial condition, results of operations, and prospects.

The Company's inability to maintain its patent licensing revenues could have a material adverse effect on the Company's business.

The profit margins of certain of the Company's businesses, particularly the Company's Flooring Rest of the World Segment, depend in part upon the Company's ability to obtain, maintain and license proprietary technology used in the Company's principal product families. The Company has obtained a number of patents relating to the Company's products and associated methods and has filed applications for additional patents, including the UNICLIC and Pergo family of patents, which protect its interlocking flooring technology. The majority of the UNICLIC patents expired in 2017. The Company continues to develop new sources of revenue that may partially offset the expiration of its revenue-producing patents. The failure to develop alternative revenues could have a material adverse effect on the Company's business.

The Company may experience certain risks associated with acquisitions, joint ventures and strategic investments.

The Company intends to grow its business through a combination of organic growth and acquisitions. Growth through acquisitions involves risks, many of which may continue to affect the Company after the acquisition. The Company cannot give assurance that an acquired company will achieve the levels of revenue, profitability and production that the Company expects. Acquisitions may require the issuance of additional securities

or the incurrence of additional indebtedness, which may dilute the ownership interests of existing security holders or impose higher interest costs on the Company. Additional challenges related to the Company's acquisition strategy include:

- maintaining executive offices in different locations;
- manufacturing and selling different types of products through different distribution channels;
- conducting business from various locations;
- maintaining different operating systems and software on different computer hardware; and
- retaining key employees.

Failure to successfully manage and integrate an acquisition with the Company's existing operations could lead to the potential loss of customers of the acquired business, the potential loss of employees who may be vital to the new operations, the potential loss of business opportunities or other adverse consequences that could have a material adverse effect on the Company's business. Even if integration occurs successfully, failure of the acquisition to achieve levels of anticipated sales growth, profitability, or otherwise perform as expected, may result in goodwill or other asset impairments or otherwise have a material adverse effect on the Company's business. Finally, acquisition targets may be subject to material liabilities that are not properly identified in due diligence and that are not covered by seller indemnification obligation or third party insurance. The unknown liabilities of the Company's acquisition targets may have a material adverse effect on the Company's business.

In addition, the Company has made certain investments, including through joint ventures, in which the Company has a minority equity interest and lack management and operational control. The controlling joint venture partner may have business interests, strategies or goals that are inconsistent with those of the Company. Business decisions or other actions or omissions of the controlling joint venture partner, or the joint venture company, may result in harm to the Company's reputation or adversely affect the value of the Company's investment in the joint venture.

A failure to identify suitable acquisition candidates or partners for strategic investments and to complete acquisitions could have a material adverse effect on the Company's business.

As part of the Company's business strategy, the Company intends to pursue a wide array of potential strategic transactions, including acquisitions of complementary businesses, as well as strategic investments and joint ventures. Although the Company regularly evaluates such opportunities, the Company may not be able to successfully identify suitable acquisition candidates or to obtain sufficient financing on acceptable terms to fund such strategic transactions, which may slow the Company's growth and have a material adverse effect on the Company's business.

The Company manufactures, sources and sells many products internationally and is exposed to risks associated with doing business globally.

The Company's international activities are significant to its manufacturing capacity, revenues and profits; and the Company is further expanding internationally. The Company sells products, operates plants and invests in companies around the world. Currently, the Company's Flooring ROW segment has significant operations in Europe, Russia, Malaysia, Australia and New Zealand, and the Company's Global Ceramic segment has significant operations in Brazil, Europe, Russia and Mexico. In addition, the Company has invested in joint ventures in Brazil and India related to laminate flooring.

The business, regulatory and political environments in these countries differ from those in the U.S. The Company's international sales, operations and investments are subject to risks and uncertainties, including:

- changes in foreign country regulatory requirements;
- differing business practices associated with foreign operations;
- various import/export restrictions and the availability of required import/export licenses;
- imposition of foreign or domestic tariffs and other trade barriers;
- foreign currency exchange rate fluctuations;
- differing inflationary or deflationary market pressures;
- foreign country tax rules, regulations and other requirements, such as changes in tax rates and statutory and judicial interpretations in tax laws;
- differing labor laws and changes in those laws;
- work stoppages and disruptions in the shipping of imported and exported products;
- government price controls;
- extended payment terms and the inability to collect accounts receivable;
- potential difficulties repatriating cash from non-U.S. subsidiaries; and
- compliance with laws governing international relations, including those U.S. laws that relate to sanctions and corruption.

Specifically, in Europe, the uncertainty surrounding the U.K.'s participation in the European Union and European Single Market following Britain's notice to the European Union of its decision to exit the EU ("Brexit") may result in greater restrictions on trade between the UK and EU, which could negatively impact the Company's results. Additionally, Brexit has caused significant volatility in currency exchange rates. Sales generated by the Company's U.K. businesses may be negatively impacted when they are translated from the British pound to the U.S. dollar.

The Company cannot assure investors that it will succeed in developing and implementing policies and strategies to address the foregoing risks effectively in each location where the

Company does business, and, therefore that the foregoing factors will not have a material adverse effect on the Company's business.

Negative tax consequences could materially and adversely affect the Company's business.

The Company is subject to the tax laws of the many jurisdictions in which it operates. These tax laws are complex, and the manner in which they apply to our facts is sometimes open to interpretation. In calculating the provision for income taxes, the Company must make judgments about the application of these inherently complex tax laws. Our domestic and international tax liabilities are largely dependent upon the distribution of profit before tax among these many jurisdictions. However, it also includes estimates of additional tax which may be incurred for tax exposures and reflects various estimates and assumptions, including assessments of future earnings of the Company that could impact the valuation of our deferred tax assets. The Company's future results of operations and tax liability could be adversely affected by changes in the effective tax rate as a result of a change in the mix of earnings in countries with differing statutory tax rates, changes in the overall profitability of the Company, changes in tax legislation and rates, changes in generally accepted accounting principles, changes in the valuation of deferred tax assets and liabilities, changes in the amount of earnings permanently reinvested offshore, the results of audits and examinations of previously filed tax returns, and ongoing assessments of the Company's tax exposures.

The Company has been, and in the future may be, subject to costs, liabilities and other obligations under existing or new laws and regulations, which could have a material adverse effect on the Company's business.

The Company is subject to increasingly numerous and complex laws, regulations and licensing requirements in each of the jurisdictions in which the Company conducts business. The Company faces risks and uncertainties related to compliance with such laws and regulations. In addition, new laws and regulations may be enacted in the U.S. or abroad that may require the Company to incur additional personnel-related, environmental, or other costs on an ongoing basis, such as recently enacted healthcare legislation in the United States.

In particular, the Company's operations are subject to various environmental, health and safety laws and regulations, including those governing air emissions, wastewater discharges, and the use, storage, treatment, recycling and disposal of materials and finished product. The applicable requirements under these laws are subject to amendment, to the imposition of new or additional requirements and to changing interpretations of agencies or courts. The Company could incur material expenditures to comply with new or existing regulations, including fines and penalties and increased costs of its operations. For example, the Company's manufacturing facilities may become subject to further limitations on the emission of "greenhouse gases" due to public policy concerns regarding climate change issues or other environmental or health and safety concerns. While the form of any additional regulations cannot be predicted, a "cap-and-trade" system similar to the system that applies to the Company's businesses in the European Union could be adopted in the United States. The Company's manufacturing processes use a significant amount of energy, especially natural gas. Any such "cap-and-trade" system or other limitations imposed on the emission of "greenhouse gases" could require

the Company to increase our capital expenditures, use its cash to acquire emission credits or restructure our manufacturing operations, which could have a material adverse effect on our business.

The Company's business operations could suffer significant losses from natural disasters, catastrophes, fire or other unexpected events.

Many of the Company's business activities involve substantial investments in manufacturing facilities and many products are produced at a limited number of locations. These facilities could be materially damaged by natural disasters, such as floods, tornados, hurricanes and earthquakes, or by fire or other unexpected events. The Company could incur uninsured losses and liabilities arising from such events, including damage to its reputation, and/or suffer material losses in operational capacity, which could have a material adverse impact on its business.

The Company may be exposed to litigation, claims and other legal proceedings relating to its products, which could have a material adverse effect on the Company's business.

In the ordinary course of business, the Company is subject to a variety of product-related claims, lawsuits and legal proceedings, including those relating to product liability, product warranty, product recall, personal injury, and other matters. A very large claim or several similar claims asserted by a large class of plaintiffs could have a material adverse effect on the Company's business, if the Company is unable to successfully defend against or resolve these matters or if its insurance coverage is insufficient to satisfy any judgments against the Company or settlements relating to these matters. Although the Company has product liability insurance, the policies may not provide coverage for certain claims against the Company or may not be sufficient to cover all possible liabilities. Further, the Company may not be able to maintain insurance at commercially acceptable premium levels. Moreover, adverse publicity arising from claims made against the Company, even if the claims are not successful, could adversely affect the Company's reputation or the reputation and sales of its products.

The Company's inability to protect its intellectual property rights could have a material adverse effect on the Company's business.

The Company relies, in part, on the patent, trade secret and trademark laws of the U.S., countries in the European Union and elsewhere, as well as confidentiality agreements with some of the Company's employees, to protect that technology. The Company cannot assure investors that any patents owned by or issued to it will provide the Company with competitive advantages, that third parties will not challenge these patents, or that the Company's pending patent applications will be approved. The Company may be unable to prevent competitors and/or third parties from using the Company's technology without the Company's authorization, independently developing technology that is similar to that of the Company or designing around the Company's patents.

Furthermore, despite the Company's efforts, the Company may be unable to prevent competitors and/or third parties from using the Company's technology without the Company's authorization, independently developing technology that is similar to that of the Company or designing around the Company's patents. The use of the Company's technology or similar technology by

others could reduce or eliminate any competitive advantage the Company has developed, cause the Company to lose sales or otherwise harm the Company's business.

The Company has obtained and applied for numerous U.S. and foreign service marks and trademark registrations and will continue to evaluate the registration of additional service marks and trademarks, as appropriate. The Company cannot guarantee that any of the Company's pending or future applications will be approved by the applicable governmental authorities. A failure to obtain trademark registrations in the U.S. and in other countries could limit the Company's ability to protect the Company's trademarks and impede the Company's marketing efforts in those jurisdictions and could have a material effect on the Company's business.

The Company generally requires third parties with access to the Company's trade secrets to agree to keep such information confidential. While such measures are intended to protect the Company's trade secrets, there can be no assurance that these agreements will not be breached, that the Company will have adequate remedies for any breach or that the Company's confidential and proprietary information and technology will not be independently developed by or become otherwise known to third parties. In any of these circumstances, the Company's competitiveness could be significantly impaired, which would limit the Company's growth and future revenue.

Third parties may claim that the Company infringed their intellectual property or proprietary rights, which could cause it to incur significant expenses or prevent it from selling the Company's products.

In the past, third parties have claimed that certain technologies incorporated in the Company's products infringe their patent rights. The Company cannot be certain that the Company's products do not and will not infringe issued patents or other intellectual property rights of others.

The Company might be required to pay substantial damages (including punitive damages and attorney's fees), discontinue the use and sale of infringing products, expend significant resources to develop non-infringing technology or obtain licenses authorizing the use of infringing technology. There can be no assurance that licenses for disputed technology or intellectual property rights would be available on reasonable commercial terms, if at all. In the event of a successful claim against the Company along with failure to develop or license a substitute technology, the Company's business would be materially and adversely affected.

The long-term performance of the Company's business relies on its ability to attract, develop and retain talented management.

To be successful, the Company must attract, develop and retain qualified and talented personnel in management, sales, marketing, product design, and operations, and as it considers entering new international markets, skilled personnel familiar with those markets. The Company competes with multinational firms for these employees and invests resources in recruiting, developing, motivating and retaining them. The failure to attract, develop, motivate and retain key employees could negatively affect the Company's competitive position and its operating results.

The Company is subject to changing regulation of corporate governance and public disclosure that have increased both costs and the risk of noncompliance.

The Company's stock is publicly traded. As a result, the Company is subject to the rules and regulations of federal and state agencies and financial market exchange entities charged with the protection of investors and the oversight of companies whose securities are publicly traded. These entities, including the Public Company Accounting Oversight Board, the Securities and Exchange Commission and the New York Stock Exchange, frequently issue new requirements and regulations. The Company's efforts to comply with the regulations and interpretations have resulted in, and are likely to continue to result in, increased general and administrative costs and diversion of management's time and attention from profit generating activities to compliance activities.

The Company's stock price is subject to volatility.

The Company's stock price has experienced price volatility in the past and may continue to do so in the future. The Company, the flooring industry and the stock market have experienced stock price and volume fluctuations that have affected stock prices in ways that may have been unrelated to the operating performance of these companies. Additionally, price volatility over a given period may cause the average price at which the Company repurchases its own stock to exceed the stock's price at a given point in time.

Declines in the Company's business conditions may result in an impairment of the Company's assets which could result in a material non-cash charge.

A significant or prolonged decrease in the Company's market capitalization, including a decline in stock price, or a negative long-term performance outlook, could result in an impairment of its assets which results when the carrying value of the Company's assets exceed their fair value.

Forward-Looking Information

Certain of the statements in this Form 10-K, particularly those anticipating future performance, business prospects, growth and operating strategies, and similar matters, and those that include the words "could," "should," "believes," "anticipates," "expects" and "estimates" or similar expressions constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. For those statements, Mohawk claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. There can be no assurance that the forward-looking statements will be accurate because they are based on many assumptions, which involve risks and uncertainties. The following important factors could cause future results to differ: changes in economic or industry conditions; competition; inflation and deflation in freight, raw material prices and other input costs; inflation and deflation in consumer markets; currency fluctuations; energy costs and supply; timing and level of capital expenditures; timing and implementation of price increases for the Company's products; impairment charges; integration of acquisitions; international operations; introduction of new products; rationalization of operations; tax and tax reform, product and other claims; litigation; regulatory and political changes in the jurisdictions in which the Company does business; and other risks identified in Mohawk's SEC reports and public announcements.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Company owns and leases manufacturing and distribution facilities worldwide. The table below lists the primary owned and leased facilities at December 31, 2018. The Company owns its Corporate Headquarters in Calhoun, GA. The Company also owns and operates service centers and stores in the United States and Russia, none of which are individually material. The Company believes its existing facilities are suitable for its present needs.

The following is a list of the principal manufacturing and distribution facilities owned or leased by the Company:

Segment and Property Use	North America	Europe and Russia	Other	Total
GLOBAL CERAMIC				
Manufacturing	10	11	2	23
Distribution/Warehouse	8	8	2	18
FLOORING NORTH AMERICA				
Manufacturing	17	—	—	17
Distribution/Warehouse	10	—	—	10
FLOORING REST OF THE WORLD				
Manufacturing	—	17	5	22
Distribution/Warehouse	—	3	—	3
TOTAL				
Manufacturing	27	28	7	62
Distribution/Warehouse	18	11	2	31

ITEM 3. LEGAL PROCEEDINGS

The Company is involved in litigation from time to time in the regular course of its business. Except as noted below, there are no material legal proceedings pending or known by the Company to be contemplated to which the Company is a party or to which any of its property is subject.

Alabama Municipal Litigation

In September 2016, the Water Works and Sewer Board of the City of Gadsden, Alabama (the "Gadsden Water Board") filed an individual complaint in the Circuit Court of Etowah County, Alabama against certain manufacturers, suppliers, and users of chemicals containing specific perfluorinated compounds, including the Company. On October 26, 2016, the defendants removed the case to the United States District Court for the Northern District of Alabama, Middle Division, alleging diversity of citizenship and fraudulent joinder. The Gadsden Water Board filed a motion to remand the case back to the state court, and the defendants opposed the Gadsden Water Board's motion. The federal court granted Gadsden Water Board's motion for remand.

In May 2017, the Water Works and Sewer Board of the Town of Centre, Alabama (the "Centre Water Board") filed a very similar complaint to the Gadsden Water Board complaint in the Circuit Court of Cherokee County. On June 19, 2017, the defendants removed this case to the United States District Court for the Northern District of Alabama, Middle Division, again alleging diversity of citizenship and fraudulent joinder. The Centre Water Board filed a motion to remand the case back to state court, and the defendants opposed the Centre Water Board's motion. The federal court granted Centre Water Board's motion for remand.

Certain defendants, including the Company, filed dispositive motions in each case arguing that the state court lacks personal jurisdiction over them. Both state courts denied those motions. In June and September 2018, certain defendants, including the Company, petitioned the Alabama Supreme Court for Writs of Mandamus directing each lower court to enter an order granting the defendants' dispositive motions on personal jurisdiction grounds. Those petitions have been fully briefed and the Company awaits a decision from the Alabama Supreme Court.

The Company has never manufactured the perfluorinated compounds at issue but purchased them for use in the manufacture of its carpets prior to 2007. The Gadsden and Centre Water Boards are not alleging that chemical levels in the Company's wastewater discharge exceeded legal limits. Instead, the Gadsden and Centre Water Boards are seeking lost profits based on allegations that their customers decreased water purchases, as well as reimbursement for the cost of a filter and punitive damages.

Belgian Tax Matter (amounts in thousands)

Between 2012 and 2014, the Company received assessments from the Belgian tax authority for the calendar years 2005 through 2010 in the amount of €46,135, €38,817, €39,635, €30,131, €35,567 and €43,117 respectively, including penalties, but excluding interest. The Belgian tax authority denied the Company's formal protests against these assessments and the Company brought all six years before the Court of First Appeal in Bruges. The Court of First Appeal in Bruges ruled in favor of the Company on January 27, 2016, with respect to the calendar years ending December 31, 2005 and December 31, 2009; and on June 13, 2018, the Court of First Appeal in Bruges, ruled in favor of the Company with respect to the calendar years ending December 31, 2006, December 31, 2007, December 31, 2008 and December 31, 2010. The Belgian tax authority has lodged its Notification of Appeal for all six years with the Ghent Court of Appeal. In December 2018, the Belgian tax authority issued an assessment for the year ended December 31, 2011, in the amount of €37,991 including penalties, but excluding interest. In January of 2019, the Company received a "Notice of Change" from the Belgian tax authority for tax years 2012 through 2017 in the amount of €38,858, €11,108, €23,522, €30,610, €92,109 and €78,174 respectively, including penalties, but excluding interest. The Company intends to respond to these notices in a timely manner and will file formal protests should the tax authority issue assessments for these years. The Notices of Change are based on largely the same facts underlying the positive rulings, which the Belgian tax authority is appealing.

The Company continues to disagree with the views of the Belgian tax authority on this matter and will persist in its vigorous defense. Nevertheless, on May 24, 2016, the tax collector representing the Belgian tax authorities imposed a lien on the Company's properties in Wielsbeke (Ooigemstraat and Breestraat), Oostrozebeke (Ingelmunstersteenweg) and Desselgem (Waregemstraat) included in the Flooring ROW segment. The purpose of the lien is to provide security for payment should the Belgian tax authority prevail on its appeal. The lien does not interfere with the Company's operations at these properties.

General

The Company believes that adequate provisions for resolution of all contingencies, claims and pending litigation have been made for probable losses that are reasonably estimable. These contingencies are subject to significant uncertainties and the Company is unable to estimate the amount or range of loss, if any, in excess of amounts accrued. The Company does not believe that the ultimate outcome of these actions will have a material adverse effect on its financial condition but could have a material adverse effect on its results of operations, cash flows or liquidity in a given quarter or year.

ITEM 4. MINE SAFETY DISCLOSURES

The information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95.1 to this annual report on Form 10-K.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market for the Common Stock

The Company's common stock, \$0.01 par value per share (the "Common Stock"), is quoted on the New York Stock Exchange ("NYSE") under the symbol "MHK."

As of February 27, 2019, there were 224 holders of record of Common Stock. The Company has not paid or declared any cash dividends on shares of its Common Stock since completing its initial public offering. The payment of future cash dividends will be at the discretion of the Board of Directors and will depend upon the Company's profitability, financial condition, cash requirements, future prospects and other factors deemed relevant by the Board of Directors.

Issuer Purchases of Equity Securities

On October 25, 2018, the Company announced that its Board of Directors approved a new share repurchase program authorizing the Company to repurchase up to \$500 million in shares of its common stock. Under the share repurchase plan, the Company may purchase common stock in open market transactions, block or privately negotiated transactions, and may from time to time purchase shares pursuant to trading plans in accordance with Rules 10b5-1 or 10b-18 under the Exchange Act or by any combination of such methods. The number of shares to be purchased and the timing of the purchases are based on a variety of factors, including, but not limited to, the level of cash balances, credit availability, debt covenant restrictions, general business conditions, regulatory requirements, the market price of the Company's stock and the availability of alternative investment opportunities. No time limit was set for completion of repurchases under the new authorization and the program may be suspended or discontinued at any time. The new program replaces any previously authorized share repurchase programs.

Period	Total Number of Shares Purchased in Millions	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan in Millions	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plan in Millions
October 1 through November 2, 2018	0.5	\$117.99	0.5	\$441.1
November 5 through November 30, 2018	0.4	\$122.28	0.4	\$392.7
December 3 through December 31, 2018	1.4	\$118.27	1.4	\$225.9
Total	2.3	\$118.90	2.3	

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth the selected financial data of the Company for the periods indicated which information is derived from the consolidated financial statements of the Company. The selected financial data should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the Company's consolidated financial statements and notes thereto included elsewhere herein.

(a) During 2018, the Company acquired Godfrey Hirst Group, Eliane S/A Revestimentos Ceramicos ("Eliane") and 3 businesses in Flooring ROW segment as discussed in Note 2 of the Notes to Consolidated Financial Statements.

(b) During 2017, the Company acquired Emil as discussed in Note 2 of the Notes to Consolidated Financial Statements.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

Mohawk is a significant supplier of every major flooring category with manufacturing operations in 19 nations and sales in more than 170 countries. Based on its annual sales, the Company believes it is the world's largest flooring manufacturer. A majority of the Company's long-lived assets are located in the United States and Europe, which are also the Company's primary markets. The Company expects continued growth in the United States market consistent with residential housing starts and remodeling investments and has invested significantly in state-of-the-art manufacturing to create aspirational products to delight consumers with beauty and performance. The Company also is a leading provider of flooring for the U.S. commercial market and has earned significant recognition for its innovation in design and performance and sustainable practices. Additionally, the Company maintains significant operations in Europe, Russia, Mexico, Australia, New Zealand, Brazil and other parts of the world. The Company is growing share in many markets through its differentiated products, especially its ceramic tile collections.

During the past two decades, the Company has grown significantly. Its current geographic breadth and diverse product offering are reflected in three reporting segments: Global Ceramic; Flooring North America ("Flooring NA"); and Flooring Rest of the World ("Flooring ROW"). The Global Ceramic Segment designs, manufactures, sources and markets a broad line of ceramic tile, porcelain tile, natural stone tile and other products including natural stone, quartz and porcelain slab countertops, which it distributes primarily in North America, Europe, Brazil and Russia through various selling channels, which include company-owned stores, independent distributors and home centers. The Flooring NA Segment designs, manufactures, sources and markets its floor covering product lines, including carpets, rugs, carpet cushion, wood, laminate and vinyl products, including luxury vinyl tile (LVT), which it distributes through its network of regional distribution centers and satellite warehouses using Company-operated trucks, common carrier or rail transportation. The Segment's product lines are sold through various selling channels, including independent floor covering retailers, distributors, home centers, mass merchandisers, department stores, shop at home, online retailers, buying groups, commercial contractors and commercial end users. The Flooring ROW Segment designs, manufactures, sources, licenses and markets laminate, wood flooring, carpets, roofing elements, insulation boards, medium-density fiberboard ("MDF"), chipboards, other wood products and vinyl products, including LVT, which it distributes primarily in Europe, Russia, Australia and New Zealand through various selling channels, which include independent floor covering retailers, independent distributors, company-owned distributors, home centers, commercial contractors and commercial end users.

The Company expects sales growth to continue on a local basis in 2019, even with some softening in the European and Australian markets, offset by projected growth in Russia, Brazil and Mexico. The Company has also implemented multiple product price increases in most product categories due to escalating material, transportation and energy costs in most

markets. The Company is managing through current macro-economic headwinds including significant inflation, a strong U.S. dollar that is impacting currency translation as well as strengthening the competitiveness of imports in the U.S. and slowing housing markets in a number of countries. While focused on addressing current conditions, the Company also established a long-term growth strategy, which includes strategic acquisitions in key growth markets and targeted internal investments that are expanding the Company's geographic reach and product portfolio.

In 2018, the Company completed five acquisitions: two that expanded the Company's global footprint with leadership positions in major markets and three that expanded the Company's product offering and distribution in Europe. The Godfrey Hirst acquisition established the Company as the largest flooring manufacturer in Australia and New Zealand, with leading carpet and hard surface positions in both countries when combined with the Company's existing regional flooring distribution business. Godfrey Hirst's prestigious wool carpet collections are exported to numerous international markets and have been integrated into the U.S. soft surface product portfolio to expand sales. The acquisition of Brazil-based Eliane provided the Company with a leading ceramic tile position and the most appealing brand in one of the world's largest ceramic markets and created a gateway into the overall South American market as Eliane is Brazil's largest ceramic exporter. The acquisition of Berghoef, a leading European mezzanine flooring company, created a leading position in a category that is rapidly expanding due to increased construction of e-commerce warehousing across the continent. The acquisition of Swiss and Italian hard surface distributors expanded the Company's direct distribution of flooring sales in Europe.

In 2018, the Company invested over \$794.1 million in capital projects to, introduce new product categories, enter new markets, expand capacity of constrained premium products and improve productivity. In 2019, the Company plans to invest an additional \$550-\$580 million in its existing businesses to complete projects that were begun in 2018 and to commence new initiatives. The largest investments during this two-year period are the expansion of LVT in the U.S. and Europe, including the launch of manufactured rigid LVT collections; ceramic capacity increases in the U.S., Mexico, Italy, Poland, Bulgaria and Russia as well as in the Company's newly acquired ceramic business in Brazil, where the Company is investing in new assets to dramatically improve profitability as it did with the Marazzi acquisition; new porcelain slab production in Europe and Russia; premium water-resistant laminate in the U.S., Europe and Russia; carpet tile in Europe; sheet vinyl and premium sanitary ware in Russia; quartz countertops in the U.S., where the Company now produces and distributes materials for all kitchen and bath surfaces; and residential and commercial carpet in the U.S. and Australia, where the Company is investing in assets to expand its commercial carpet presence in the recent Godfrey Hirst acquisition.

Net earnings attributable to the Company were \$861.7 million, or diluted EPS of \$11.47 for 2018 compared to net earnings attributable to the Company of \$971.6 million, or diluted EPS of \$12.98 for 2017. The decrease in EPS was primarily attributable to higher inflation, higher start-up costs, and costs due to temporarily reducing production to align with softer market conditions, partially offset by the favorable net impact of price and product mix, increased sales volume, productivity gained

from capital investments, cost reduction initiatives and decreased income tax expense. The Company benefited from a lower effective tax rate as a result of the recent reforms in the U.S. and Belgium.

For the year ended December 31, 2018, the Company generated \$1,181.3 million of cash from operating activities. As of December 31, 2018, the Company had cash and cash equivalents of \$119.1 million, of which \$31.0 million was in the United States and \$88.1 million was in foreign countries.

Recent Events

On November 16, 2018, the Company completed its acquisition of Eliane S/A Revestimentos Ceramicos, one of the largest ceramic tile companies in Brazil, further extending Mohawk's global position in new markets. Pursuant to the purchase agreement, the Company (i) acquired the entire issued share capital of Eliane and (ii) acquired \$99.0 million of indebtedness of Eliane, with total cash consideration paid of \$148.7 million including cash held in escrow of \$5.3 million.

On January 31, 2019, the Company completed an acquisition of a hard surface flooring distribution company based in the Netherlands for approximately €60.6 million.

Results of Operations

Year Ended December 31, 2018, as Compared with Year Ended December 31, 2017

Net sales

Net sales for 2018 were \$9,983.6 million, reflecting an increase of \$492.3 million, or 5.2%, from the \$9,491.3 million reported for 2017. The increase was primarily attributable to higher sales volume of approximately \$297 million, or 3%, which includes sales volumes attributable to acquisitions of approximately \$229 million and legacy sales volumes of approximately \$68 million, the favorable net impact of price and product mix of approximately \$111 million, or 1%, and the favorable net impact of foreign exchange rates of approximately \$85 million, or 1%.

GLOBAL CERAMIC SEGMENT—Net sales increased \$147.8 million, or 4.3%, to \$3,552.9 million for 2018, compared to \$3,405.1 million for 2017. The increase was primarily attributable to higher sales volume of approximately \$150 million, or 4%, which includes sales volume attributable to acquisitions of approximately \$82 million, or 2%, and legacy sales volume of approximately \$68 million, or 2%, the favorable net impact of foreign exchange rates of approximately \$9 million partially offset by the unfavorable net impact of lower price and product mix of \$11 million.

FLOORING NA SEGMENT—Net sales increased \$18.3 million, or 0.5%, to \$4,029.1 million for 2018, compared to \$4,010.9 million for 2017. The increase was primarily attributable to the favorable net impact of price and product mix of \$51 million, or 1%, partially offset by the unfavorable net impact of lower volumes of \$33 million.

FLOORING ROW SEGMENT—Net sales increased \$326.2 million, or 15.7%, to \$2,401.6 million for 2018, compared to \$2,075.5 million for 2017. The increase was primarily attributable to higher sales volume of approximately \$179 million, or 9%, which includes sales volume attributable to acquisitions of approximately \$147 million and legacy sales volume of approximately \$32 million, the favorable net impact of price and product mix of approximately \$71 million, or 3%, and the favorable net impact of foreign exchange rates of approximately \$76 million, or 4%.

Quarterly net sales and the percentage changes in net sales by quarter for 2018 versus 2017 were as follows (dollars in millions):

	2018	2017	Change
First quarter	\$2,412.2	2,220.6	8.6%
Second quarter	2,577.0	2,453.0	5.1%
Third quarter	2,545.8	2,448.5	4.0%
Fourth quarter	2,448.6	2,369.1	3.4%
Total year	\$9,983.6	9,491.3	5.2%

Gross profit

Gross profit for 2018 was \$2,838.1 million (28.4% of net sales), a decrease of \$158.3 million or 5.3%, compared to gross profit of \$2,996.4 million (31.6% of net sales) for 2017. As a percentage of net sales, gross profit decreased 314 basis points. The decrease in gross profit dollars was primarily attributable to higher inflation costs of approximately \$230 million, including increased material costs of approximately \$140 million, approximately \$40 million of start-up costs associated with large investments to expand sales, add product categories and enter new markets, approximately \$37 million of costs due to temporarily reducing production, and the unfavorable impact of higher restructuring, acquisition and integration-related and other costs of approximately \$13 million, partially offset by the favorable net impact of price and product mix of approximately \$68 million, higher sales volume of approximately \$54 million and savings from capital investments and cost reduction initiatives of approximately \$28 million and the net impact of favorable foreign exchange rates of approximately \$12 million.

Selling, general and administrative expenses

Selling, general and administrative expenses for 2018 were \$1,742.7 million (17.5% of net sales), an increase of \$100.5 million or 6.1% compared to \$1,642.2 million (17.3% of net sales) for 2017. As a percentage of net sales, selling, general and administrative expenses increased 15 basis points. The increase in selling, general and administrative expenses in dollars was primarily attributable to approximately \$45 million of costs due to higher sales volume, approximately \$19 million of costs associated with investments in new product development, sales personnel, and marketing, higher inflation costs of approximately \$15 million, and the unfavorable impact of higher restructuring, acquisition and integration-related and other costs of approximately \$19 million.

Operating income

Operating income for 2018 was \$1,095.3 million (11.0% of net sales) reflecting a decrease of \$258.8 million, or 19.1%, compared to operating income of \$1,354.2 million (14.3% of net sales) for 2017. The decrease in operating income was primarily attributable to higher inflation costs of approximately \$246 million, including increased material costs of approximately \$140 million, approximately \$48 million of start-up costs associated with large investments to expand sales, add product categories, and enter new markets, approximately \$32 million due to the unfavorable impact of higher restructuring, acquisition and integration-related, and other costs, approximately \$37 million of costs due to temporarily reducing production, and approximately \$13 million of costs associated with investments in new product development, sales personnel, marketing, and the net impact of unfavorable foreign exchange rates partially offset by the favorable net impact of price and product mix of approximately \$68 million, increased sales volume of approximately \$9 million, and savings from capital investments and cost reduction initiatives of approximately \$35 million.

GLOBAL CERAMIC SEGMENT—Operating income was \$442.9 million (12.5% of segment net sales) for 2018 reflecting a decrease of \$82.5 million, or 15.7%, compared to operating income of \$525.4 million (15.4% of segment net sales) for 2017. The decrease in operating income was primarily attributable to higher inflation costs of approximately \$97 million, the unfavorable net impact of price and product mix of approximately \$28 million, approximately \$25 million of costs due to temporarily reducing production, and approximately \$11 million of costs associated with investments in new product development, sales personnel, and marketing, partially offset by savings from capital investments and cost reduction initiatives of approximately \$63 million, and increased sales volume of approximately \$24 million.

FLOORING NA SEGMENT—Operating income was \$347.9 million (8.6% of segment net sales) for 2018 reflecting a decrease of \$192.4 million, or 35.6%, compared to operating income of \$540.3 million (13.5% of segment net sales) for 2017. The decrease in operating income was primarily attributable to higher inflation costs of approximately \$126 million, including increased material costs of approximately \$108 million, an increase in costs of approximately \$64 million due to lower than expected production volumes, the ramp up of new products and higher logistics costs, lower sales volume of approximately \$23 million, approximately \$16 million of start-up costs associated with large investments to expand sales, add product categories, and enter new markets, and approximately \$13 million of costs due to temporarily reducing production, partially offset by the favorable net impact of price and product mix of approximately \$43 million, and savings from capital investments and cost reduction initiatives of approximately \$17 million.

FLOORING ROW SEGMENT—Operating income was \$345.8 million (14.4% of segment net sales) for 2018 reflecting an increase of \$16.7 million, or 5.1%, compared to operating income of \$329.1 million (15.9% of segment net sales) for 2017. The increase in operating income was primarily attributable to the favorable net impact of price and product mix of approximately \$54 million, savings from capital investments and cost reduction initiatives of approximately \$20 million, increased sales volume of approximately \$4 million, partially offset by approximately \$27 million of start-up costs associated with large investments to expand sales, add product categories, and enter new markets, higher inflation costs of approximately \$23 million, and \$16 million due to the unfavorable impact of higher restructuring, acquisition and integration-related costs.

Interest expense

Interest expense was \$38.8 million for 2018, reflecting an increase of \$7.7 million compared to interest expense of \$31.1 million for 2017. The increase was primarily attributable to the increase in interest rates during 2018 and the early extinguishment of acquisition debt.

Other expense (income)

Other expense was \$7.3 million for 2018, reflecting an unfavorable change of \$2.1 million compared to other income of \$5.2 million for 2017. The change was primarily due to the increased unfavorable impact of foreign exchange rates on transactions in the current year.

Income tax expense

For 2018, the Company recorded income tax expense of \$184.3 million on earnings before income taxes of \$1,049.2 million for an effective tax rate of 17.6%, as compared to an income tax expense of \$343.2 million on earnings before income taxes of \$1,317.9 million, resulting in an effective tax rate of 26.0% for 2017. The decrease in the year-over-year tax expense of \$158.9 million was primarily driven by the geographic dispersion of the Company's earnings for 2018, subject to tax at the reduced rates in effect in the U.S. and Belgium, of \$181.6 million, and the reduction to the transition tax and related tax planning initiatives of \$163.4 million, partially offset by the one-time 2017 restatement of the Company's deferred tax liabilities of \$139.9 million, the one-time Italian tax planning election of \$10.3 million, the restatement of certain state deferred tax assets of \$20.4 million, and various other items of \$15.5 million.

In December of 2017, the U.S. and Belgium enacted tax reform legislation. The U.S. legislation, the Tax Cuts and Jobs Act ("TCJA"), is the most significant and complex change to the U.S. tax law in more than 30 years and requires the combined effort of the Company's finance, tax, and treasury departments to ensure the proper accounting of its comprehensive changes. The most significant provisions of the TCJA, were the reduction of the corporate income tax rate from 35% to 21% effective January 1, 2018, implementation of a territorial income tax regime, and imposition of a transition tax on the deemed repatriation of the accumulated earnings of the Company's foreign subsidiaries. The most significant provisions of the Belgium legislation were the reduction of the corporate income tax rate from 33.99% to 29.58% for 2018 and 2019, with a further reduction to 25% effective January 1, 2020, an annual limitation on the utilization of net operating losses, and creation of a consolidated corporate income tax regime.

As a result of the tax reform legislation, for the year ended December 31, 2017, the Company recorded a net tax expense of \$0.8 million related primarily to the non-cash tax benefit of the revaluation of its Belgian deferred tax liabilities, the non-cash tax benefit of the provisional revaluation of its U.S. deferred tax liabilities, and the tax expense of the provisional accrual associated with the Deemed Repatriation Transition Tax. This represented a reasonable estimate of the impact of all tax law changes on the Company's financial statements in accordance with SAB 118. In accordance with the SAB 118 measurement period, the Company has completed its accounting for the income tax effects of all elements of the TCJA. See Note 13—Income Taxes.

Year Ended December 31, 2017, as Compared with Year Ended December 31, 2016

Net Sales

Net sales for 2017 were \$9,491.3 million, reflecting an increase of \$532.2 million, or 5.9%, from the \$8,959.1 million reported for 2016. The increase was primarily attributable to higher sales volume of approximately \$245 million, or 3%, which includes sales volumes attributable to acquisitions of approximately \$137 million and legacy sales volumes of approximately \$107 million, the favorable net impact of price and product mix of approximately \$218 million, or 2%, and the favorable impact of foreign exchange rates of approximately \$69 million, or 1%.

GLOBAL CERAMIC SEGMENT—Net sales increased \$230.4 million, or 7.3%, to \$3,405.1 million for 2017, compared to \$3,174.7 million for 2016. The increase was primarily attributable to higher sales volume of approximately \$162 million, or 5%, which includes sales volume attributable to acquisitions of approximately \$137 million and legacy sales volume of approximately \$24 million, the favorable net impact of foreign exchange rates of approximately \$39 million, or 1%, and the favorable net impact of price and product mix of approximately \$29 million, or 1%.

FLOORING NA SEGMENT—Net sales increased \$145.1 million, or 3.8%, to \$4,010.9 million for 2017, compared to \$3,865.7 million for 2016. The increase was primarily attributable to higher sales volumes of approximately \$39 million, or 1%, and the favorable net impact of price and product mix of \$105 million, or 3%.

FLOORING ROW SEGMENT—Net sales increased \$156.8 million, or 8.2%, to \$2,075.5 million for 2017, compared to \$1,918.6 million for 2016. The increase was primarily attributable to higher sales volume of approximately \$44 million, or 2%, the favorable net impact of price and product mix of approximately \$83 million, or 4%, and the favorable net impact of foreign exchange rates of approximately \$30 million, or 2%.

Quarterly net sales and the percentage changes in net sales by quarter for 2017 versus 2016 were as follows (dollars in millions):

	2018	2017	Change
First quarter	\$2,220.6	2,172.0	2.2%
Second quarter	2,453.0	2,310.3	6.2%
Third quarter	2,448.5	2,294.1	6.7%
Fourth quarter	2,369.1	2,182.6	8.5%
Total year	\$9,491.3	8,959.1	5.9%

Gross Profit

Gross profit for 2017 was \$2,996.4 million (31.6% of net sales), an increase of \$183.6 million or 6.5%, compared to gross profit of \$2,812.8 million (31.4% of net sales) for 2016. As a percentage of net sales, gross profit increased 20 basis points. The increase in gross profit dollars was primarily attributable to the favorable net impact of price and product mix of approximately \$171 million, savings from capital investments and cost reduction initiatives

of approximately \$154 million, higher sales volume of approximately \$58 million, and the favorable net impact of foreign exchange rates of approximately \$17 million, partially offset by higher input costs of approximately \$194 million, including increased material costs of approximately \$137 million.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for 2017 were \$1,642.2 million (17.3% of net sales), an increase of \$109.4 million or 7.1% compared to \$1,532.9 million (17.1% of net sales) for 2016. As a percentage of net sales, selling, general and administrative expenses increased 20 basis points. The increase in selling, general and administrative expenses in dollars was primarily attributable to approximately \$50 million of costs due to higher sales volume, the unfavorable impact of higher restructuring, acquisition and integration-related, and other costs of approximately \$33 million, approximately \$23 million of costs associated with investments in new product development, sales personnel, and marketing, increased employee costs of approximately \$13 million and the unfavorable net impact of foreign exchange rates of approximately \$12 million, partially offset by savings from capital investments and cost reduction initiatives of approximately \$24 million. Restructuring, acquisition and integration-related, and other costs were higher in 2017 primarily due to the absence of approximately \$90 million received in 2016 related to a contract dispute, partially offset by the approximately \$48 million charge related to the write-off of the Lees tradename that was recorded in 2016.

Operating Income

Operating income for 2017 was \$1,354.2 million (14.3% of net sales) reflecting an increase of \$74.2 million, or 5.8%, compared to operating income of \$1,279.9 million (14.3% of net sales) for 2016. The increase in operating income was primarily attributable to savings from capital investments and cost reduction initiatives of approximately \$178 million and the favorable net impact of price and product mix of approximately \$169 million, partially offset by higher input costs of approximately \$195 million, including increased material costs of approximately \$137 million, approximately \$23 million of costs associated with investments in new product development, sales personnel, and marketing, increased employee costs of approximately \$13 million, and the unfavorable impact of higher restructuring, acquisition and integration-related, and other costs of approximately \$45 million. Restructuring, acquisition and integration-related, and other costs were higher in 2017 primarily due to the absence of approximately \$90 million received in 2016 related to a contract dispute, partially offset by the approximately \$48 million charge related to the write-off of the Lees tradename that was recorded in 2016.

GLOBAL CERAMIC SEGMENT—Operating income was \$525.4 million (15.4% of segment net sales) for 2017 reflecting an increase of \$47.0 million, or 9.8%, compared to operating income of \$478.4 million (15.1% of segment net sales) for 2016. The increase in operating income was primarily attributable to savings from capital investments and cost reduction initiatives of approximately \$70 million, increased sales volumes of approximately \$29 million, the favorable net impact of price and product mix of approximately \$15 million, and the favorable

net impact of foreign exchange rates of approximately \$10 million, partially offset by higher input costs of approximately \$40 million, approximately \$12 million of costs associated with investments in new product development, sales personnel, and marketing, and the unfavorable impact of higher restructuring, acquisition and integration-related, and other costs of approximately \$16 million.

FLOORING NA SEGMENT—Operating income was \$540.3 million (13.5% of segment net sales) for 2017 reflecting an increase of \$35.2 million, or 7.0%, compared to operating income of \$505.1 million (13.1% of segment net sales) for 2016. The increase in operating income was primarily attributable to savings from capital investments and cost reduction initiatives of approximately \$71 million, and the favorable net impact of price and product mix of approximately \$74 million, partially offset by higher input costs of approximately \$72 million, including increased material costs of approximately \$54 million, and the unfavorable impact of higher restructuring, acquisition and integration-related, and other costs of approximately \$33 million. Restructuring, acquisition and integration-related, and other costs were higher primarily due to the absence of approximately \$90 million received in 2016 related to a contract dispute, partially offset by the approximately \$48 million charge related to the write-off of the Lees tradename that was recorded in 2016.

FLOORING ROW SEGMENT—Operating income was \$329.1 million (15.9% of segment net sales) for 2017 reflecting a decrease of \$4.0 million, or (1.2)%, compared to operating income of \$333.1 million (17.4% of segment net sales) for 2016. The decrease in operating income was primarily attributable to higher input costs of approximately \$80 million, including increased material costs of approximately \$76 million, costs associated with investments in expansion of production capacity of approximately \$7 million, approximately \$6 million of costs associated with investments in new product development, sales personnel, and marketing, the unfavorable net impact of exchange rates of approximately \$5 million, and approximately \$22 million in decreased sales volumes, primarily attributable to lower patent revenue. These decreases in operating income were partially offset by savings from capital investments and cost reduction initiatives of approximately \$37 million, and the favorable net impact of price and product mix of approximately \$80 million.

Interest Expense

Interest expense was \$31.1 million for 2017, reflecting a decrease of \$9.4 million compared to interest expense of \$40.5 million for 2016. The decrease was primarily attributable to a shift in the Company's borrowings to lower interest rate instruments.

Other Expense (Income)

Other expense was \$5.2 million for 2017, reflecting an unfavorable change of \$6.9 million compared to other income of \$1.7 million for 2016. The change was primarily due to the increased unfavorable impact of foreign exchange rates on transactions in the current year.

Income Tax Expense

For 2017, the Company recorded income tax expense of \$343.2 million on earnings before income taxes of \$1,317.9 million for an effective tax rate of 26.0%, as compared to an income tax

expense of \$307.6 million on earnings before income taxes of \$1,241.1 million, resulting in an effective tax rate of 24.8% for 2016. The increase in the year-over-year effective tax rate was the direct result of the geographic dispersion of the Company's earnings for 2017, decreased by \$44.4 million caused by the revaluation of deferred tax liabilities triggered by the Belgium corporate income tax reform, and increased by a one-time provisional net tax expense of \$45.2 million resulting from the U.S. corporate income tax reform.

In December of 2017, the U.S. and Belgium enacted tax reform legislation. The U.S. legislation, the Tax Cuts and Jobs Act ("TCJA"), is the most significant and complex change to the U.S. tax law in more than 30 years. The most significant provisions of the TCJA, were the reduction of the corporate income tax rate from 35% to 21% effective January 1, 2018, implementation of a territorial income tax regime, and imposition of a transition tax on the deemed repatriation of the accumulated earnings of the Company's foreign subsidiaries. The most significant provisions of the Belgium legislation were the reduction of the corporate income tax rate from 33.99% to 29.58% for January 1, 2018 and January 1, 2019, respectively, with a further reduction to 25% effective January 1, 2020, an annual limitation on the utilization of net operating losses, and creation of a consolidated corporate income tax regime.

Accordingly, for the year ended December 31, 2017, the Company recorded a net tax expense of \$0.8 million related primarily to the non-cash tax benefit of the revaluation of its Belgian deferred tax liabilities, the non-cash tax benefit of the provisional revaluation of its U.S. deferred tax liabilities, and the tax expense of the provisional accrual associated with the Deemed Repatriation Transition Tax. See Note 13-Income Taxes.

Liquidity and Capital Resources

The Company's primary liquidity requirements are for working capital, capital expenditures and acquisitions. The Company's liquidity needs are met primarily through a combination of internally generated funds, commercial paper, bank credit lines, term and senior notes and credit terms from suppliers. As of December 31, 2018, the Company had a total of \$347.7 million available under its 2015 Senior Credit Facility. The Company also maintains local currency revolving lines of credit and other credit facilities to provide liquidity to its businesses around the world. None of such local facilities are material in amount.

Net cash provided by operating activities for the year ended 2018 was \$1,181.3 million, compared to net cash provided by operating activities of \$1,193.6 million for the year ended 2017. This decrease of \$12.3 million was primarily attributable to a reduction in operating income and changes in working capital, reflecting normal fluctuations relative to the timing and nature of these transactions. The decrease in cash provided by operating activities for 2017 as compared to 2016 of \$151.7 million was primarily attributable to changes in working capital.

Net cash used in investing activities for the year ended 2018 was \$1,332.2 million compared to net cash used in investing activities of \$1,240.7 million for the year ended 2017. The increase was primarily due to a \$318.2 million increase in acquisitions, partially offset by a \$111.9 million reduction in capital expenditures. Net cash used in investing activities in 2017 increased over 2016 by \$568.6 million due primarily to

acquisitions of \$250.8 million, \$83.9 million purchase of short-term investments, and an increase in capital expenditures of \$233.9 million. The Company will continue to invest to optimize sales and profit growth with product expansion and cost reduction projects in the business.

Net cash provided by financing activities for the year ended 2018 was \$198.0 million compared to net cash used in financing activities of \$7.0 million for the year ended 2017. The change in cash provided by financing is primarily attributable to increased borrowings of commercial paper, offset by purchases of the Company's shares of \$274.1 million. Net cash used in financing activities for the year ended 2017 was \$7.0 million compared to net cash used in financing activities for the year ended 2016 of \$641.6 million. This reduction of \$634.6 million is primarily attributable to the issuance and sale of \$357.6 million in Floating Rate Notes in 2017 and the repayment of senior notes of \$645.6 million in 2016.

Senior Credit Facility

On March 26, 2015, the Company amended and restated its 2013 senior credit facility increasing its size from \$1,000.0 million to \$1,800.0 million and extending the maturity from September 25, 2018 to March 26, 2020 (as amended and restated, the "2015 Senior Credit Facility"). The 2015 Senior Credit Facility eliminated certain provisions in the 2013 Senior Credit Facility, including those that: (a) accelerated the maturity date to 90 days prior to the maturity of senior notes due in January 2016 if certain specified liquidity levels were not met; and (b) required that certain subsidiaries guarantee the Company's obligations if the Company's credit ratings fell below investment grade. The 2015 Senior Credit Facility also modified certain negative covenants to provide the Company with additional flexibility, including flexibility to make acquisitions and incur additional indebtedness. On March 1, 2016, the Company amended the 2015 Senior Credit Facility to, among other things, carve out from the general limitation on subsidiary indebtedness the issuance of Euro-denominated commercial paper notes by subsidiaries. Additionally, at several points in 2016, the Company extended the maturity date of the 2015 Senior Credit Facility from March 26, 2020 to March 26, 2021. In the first half of 2017, the Company amended the 2015 Senior Credit Facility to extend the maturity date from March 26, 2021 to March 26, 2022.

At the Company's election, revolving loans under the 2015 Senior Credit Facility bear interest at annual rates equal to either (a) LIBOR for 1, 2, 3 or 6 month periods, as selected by the Company, plus an applicable margin ranging between 1.00% and 1.75% (1.125% as of December 31, 2018), or (b) the higher of the Wells Fargo Bank, National Association prime rate, the Federal Funds rate plus 0.5%, or the Eurocurrency Rate (as defined in the 2015 Senior Credit Facility) rate plus 1.0%, plus an applicable margin ranging between 0.00% and 0.75% (0.125% as of December 31, 2018). The Company also pays a commitment fee to the lenders under the 2015 Senior Credit Facility on the average amount by which the aggregate commitments of the lenders exceed utilization of the 2015 Senior Credit Facility ranging from 0.10% to 0.225% per annum (0.125% as of December 31, 2018). The applicable margins and the commitment fee are determined based on whichever of the Company's Consolidated Net Leverage Ratio or its senior unsecured debt rating (or if not available, corporate family rating) results in the lower applicable margins and commitment fee

(with applicable margins and the commitment fee increasing as that ratio increases or those ratings decline, as applicable).

The obligations of the Company and its subsidiaries in respect of the 2015 Senior Credit Facility are unsecured.

The 2015 Senior Credit Facility includes certain affirmative and negative covenants that impose restrictions on the Company's financial and business operations, including limitations on liens, subsidiary indebtedness, fundamental changes, asset dispositions, dividends and other similar restricted payments, transactions with affiliates, future negative pledges, and changes in the nature of the Company's business. The Company is also required to maintain a Consolidated Interest Coverage Ratio of at least 3.0 to 1.0 and a Consolidated Net Leverage Ratio of no more than 3.75 to 1.0, each as of the last day of any fiscal quarter. The limitations contain customary exceptions or, in certain cases, do not apply as long as the Company is in compliance with the financial ratio requirements and is not otherwise in default.

The 2015 Senior Credit Facility also contains customary representations and warranties and events of default, subject to customary grace periods.

In 2017, the Company paid financing costs of \$0.6 million in connection with the extension of its 2015 Senior Credit Facility from March 26, 2021 to March 26, 2022. These costs were deferred and, along with unamortized costs of \$6.9 million are being amortized over the term of the 2015 Senior Credit Facility.

As of December 31, 2018, amounts utilized under the 2015 Senior Credit Facility included \$57.9 million of borrowings and \$54.6 million of standby letters of credit related to various insurance contracts and foreign vendor commitments. The outstanding borrowings of \$1,339.8 million under the Company's U.S. and European commercial paper programs as of December 31, 2018 reduce the availability of the 2015 Senior Credit Facility. Including commercial paper borrowings, the Company has utilized \$1,452.3 million under the 2015 Senior Credit Facility resulting in a total of \$347.7 million available as of December 31, 2018.

Commercial Paper

On February 28, 2014 and July 31, 2015, the Company established programs for the issuance of unsecured commercial paper in the United States and Eurozone capital markets, respectively. Commercial paper issued under the U.S. and European programs will have maturities ranging up to 397 and 183 days, respectively. None of the commercial paper notes may be voluntarily prepaid or redeemed by the Company and all rank pari passu with all of the Company's other unsecured and unsubordinated indebtedness. To the extent that the Company issues European commercial paper notes through a subsidiary of the Company, the notes will be fully and unconditionally guaranteed by the Company.

The Company uses its 2015 Senior Credit Facility as a liquidity backstop for its commercial paper programs. Accordingly, the total amount outstanding under all of the Company's commercial paper programs may not exceed \$1,800.0 million (less any amounts drawn on the 2015 Senior Credit Facility) at any time.

The proceeds from the issuance of commercial paper notes will be available for general corporate purposes. As of December 31, 2018 there was \$632.7 million outstanding under the U.S.

commercial paper program, and the euro equivalent of \$707.2 million under the European program. The weighted-average interest rate and maturity period for the U.S. program were 2.98% and 27.64 days, respectively. The weighted-average interest rate and maturity period for the European program were (0.21)% and 28.61 days, respectively.

Senior Notes

On May 18, 2018, Mohawk Capital Finance S.A. ("Mohawk Finance"), an indirect wholly-owned finance subsidiary of the Company, completed the issuance and sale of €300.0 million aggregate principal amount of its Floating Rate Notes due May 18, 2020 ("2020 Floating Rate Notes"). The 2020 Floating Rate Notes are senior unsecured obligations of Mohawk Finance and rank pari passu with all of Mohawk Finance's other existing and future senior unsecured indebtedness. The 2020 Floating Rate Notes are fully, unconditionally and irrevocably guaranteed by the Company on a senior unsecured basis. These notes bear interest at a rate per annum, reset quarterly, equal to three-month EURIBOR plus 0.3% (but in no event shall the interest rate be less than zero). Interest on the 2020 Floating Rate Notes is payable quarterly on August 18, November 18, February 18, and May 18 of each year. Mohawk Finance paid financing costs of \$0.9 million in connection with the 2020 Floating Rate Notes. These costs were deferred and are being amortized over the term of the 2020 Floating Rate Notes.

On September 11, 2017, Mohawk Finance completed the issuance and sale of €300.0 million aggregate principal amount of its Floating Rate Notes due September 11, 2019 ("2019 Floating Rate Notes"). The 2019 Floating Rate Notes are senior unsecured obligations of Mohawk Finance and rank pari passu with all of Mohawk Finance's other existing and future senior unsecured indebtedness. The 2019 Floating Rate Notes are fully, unconditionally and irrevocably guaranteed by the Company on a senior unsecured basis. These notes bear interest at a rate per annum, reset quarterly, equal to three-month EURIBOR plus 0.3% (but in no event shall the interest rate be less than zero). Interest on the 2019 Floating Rate Notes is payable quarterly on September 11, December 11, March 11, and June 11 of each year. Mohawk Finance paid financing costs of \$0.9 million in connection with the 2019 Floating Rate Notes. These costs were deferred and are being amortized over the term of the 2019 Floating Rate Notes.

On June 9, 2015, the Company issued €500.0 million aggregate principal amount of 2.00% Senior Notes due January 14, 2022 ("2.00% Senior Notes"). The 2.00% Senior Notes are senior unsecured obligations of the Company and rank pari passu with all of the Company's existing and future unsecured indebtedness. Interest on the 2.00% Senior Notes is payable annually in cash on January 14 of each year, commencing on January 14, 2016. The Company paid financing costs of \$4.2 million in connection with the 2.00% Senior Notes. These costs were deferred and are being amortized over the term of the 2.00% Senior Notes.

On January 31, 2013, the Company issued \$600.0 million aggregate principal amount of 3.85% Senior Notes due February 1, 2023 ("3.85% Senior Notes"). The 3.85% Senior Notes are senior unsecured obligations of the Company and rank pari passu with all of the Company's existing and future unsecured indebtedness. Interest on the 3.85% Senior Notes is payable semi-annually in cash on February 1 and August 1 of each year. The Company paid financing costs of \$6.0 million

in connection with the 3.85% Senior Notes. These costs were deferred and are being amortized over the term of the 3.85% Senior Notes.

As defined in the related agreements, the Company's senior notes contain covenants, representations and warranties and events of default, subject to exceptions, and restrictions on the Company's financial and business operations, including limitations on liens, restrictions on entering into sale and leaseback transactions, fundamental changes, and a provision allowing the holder of the notes to require repayment upon a change of control triggering event.

Accounts Receivable Securitization

On December 19, 2012, the Company entered into a three-year on-balance sheet trade accounts receivable securitization agreement (the "Securitization Facility"). On September 11, 2014, the Company made certain modifications to its Securitization Facility, which modifications, among other things, increased the aggregate borrowings available under the facility from \$300.0 million to \$500.0 million and decreased the interest margins on certain borrowings. Amounts borrowed under the Securitization Facility bore interest at LIBOR plus an applicable margin of 0.70% per annum and the borrower paid a commitment fee at a per annum rate of 0.30% on the unused amount of each lender's commitment. On December 10, 2015, the Company extended the termination date to December 19, 2016, and on December 13, 2016, the Company extended the termination date to December 19, 2017. The Company paid financing costs of \$0.3 million in connection with the second extension. These costs were deferred and amortized over the term of the Securitization Facility. The Securitization Facility expired in accordance with its terms on December 19, 2017.

Other

The Company may continue, from time to time, to retire its outstanding debt through cash purchases in the open market, privately negotiated transactions or otherwise. Such repurchases, if any, will depend on prevailing market conditions, the Company's liquidity requirements, contractual restrictions and other factors. The amount involved may be material.

As of December 31, 2018, the Company had cash of \$119.1 million, of which \$88.1 million was held outside the United States. The Company plans to permanently reinvest the cash held outside the United States. The Company believes that its cash and cash equivalents on hand, cash generated from operations and availability under its 2015 Senior Credit Facility will be sufficient to meet its capital expenditure, working capital and debt servicing requirements over the next twelve months.

As of December 31, 2018, the Company has repurchased \$274.1 million of its shares of common stock pursuant to the \$500 million program announced in October. All of these repurchases have been financed through the Company's operations and existing finance arrangements. See Item 5—Issuer Purchases of Equity Securities.

Contractual Obligations and Commitments

The following is a summary of the Company's future minimum payments under contractual obligations and commitments as of December 31, 2018 (in millions):

	Total	2019	2020	2021	2022	2023	Thereafter
CONTRACTUAL OBLIGATIONS AND COMMITMENTS:							
Long-term debt, including current maturities and capital leases	\$3,263.1	1,742.4	344.3	0.6	572.6	600.4	2.8
Interest payments on long-term debt and capital leases ⁽¹⁾	150.2	54.2	34.7	34.7	24.2	2.1	0.4
Operating leases	366.5	116.1	93.7	66.1	42.2	22.2	26.1
Purchase commitments ⁽²⁾	574.9	184.5	81.1	54.3	25.5	25.5	204.0
Expected pension contributions ⁽³⁾	2.6	2.6	—	—	—	—	—
Uncertain tax positions ⁽⁴⁾	3.0	3.0	—	—	—	—	—
Guarantees ⁽⁵⁾	8.8	8.8	—	—	—	—	—
Total	\$4,369.1	2,111.5	553.8	155.7	664.5	650.2	233.3

(1) For fixed rate debt, the Company calculated interest based on the applicable rates and payment dates. For variable rate debt, the Company estimated average outstanding balances for the respective periods and applied interest rates in effect as of December 31, 2018 to these balances.

(2) Includes volume commitments for natural gas, electricity and raw material purchases.

(3) Includes the estimated pension contributions for 2019 only, as the Company is unable to estimate the pension contributions beyond 2019. The Company's projected benefit obligation and plan assets as of December 31, 2018 were \$63.6 million and \$54.3 million, respectively. The projected benefit obligation liability has not been presented in the table above due to uncertainty as to amounts and timing regarding future payments.

(4) Excludes \$27.7 million of non-current accrued income tax liabilities and related interest and penalties for uncertain tax positions. These liabilities have not been presented in the table above due to uncertainty as to amounts and timing regarding future payments.

(5) Includes bank guarantees and letters of credit.

Critical Accounting Policies

In preparing the consolidated financial statements in conformity with U.S. generally accepted accounting principles, the Company must make decisions which impact the reported amounts of assets, liabilities, revenues and expenses, and related disclosures. Such decisions include the selection of appropriate accounting principles to be applied and the assumptions on which to base accounting estimates. In reaching such decisions, the Company applies judgment based on its understanding and analysis of the relevant circumstances and historical experience. Actual amounts could differ from those estimated at the time the consolidated financial statements are prepared.

The Company's significant accounting policies are described in Note 1 to the Consolidated Financial Statements included elsewhere in this report. Some of those significant accounting policies require the Company to make subjective or complex judgments or estimates. Critical accounting estimates are defined as those that are both most important to the portrayal of a company's financial condition and results and require management's most difficult, subjective, or complex judgment, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods.

The Company believes the following accounting policies require it to use judgments and estimates in preparing its consolidated financial statements and represent critical accounting policies.

- **ACCOUNTS RECEIVABLE AND REVENUE RECOGNITION.**

The Company recognizes revenues when it satisfies performance obligations as evidenced by the transfer of control of the promised goods to customers, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods. The nature of the promised goods are ceramic, stone, carpet, resilient, laminate, wood and other flooring products. Payment is typically received 90 days or less from the invoice date. The Company adjusts the amounts of revenue for expected cash discounts, sales allowances, returns, and claims, based upon historical experience. The Company adjusts accounts receivable for doubtful account allowances based upon historical bad debt, claims experience, periodic evaluation of specific customer accounts, and the aging of accounts receivable. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. A 10% change in the Company's allowance for discounts, returns, claims and doubtful accounts would have affected net earnings by approximately \$5 million for the year ended December 31, 2018.

- INVENTORIES ARE STATED AT THE LOWER OF COST OR MARKET (NET REALIZABLE VALUE).** Cost has been determined using the first-in first-out method ("FIFO"). Costs included in inventory include raw materials, direct and indirect labor and employee benefits, depreciation, general manufacturing overhead and various other costs of manufacturing. Market, with respect to all inventories, is replacement cost or net realizable value. Inventories on hand are compared against anticipated future usage, which is a function of historical usage, anticipated future selling price, expected sales below cost, excessive quantities and an evaluation for obsolescence. Actual results could differ from assumptions used to value obsolete inventory, excessive inventory or inventory expected to be sold below cost, and a 10% change in the Company's assumptions for excess or obsolete inventory would have affected net earnings by approximately \$8 million for the year ended December 31, 2018.
- ACQUISITION ACCOUNTING.** The fair value of the consideration the Company pay for each new acquisition is allocated to tangible assets and identifiable intangible assets, liabilities assumed, any non-controlling interest in the acquired entity and goodwill. The accounting for acquisitions involves a considerable amount of judgment and estimate, including the fair value of certain forms of consideration; fair value of acquired intangible assets involving projections of future revenues and cash flows that are then either discounted at an estimated discount rate or measured at an estimated royalty rate; fair value of other acquired assets and assumed liabilities, including potential contingencies; and the useful lives of the acquired assets. The assumptions used are determined at the time of the acquisition in accordance with accepted valuation models. Projections are developed using internal forecasts, available industry and market data and estimates of long-term rates of growth for the business. The impact of prior or future acquisitions on the Company's financial position or results of operations may be materially impacted by the change in or initial selection of assumptions and estimates. See Note 2-Acquisitions for further discussion of business combination accounting valuation methodology and assumptions.
- GOODWILL AND OTHER INTANGIBLES.** Goodwill is tested annually for impairment on the first day of the fourth quarter or earlier upon the occurrence of certain events or substantive changes in circumstances. The Company considers the relationship between its market capitalization and its book value, among other factors, when reviewing for indicators of impairment. The goodwill impairment tests are based on determining the fair value of the specified reporting units based on management judgments and assumptions using the discounted cash flows and comparable company market valuation approaches. The Company has identified Global Ceramic, Flooring NA and Flooring ROW as its reporting units for the purposes of allocating goodwill and intangibles as well as assessing impairments. The valuation approaches are subject to key judgments and assumptions that are sensitive to change such as judgments and assumptions about appropriate sales growth rates, operating margins, weighted average cost of capital ("WACC"), and comparable company market multiples. When developing these key judgments and assumptions, the Company considers economic, operational and market conditions that could impact the fair value of the reporting unit. However, estimates are

inherently uncertain and represent only management's reasonable expectations regarding future developments. These estimates and the judgments and assumptions upon which the estimates are based will, in all likelihood, differ in some respects from actual future results. Should a significant or prolonged deterioration in economic conditions occur, such as declines in spending for new construction, remodeling and replacement activities; the inability to pass increases in the costs of raw materials and fuel on to customers; or a decline in comparable company market multiples, then key judgments and assumptions could be impacted. Generally, a decline in estimated after tax cash flows of more than 35% or a more than 26% increase in WACC or a significant or prolonged decline in market capitalization could result in an additional indication of impairment.

The impairment test for intangible assets not subject to amortization involves a comparison of the estimated fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. Significant judgments inherent in this analysis include assumptions about appropriate sales growth rates, royalty rates, WACC and the amount of expected future cash flows. These judgments and assumptions are subject to the variability discussed above.

The impairment evaluation for indefinite lived intangible assets, which for the Company are its trademarks, is conducted on the first day of the fourth quarter of each year, or more frequently if events or changes in circumstances indicate that an asset might be impaired. The determination of fair value used in the impairment evaluation is based on discounted estimates of future sales projections attributable to ownership of the trademarks. Significant judgments inherent in this analysis include assumptions about appropriate sales growth rates, royalty rates, WACC and the amount of expected future cash flows. The judgments and assumptions used in the estimate of fair value are generally consistent with past performance and are also consistent with the projections and assumptions that are used in operating plans. Such assumptions are subject to change as a result of changing economic and competitive conditions. The determination of fair value is highly sensitive to differences between estimated and actual cash flows and changes in the related discount rate used to evaluate the fair value of the trademarks. Estimated cash flows are sensitive to changes in the economy among other things.

The Company reviews its long-lived asset groups, which include intangible assets subject to amortization, which for the Company are its patents and customer relationships, for impairment whenever events or changes in circumstances indicate that the carrying amount of such asset groups may not be recoverable. Recoverability of asset groups to be held and used is measured by a comparison of the carrying amount of long-lived assets to future undiscounted net cash flows expected to be generated by these asset groups. If such asset groups are considered to be impaired, the impairment recognized is the amount by which the carrying amount of the asset group exceeds the fair value of the asset group. Assets held for sale are reported at the lower of the carrying amount or fair value less estimated costs of disposal and are no longer depreciated.

The Company conducted its annual assessment of goodwill and indefinite lived intangibles on the first day of the fourth quarter and no impairment was indicated for 2018.

- **INCOME TAXES.** The Company's effective tax rate is based on its income, statutory tax rates and tax planning opportunities available in the jurisdictions in which it operates. Tax laws are complex and subject to different interpretations by the taxpayer and respective governmental taxing authorities. Significant judgment is required in determining the Company's tax expense and in evaluating the Company's tax positions. Deferred tax assets represent amounts available to reduce income taxes payable on taxable income in a future period. The Company evaluates the recoverability of these future tax benefits by assessing the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. These sources of income inherently rely on estimates, including business forecasts and other projections of financial results over an extended period of time. In the event that the Company is not able to realize all or a portion of its deferred tax assets in the future, a valuation allowance is provided. The Company would recognize such amounts through a charge to income in the period in which that determination is made or when tax law changes are enacted. For further information regarding the Company's valuation allowances, see Note 13—Income Taxes.

In the ordinary course of business there is inherent uncertainty in quantifying the Company's income tax positions. The Company assesses its income tax positions and records tax benefits for all years subject to examination based upon the Company's evaluation of the facts, circumstances and information available as of the reporting date. For those tax positions where it is more likely than not that a tax benefit will be sustained, the Company has recorded the largest amount of tax benefit with a greater than 50% likelihood of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information, as required by the provisions of the Financial Accounting Standards Board ("FASB") FASB Accounting Standards Codification Topic ("ASC") 740-10. For those income tax positions where it is not more likely than not that a tax benefit will be sustained, no tax benefit has been recognized in the consolidated financial statements. For further information regarding the Company's uncertain tax positions, see Note 13—Income Taxes.

- **ENVIRONMENTAL AND LEGAL ACCRUALS.** Environmental and legal accruals are estimates based on judgments made by the Company relating to ongoing environmental and legal proceedings, as disclosed in the Company's consolidated financial statements. In determining whether a liability is probable and reasonably estimable, the Company consults with its internal experts. The Company believes that the amounts recorded in the accompanying financial statements are based on the best estimates and judgments available to it.

Recent Accounting Pronouncements

See Note 1(u), "Summary of Significant Accounting Policies," of the Company's accompanying audited consolidated financial statements in Item 8 of this Annual Report on Form 10-K for a description of recent accounting pronouncements including the dates, or expected dates of adoption, and effects, or expected effects, on the Company's disclosures, results of operations, and financial condition.

Impact of Inflation

Inflation affects the Company's manufacturing costs, distribution costs and operating expenses. The Company expects raw material prices, many of which are petroleum based, to fluctuate based upon worldwide supply and demand of commodities utilized in the Company's production processes. Although the Company attempts to pass on increases in raw material, energy and fuel-related costs to its customers, the Company's ability to do so is dependent upon the rate and magnitude of any increase, competitive pressures and market conditions for the Company's products. There have been in the past, and may be in the future, periods of time during which increases in these costs cannot be fully recovered. In the past, the Company has often been able to enhance productivity and develop new product innovations to help offset increases in costs resulting from inflation in its operations.

Seasonality

The Company is a calendar year-end company. With respect to its Flooring NA and Global Ceramic segments, the second quarter typically sees the higher net sales and operating income, followed by the first and third quarters. The results of operations for the fourth quarter tends to be the weakest. These results are primarily due to consumer residential spending patterns which have historically decreased during the holiday season and the first two months following. The Flooring ROW segment's second quarter typically produces the highest net earnings followed by moderate first and third quarters and a weaker fourth quarter.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's market risk is impacted by changes in foreign currency exchange rates, interest rates and certain commodity prices. Financial exposures to these risks are monitored as an integral part of the Company's risk management program, which seeks to reduce the potentially adverse effect that the volatility of these markets may have on its operating results. The Company does not regularly engage in speculative transactions, nor does it regularly hold or issue financial instruments for trading purposes. Excluding the hedge of net investment discussed in Note 1(n) "Hedges of Net Investments in Non-U.S. Operations," of the Company's accompanying consolidated financial statements in Item 8 of this Annual Report on Form 10-K, the Company did not have any derivative contracts outstanding as of December 31, 2018 and 2017.

Interest Rate Risk

As of December 31, 2018, approximately 36% of the Company's debt portfolio was comprised of fixed-rate debt and 64% was floating-rate debt. The Company believes that probable near-term changes in interest rates would not materially affect its financial condition, results of operations or cash flows. The annual impact on interest expense of a one-percentage point interest rate change on the outstanding balance of the Company's variable rate debt as of December 31, 2018 would be approximately \$21 million or \$0.18 to diluted EPS.

Foreign Exchange Risk

As a result of being a global enterprise, there is exposure to market risks from changes in foreign currency exchange rates, which may adversely affect the operating results and financial condition of the Company. Principal foreign currency exposures relate primarily to the euro and to a lesser extent the Russian ruble, the Mexican peso, the Canadian dollar, the Australian dollar, the British pound and the Brazilian real.

The Company's objective is to balance, where possible, non-functional currency denominated assets to non-functional currency denominated liabilities to have a natural hedge and minimize foreign exchange impacts. The Company enters into cross border transactions through importing and exporting goods to and from different countries and locations. These transactions generate foreign exchange risk as they create assets, liabilities and cash flows in currencies other than their functional currency. This also applies to services provided and other cross border agreements among subsidiaries.

The Company takes steps to minimize risks from foreign currency exchange rate fluctuations through normal operating and financing activities. The Company does not enter into any speculative positions with regard to derivative instruments.

Based on financial results for the year ended December 31, 2018, a hypothetical overall 10 percent change in the U.S. dollar against the euro would have resulted in a translational adjustment of approximately \$43 million.

TO THE STOCKHOLDERS AND BOARD OF DIRECTORS
MOHAWK INDUSTRIES, INC.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Mohawk Industries, Inc. and subsidiaries (the Company) as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the years in the three year period ended December 31, 2018, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the years in the three year period ended December 31, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 28, 2019 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

TO THE STOCKHOLDERS AND BOARD OF DIRECTORS
MOHAWK INDUSTRIES, INC.:

Opinion on Internal Control Over Financial Reporting

We have audited Mohawk Industries, Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2018, and related notes, and our report dated February 28, 2019 expressed an unqualified opinion on those consolidated financial statements.

The Company acquired Godfrey Hirst Group during 2018, and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2018, Godfrey Hirst Group's internal control over financial reporting associated with total assets of \$199.6 million and total net sales of \$146.9 million included in the consolidated financial statements of the Company as of and for the year ended December 31, 2018.

The Company acquired Eliane S/A Revestimentos Ceramicos ("Eliane") during 2018, and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2018, Eliane's internal control over financial reporting associated with total assets of \$186.5 million and total net sales of \$35.1 million included in the consolidated financial statements of the Company as of and for the year ended December 31, 2018.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

See accompanying notes to consolidated financial statements.

YEARS ENDED DECEMBER 31, 2018, 2017 AND 2016
(IN THOUSANDS, EXCEPT PER SHARE DATA)

Note 1. Summary of Significant Accounting Policies

(a) Basis of Presentation

Mohawk Industries, Inc. ("Mohawk" or the "Company"), a term which includes the Company and its subsidiaries, is a leading global flooring manufacturer that creates products to enhance residential and commercial spaces around the world. The Company's vertically integrated manufacturing and distribution processes provide competitive advantages in the production of carpet, rugs, ceramic tile, laminate, wood, stone, luxury vinyl tile ("LVT") and vinyl flooring.

The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(b) Cash and Cash Equivalents

The Company considers investments with an original maturity of three months or less when purchased to be cash equivalents. As of December 31, 2018, the Company had cash of \$119,050 of which \$88,100 was held outside the United States. As of December 31, 2017, the Company had cash of \$84,884 of which \$70,520 was held outside the United States.

(c) Accounts Receivable and Revenue Recognition

On January 1, 2018, the Company adopted the new accounting standard, ASC 606, *Revenue from Contracts with Customers* and all the related amendments ("ASC 606") and applied the provisions of the standard to all contracts using the modified retrospective method. The cumulative effect of adopting the new revenue standard was immaterial and no adjustment has been recorded to the opening balance of retained earnings. Prior year information has not been restated and continues to be reported under the accounting standards in effect for those periods.

The Company recognizes revenues when it satisfies performance obligations as evidenced by the transfer of control of the promised goods to customers, when the product is either shipped or received from the Company's facilities, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods. The Company reviewed all of its revenue product categories under ASC 606 and the only changes identified were that an immaterial amount of revenue from intellectual property ("IP") contracts results in earlier recognition of revenue, new controls and processes designed to meet the requirements of the standard were implemented,

and the required new disclosures are presented in Note 3—Revenue from Contracts with Customers. The adoption of ASC 606 did not have a material impact on the amounts reported in the Company's consolidated financial position, results of operations or cash flows.

(d) Inventories

The Company accounts for all inventories on the first-in, first-out ("FIFO") method. Inventories are stated at the lower of cost or net realizable value. Cost has been determined using the FIFO method. Costs included in inventory include raw materials, direct and indirect labor and employee benefits, depreciation, general manufacturing overhead and various other costs of manufacturing. Inventories on hand are compared against anticipated future usage, which is a function of historical usage, anticipated future selling price, expected sales below cost, excessive quantities and an evaluation for obsolescence.

(e) Property, Plant and Equipment

Property, plant and equipment are stated at cost, including capitalized interest. Depreciation is calculated on a straight-line basis over the estimated remaining useful lives, which are 25–40 years for buildings and improvements, 5–15 years for machinery and equipment, the shorter of the estimated useful life or lease term for leasehold improvements and 3–7 years for furniture and fixtures.

(f) Accounting for Business Combinations

The Company accounts for business combinations under the acquisition method of accounting which requires it to recognize separately from goodwill the assets acquired and the liabilities assumed at their acquisition date fair values. While the Company uses its best estimates and assumptions to accurately value assets acquired and liabilities assumed at the acquisition date as well as contingent consideration, where applicable, the estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, the Company records adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to the Company's consolidated statements of operations.

(g) Goodwill and Other Intangible Assets

In accordance with the provisions of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic ("ASC") 350, *Intangibles—Goodwill and Other*, the Company tests goodwill and other intangible assets with indefinite lives for impairment on an annual basis on the first day of the fourth quarter (or on an interim basis if an event occurs that might reduce the fair value of the reporting unit below its carrying value). The Company considers the relationship between its market capitalization and its book value, among other factors, when reviewing for indicators of impairment. The goodwill

impairment tests are based on determining the fair value of the specified reporting units based on management's judgments and assumptions using the discounted cash flows and comparable company market valuation approaches. The Company has identified Global Ceramic, Flooring NA, and Flooring ROW as its reporting units for the purposes of allocating goodwill and intangibles as well as assessing impairments. The valuation approaches are subject to key judgments and assumptions that are sensitive to change such as judgments and assumptions about appropriate sales growth rates, operating margins, weighted average cost of capital ("WACC"), and comparable company market multiples.

When developing these key judgments and assumptions, the Company considers economic, operational and market conditions that could impact the fair value of the reporting unit. However, estimates are inherently uncertain and represent only management's reasonable expectations regarding future developments. These estimates and the judgments and assumptions upon which the estimates are based will, in all likelihood, differ in some respects from actual future results. Should a significant or prolonged deterioration in economic conditions occur, such as continued declines in spending for new construction, remodeling and replacement activities; the inability to pass increases in the costs of raw materials and fuel on to customers; or a decline in comparable company market multiples, then key judgments and assumptions could be impacted.

The impairment evaluation for indefinite lived intangible assets, which for the Company are its trademarks, is conducted on the first day of the fourth quarter of each year, or more frequently if events or changes in circumstances indicate that an asset might be impaired. The first step of the impairment tests for our indefinite lived intangible assets is a thorough assessment of qualitative factors to determine the existence of events or circumstances that would indicate that it is not more likely than not that the fair value of these assets is less than their carrying amounts. If the qualitative test indicates it is not more likely than not that the fair value of these assets is less than their carrying amounts, a quantitative assessment is not required. If a quantitative test is necessary, the second step of our impairment test involves comparing the estimated fair value of a reporting unit to its carrying amount. The determination of fair value used in the impairment evaluation is based on discounted estimates of future sales projections attributable to ownership of the trademarks. Significant judgments inherent in this analysis include assumptions about appropriate sales growth rates, royalty rates, WACC and the amount of expected future cash flows. The judgments and assumptions used in the estimate of fair value are generally consistent with past performance and are also consistent with the projections and assumptions that are used in current operating plans. Such assumptions are subject to change as a result of changing economic and competitive conditions. The determination of fair value is highly sensitive to differences between estimated and actual cash flows and changes in the related discount rate used to evaluate the fair value of the trademarks. Estimated cash flows are sensitive to changes in the economy among other things. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess.

Intangible assets that do not have indefinite lives are amortized based on average lives, which range from 7–16 years.

(h) Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interest and penalties related to unrecognized tax benefits in income tax expense.

(i) Financial Instruments

The Company's financial instruments consist primarily of receivables, accounts payable, accrued expenses and long-term debt. The carrying amounts of receivables, accounts payable and accrued expenses approximate their fair value because of the short-term maturity of such instruments. The Company formed a wholly-owned captive insurance company during 2017 that invests in the Company's commercial paper. These short-term commercial paper investments are classified as trading securities and carried at fair value based upon level two fair value hierarchy. The carrying amount of the Company's floating rate debt approximates its fair value based upon level two fair value hierarchy. Interest rates that are currently available to the Company for issuance of long-term debt with similar terms and remaining maturities are used to estimate the fair value of the Company's long-term debt.

(j) Advertising Costs and Vendor Consideration

Advertising and promotion expenses are charged to earnings during the period in which they are incurred. Advertising and promotion expenses included in selling, general, and administrative expenses were \$116,854 in 2018, \$119,560 in 2017 and \$122,148 in 2016.

Vendor consideration, generally cash, is classified as a reduction of net sales, unless specific criteria are met regarding goods or services that the Company may receive in return for this consideration. The Company makes various payments to customers, including rebates, slotting fees, advertising allowances, buy-downs and co-op advertising. All of these payments reduce gross sales with the exception of co-op advertising. Co-op advertising is classified as a selling, general and administrative expense. Co-op advertising expenses, a component of advertising and promotion expenses, were \$13,332 in 2018, \$10,891 in 2017 and \$11,132 in 2016.

(k) Product Warranties

The Company warrants certain qualitative attributes of its flooring products. The Company has recorded a provision for estimated warranty and related costs, based on historical experience and periodically adjusts these provisions to reflect actual experience.

(l) Impairment of Long-Lived Assets

The Company reviews its long-lived asset groups, which include intangible assets subject to amortization, which for the Company are its patents and customer relationships, for impairment whenever events or changes in circumstances indicate that the carrying amount of such asset groups may not be recoverable. Recoverability of asset groups to be held and used is measured by a comparison of the carrying amount of long-lived assets to future undiscounted net cash flows expected to be generated by these asset groups. If such asset groups are considered to be impaired, the impairment recognized is the amount by which the carrying amount of the asset group exceeds the fair value of the asset group. Assets held for sale are reported at the lower of the carrying amount or fair value less estimated costs of disposal and are no longer depreciated.

(m) Foreign Currency Translation

The Company's subsidiaries that operate outside the United States use their local currency as the functional currency. The functional currency is translated into U.S. Dollars for balance sheet accounts using the month end rates in effect as of the balance sheet date and average exchange rate for revenue and expense accounts for each respective period. The translation adjustments are deferred as a separate component of stockholders' equity, within accumulated other comprehensive income (loss). Gains or losses resulting from transactions denominated in foreign currencies are included in other income or expense, within the consolidated statements of operations.

(n) Hedges of Net Investments in Non-U.S. Operations

The Company has numerous investments outside the United States. The net assets of these subsidiaries are exposed to changes and volatility in currency exchange rates. The Company uses foreign currency denominated debt to hedge its non-U.S. net investments against adverse movements in exchange rates. The gains and losses on the Company's net investments in its non-U.S. operations are economically offset by losses and gains on its foreign currency borrowings. The Company designated its €500,000 2.00% Senior Notes borrowing as a net investment hedge of a portion of its European operations. For the years ended December 31, 2018, December 31, 2017 and December 31, 2016 the change in the U.S. dollar value of the Company's euro denominated debt was a decrease of \$27,948 (\$20,376 net of taxes), an increase of \$74,112 (\$46,320 net of taxes) and a decrease of \$20,644 (\$12,902 net of taxes), respectively, which is recorded in the foreign currency translation adjustment component of accumulated other comprehensive income (loss). The increase in the U.S. dollar value of the Company's debt partially offsets the euro-to-dollar translation of the Company's net investment in its European operations.

(o) Earnings per Share ("EPS")

Basic net earnings per share ("EPS") is calculated using net earnings available to common stockholders divided by the weighted-average number of shares of common stock outstanding during the year. Diluted EPS is similar to basic EPS except that the weighted-average number of shares is increased to include the number of additional common shares that would have been outstanding if the potentially dilutive common shares had been issued.

Dilutive common stock options are included in the diluted EPS calculation using the treasury stock method. There were no common stock options and unvested restricted shares (units) that were excluded from the diluted EPS computation because the price was greater than the average market price of the common shares for the periods presented for 2018, 2017 and 2016.

Computations of basic and diluted earnings per share are presented in the following table:

	2018	2017	2016
Earnings attributable to Mohawk Industries, Inc.	\$861,704	971,638	930,362
Accretion of redeemable noncontrolling interest ^(a)	(3,892)	(46)	(123)
Net earnings available to common stockholders	\$857,812	971,592	930,239
Weighted-average common shares outstanding—basic and diluted:			
Weighted-average common shares outstanding—basic	74,413	74,357	74,104
Add weighted-average dilutive potential common shares—options and RSUs to purchase common shares, net	360	482	464
Weighted-average common shares outstanding—diluted	74,773	74,839	74,568
Earnings per share attributable to Mohawk Industries, Inc.			
Basic	\$ 11.53	13.07	12.55
Diluted	\$ 11.47	12.98	12.48

(a) Represents the accretion of the Company's redeemable noncontrolling interest to redemption value. The holder put this option to the Company on December 20, 2018 for \$33,884.

(p) Stock-Based Compensation

The Company recognizes compensation expense for all share-based payments granted based on the grant-date fair value estimated in accordance with ASC 718-10, "Stock Compensation." Compensation expense is generally recognized on a straight-line basis over the awards' estimated lives for fixed awards with ratable vesting provisions.

(q) Employee Benefit Plans

The Company has a 401(k) retirement savings plan (the "Mohawk Plan") open to substantially all U.S. and Puerto Rico based employees who have completed 90 days of eligible service. The Company contributes \$.50 for every \$1.00 of employee contributions up to a maximum of 6% of the employee's salary based upon each individual participants election. Employee and employer contributions to the Mohawk Plan were \$55,796 and \$22,689 in 2018, \$53,544 and \$22,039 in 2017 and \$50,542 and \$21,002 in 2016, respectively.

The Company also has various pension plans covering employees in Belgium, France, and the Netherlands (the "Non-U.S. Plans") within the Flooring ROW segment. Benefits under the Non-U.S. Plans depend on compensation and years of service. The Non-U.S. Plans are funded in accordance with local regulations. The Company uses December 31 as the measurement date for its Non-U.S. Plans. The Company's projected benefit obligation

and plan assets as of December 31, 2018 were \$63,569 and \$54,315, respectively. The Company's projected benefit obligation and plan assets as of December 31, 2017 were \$65,439 and \$53,404, respectively. As of December 31, 2018, the funded status of the Non-U.S. Plans was a liability of \$9,254 of which \$5,092 was recorded in accumulated other comprehensive income, for a net liability of \$4,162 recorded in other long-term liabilities within the consolidated balance sheets. As of December 31, 2017, the funded status of the Non-U.S. Plans was a liability of \$12,035 of which \$6,187 was recorded in accumulated other comprehensive income, for a net liability of \$5,848 recorded in other long-term liabilities within the consolidated balance sheets.

(r) Comprehensive Income (Loss)

Comprehensive income (loss) includes foreign currency translation of assets and liabilities of foreign subsidiaries, effects of exchange rate changes on intercompany balances of a long-term nature and pensions. The Company does not provide income taxes on currency translation adjustments, as earnings from foreign subsidiaries are considered to be indefinitely reinvested. The Company presents currency translation adjustments on non-controlling interests separately from currency translation adjustments on controlling interests in accumulated other comprehensive income (loss) within stockholders' equity.

The changes in accumulated other comprehensive income (loss) by component, net of tax, for years ended December 31, 2018, 2017 and 2016 are as follows:

	Foreign currency translation adjustments	Pensions and post-retirement benefits	Total
Balance as of December 31, 2015	\$ (788,652)	(4,916)	(793,568)
Current period other comprehensive income (loss) before reclassifications	(36,702)	(2,757)	(39,459)
Amounts reclassified from accumulated other comprehensive loss	—	—	—
Balance as of December 31, 2016	(825,354)	(7,673)	(833,027)
Current period other comprehensive income (loss) before reclassifications	277,427	(2,927)	274,500
Amounts reclassified from accumulated other comprehensive income	—	—	—
Balance as of December 31, 2017	(547,927)	(10,600)	(558,527)
Current period other comprehensive income (loss) before reclassifications	(234,175)	1,094	(233,081)
Amounts reclassified from accumulated other comprehensive income (loss)	—	—	—
Balance as of December 31, 2018	\$(782,102)	(9,506)	(791,608)

(s) Self-Insurance Reserves

The Company is self-insured in the U.S. for various levels of general liability, auto liability, workers' compensation and employee medical coverage. Insurance reserves are calculated on an undiscounted basis based on actual claim data and estimates of incurred but not reported claims developed utilizing historical claim trends. Projected settlements and incurred but not reported claims are estimated based on pending claims and historical trends and data. Though the Company does not expect them to do so, actual settlements and claims could differ materially from those estimated. Material differences in actual settlements and claims could have an adverse effect on the Company's results of operations and financial condition.

In the fourth quarter of 2017, the Company formed a wholly-owned captive insurance company, Mohawk Assurance Services, Inc. ("MAS"). MAS insures the retained portion of the Company's U.S. workers' compensation, automobile liability and general liability exposures. The Company funded MAS with an initial cash contribution of \$16,876 as a contribution to equity and \$67,391 as the net present value of premiums owed by the Company for the insurance provided by MAS. MAS began providing coverage to the Company as of December 22, 2017. MAS had investments of \$53,000 and \$83,904 in the Company's commercial paper as of December 31, 2018 and 2017, respectively.

(t) Fiscal Year

The Company ends its fiscal year on December 31. Each of the first three quarters in the fiscal year ends on the Saturday nearest the calendar quarter end with a thirteen week fiscal quarter.

(u) Recent Accounting Pronouncements

EFFECTIVE IN FUTURE YEARS

In February 2016, the FASB issued ASU 2016-02, *Leases*. The amendments create Topic 842, *Leases*, and supersede the requirements in Topic 840, *Leases*. Topic 842 specifies the accounting for leases. The objective of Topic 842 is to establish the principles that lessees and lessors shall apply to report useful information to users of financial statements about the amount, timing, and uncertainty of cash flows arising from a lease. The guidance in this update is effective for annual reporting periods beginning after December 15, 2018 including interim periods within that reporting period. Early adoption is permitted.

In July 2018, the FASB issued ASU 2018-11, *Targeted Improvements*, which allows for a new, optional transition method where the effective date also acts as the date of initial application on transition. Under this option, the comparative periods would continue to apply the legacy guidance in ASC 840, including the disclosure requirements, and a cumulative effect adjustment would be recognized in the period of adoption rather than the earliest period presented. Under this transition option, comparative reporting would not be required and the provisions of the standard would be applied prospectively to leases in effect at the date of adoption.

The Company plans to adopt the provisions of this Topic 842 at the beginning of fiscal year 2019 using a modified retrospective approach through a cumulative effect adjustment to "Retained earnings" as of the beginning of the period of adoption in line

with the new transition method allowed under ASU 2018-11. Topic 842 provides a number of optional practical expedients in transition. The Company expects to elect the "package of practical expedients" which permits the Company not to reassess under the new standard its prior conclusions about lease identification, lease classification and initial direct costs. The Company does not expect to elect the use-of-hindsight and will elect the practical expedient pertaining to land easements. The new standard also provides practical expedients for an entity's ongoing accounting for leases. The Company currently expects to elect the short-term lease exemption for all leases that qualify, meaning the Company will not recognize ROU assets or lease liabilities for leases with terms shorter than twelve months. The Company also currently expects to elect the practical expedient to not separate lease and non-lease components for a majority of its asset classes, including real estate and equipment.

The Company expects the adoption of this guidance to have a material impact on its Consolidated Balance Sheet due to the recognition of lease liabilities and related right-of-use assets in excess of \$300,000 to \$350,000. The Company does not expect adoption to materially affect its Consolidated Statement of Operations nor its Consolidated Statement of Cash Flows. The Company is working to complete the design of new controls and processes to meet both the quantitative and disclosure requirements of Topic 842 upon adoption. The Company may identify additional impacts this guidance will have on its consolidated financial statements and disclosures. The Company does not expect material changes in its leasing activities in conjunction with the adoption of Topic 842.

In January 2017, the FASB also issued ASU 2017-04, *Intangibles—Goodwill and other (Topic 350): Simplifying the test for goodwill impairment*. The amendments remove the second step of the current goodwill impairment test. An entity will apply a one-step quantitative test and record the amount of goodwill impairment as the excess of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit. The new guidance does not amend the optional qualitative assessment of goodwill impairment. This guidance is effective for impairment tests in fiscal years beginning after December 15, 2019.

RECENTLY ADOPTED

In July 2015, the FASB issued ASU 2015-11, *Simplifying the Measurement of Inventory*. This update changes the measurement principle for inventory for entities using FIFO or average cost from the lower of cost or market to lower of cost and net realizable value. Entities that measure inventory using LIFO or the retail inventory method are not affected. This update will more closely align the accounting for inventory under U.S. GAAP with IFRS. The Company currently accounts for inventory using the FIFO method. The Company adopted the provisions of this update at the beginning of fiscal year 2017. This update did not have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*. This update simplifies several aspects of the accounting for employee share-based payment transactions for both public and non-public entities, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. The

Company adopted the provisions of this update at the beginning of fiscal year 2017, with the statement of cash flows classifications applied retrospectively. Accordingly, cash paid for shares redeemed for taxes of \$13,039 and \$11,589 was reclassified to financing activities from operating activities for the year ended December 31, 2016 and 2015, respectively. Additionally, excess tax benefits are now classified with other tax flows as an operating activity with \$4,697 and \$5,690 reclassified from financing activities for the year ended December 31, 2016 and 2015, respectively. The Company has also elected to continue to estimate the number of awards that are expected to vest when accounting for forfeitures.

On January 1, 2018, the Company adopted the new accounting standard, ASC 606, *Revenue from Contracts with Customers* and all the related amendments ("ASC 606") and applied the provisions of the standard to all contracts using the modified retrospective method. The cumulative effect of adopting the new revenue standard was immaterial and no adjustment has been recorded to the opening balance of retained earnings. Prior year information has not been restated and continues to be reported under the accounting standards in effect for those periods.

Substantially all of the Company's revenue continues to be recognized at a point in time when the product is either shipped or received from the Company's facilities and control of the product is transferred to the customer. The Company reviewed all of its revenue product categories under ASC 606 and the only changes identified were that an immaterial amount of revenue from intellectual property ("IP") contracts results in earlier recognition of revenue, new controls and processes designed to meet the requirements of the standard were implemented, and the required new disclosures are presented in Note 3—Revenue from Contracts with Customers. The adoption of ASC 606 did not have a material impact on the amounts reported in the Company's consolidated financial position, results of operations or cash flows.

On January 1, 2018, the Company adopted the new accounting standard, ASU 2016-15, *Statement of Cash Flows (Topic 230)*. The effect of adopting the new standard was not material.

On January 1, 2018, the Company adopted the new accounting standard, ASU 2017-01, *Business Combinations (Topic 805): Clarifying the definition of a business*. The effect of adopting the new standard was not material.

Note 2. Acquisitions

2018 Acquisitions

On November 16, 2018, the Company completed its purchase of Eliane S/A Revestimentos Ceramicos ("Eliane"), one of the largest ceramic tile companies in Brazil. Pursuant to the purchase agreement, the Company (i) acquired the entire issued share capital of Eliane and (ii) acquired \$99,037 of indebtedness of Eliane, with total cash consideration paid of \$148,741, including cash held in escrow of \$5,285. The Company's acquisition of Eliane resulted in preliminary allocations of goodwill of \$19,821, indefinite-lived tradename intangible assets of \$33,111 and intangible assets subject to amortization of \$3,726. The goodwill is expected to be deductible for tax

purposes. The purchase price allocation is preliminary until the Company obtains final information regarding these fair values. Eliane's results of operations have been included in the consolidated financial statements since the date of acquisition in the Global Ceramic reporting segment. The results of Eliane's operations are not material to the Company's condensed consolidated results of operations.

On July 2, 2018, the Company completed its acquisition of Godfrey Hirst Group, the leading flooring company in Australia and New Zealand, further extending Mohawk's global position. The total value of the acquisition was \$400,894. The Company's acquisition of Godfrey Hirst Group resulted in preliminary allocations of goodwill of \$87,043, indefinite-lived tradename intangible assets of \$58,671 and intangible assets subject to amortization of \$43,635. The goodwill is not expected to be deductible for tax purposes. The factors contributing to the recognition of the amount of goodwill include product, sales and manufacturing synergies. The Godfrey Hirst Group's results have been included in the condensed consolidated financial statements since the date of acquisition in the Flooring NA and Flooring ROW segments. The results of Godfrey Hirst Group's operations are not material to the Company's condensed consolidated results of operations.

During the first quarter of 2018, the Company completed the acquisition of three businesses in the Flooring ROW segment for \$24,610, resulting in a preliminary goodwill allocation of \$12,874 and intangibles subject to amortization of \$7.

2017 Acquisitions

EMIL

On April 4, 2017, the Company completed its purchase of Emilceramica S.r.l ("Emil"), a ceramic company in Italy. The total value of the acquisition was \$186,099. The Emil acquisition enhanced the Company's cost position and strengthen its combined brand and distribution in Europe. The acquisition's results and purchase price allocation are included in the consolidated financial statements since the date of the acquisition. The Company's acquisition of Emil resulted in a goodwill allocation of \$59,491, indefinite-lived tradename intangible asset of \$16,196 and an intangible asset subject to amortization of \$2,348. The goodwill is not expected to be deductible for tax purposes. The factors contributing to the recognition of the amount of goodwill include product, sales and manufacturing synergies. The Emil results are reflected in the Global Ceramic segment and the results of Emil's operations are not material to the Company's consolidated results of operations.

OTHER ACQUISITIONS

During the second quarter of 2017, the Company completed the acquisition of two businesses in the Global Ceramic segment for \$37,250, resulting in a goodwill allocation of \$1,002. The Company also completed the acquisition of a business in the Flooring NA segment for \$26,623.

During the first quarter of 2017, the Company acquired certain assets of a distribution business in the Flooring ROW segment for \$1,407, resulting in intangible assets subject to amortization of \$827.

Note 3. Revenue from Contracts with Customers

Revenue Recognition and Accounts Receivable

The Company recognizes revenues when it satisfies performance obligations as evidenced by the transfer of control of the promised goods to customers, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods. The nature of the promised goods are ceramic, stone, carpet, resilient, laminate, wood and other flooring products. Payment is typically received 90 days or less from the invoice date. The Company adjusts the amounts of revenue for expected cash discounts, sales allowances, returns, and claims, based upon historical experience. The Company adjusts accounts receivable for doubtful account allowances based upon historical bad debt, claims experience, periodic evaluation of specific customer accounts, and the aging of accounts receivable. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Contract Liabilities

The Company historically records contract liabilities when it receives payment prior to fulfilling a performance obligation. Contract liabilities related to revenues are recorded in accounts payable and accrued expenses on the accompanying condensed consolidating balance sheets. The Company had contract liabilities of \$34,486 and \$29,124 as of December 31, 2018 and January 1, 2018, respectively.

Performance Obligations

Substantially all of the Company's revenue is recognized at a point in time when the product is either shipped or received from the Company's facilities and control of the product is transferred to the customer. Accordingly, in any period, the Company does not recognize a significant amount of revenue from performance obligations satisfied or partially satisfied in prior periods and the amount of such revenue recognized during the years ended December 31, 2018, 2017, and 2016 was immaterial.

Costs to Obtain a Contract

The Company historically incurs certain incremental costs to obtain revenue contracts. These costs relate to marketing display structures and are capitalized when the amortization period is greater than one year, with the amount recorded in other assets on the accompanying condensed consolidated balance sheets. Capitalized costs to obtain contracts were \$57,840 and \$43,259 as of December 31, 2018 and January 1, 2018, respectively. Amortization expense recognized during 2018 related to these capitalized costs was \$55,588.

Practical Expedients and Policy Elections

The Company elected the following practical expedients and policy elections:

- Incremental costs of obtaining a contract is recorded as an expense when incurred in selling, general and administrative expenses if the amortization period is less than one year.
- Shipping and handling activities performed after control has been transferred is accounted for as a fulfillment cost in cost of sales.

Revenue Disaggregation

The following table presents the Company's segment revenues disaggregated by the geographical market location of customer sales and product categories during the years ended December 31, 2018, 2017 and 2016, respectively:

December 31, 2018	Global Ceramic segment	Flooring NA segment	Flooring ROW segment	Intersegment sales	Total

(1) Other includes roofing elements, insulation boards, chipboards and IP contracts.

Note 4. Restructuring, Acquisition and Integration-Related Costs

The Company incurs costs in connection with acquiring, integrating and restructuring acquisitions and in connection with its global cost-reduction/productivity initiatives. For example:

- In connection with acquisition activity, the Company typically incurs costs associated with executing the transactions, integrating the acquired operations (which may include expenditures for consulting and the integration of systems and processes), and restructuring the combined company (which may include charges related to employees, assets and activities that will not continue in the combined company); and
- In connection with the Company's cost-reduction/productivity initiatives, it typically incurs costs and charges associated with site closings and other facility rationalization actions including accelerated depreciation and workforce reductions.

Restructuring, acquisition transaction and integration-related costs consisted of the following during the year ended December 31, 2018, 2017 and 2016, respectively (in thousands):

	2018	2017	2016
COST OF SALES			
Restructuring costs	\$43,733	33,109	33,582
Acquisition integration-related costs	3,330	2,916	4,722
Restructuring and integration-related costs	\$47,063	36,025	38,304
SELLING, GENERAL AND ADMINISTRATIVE EXPENSES			
Restructuring costs	\$15,259	3,976	4,881
Acquisition transaction-related costs	4,977	2,751	—
Acquisition integration-related costs	11,351	6,188	7,438
Restructuring, acquisition and integration-related costs	\$31,587	12,915	12,319

The restructuring activity for the years ended December 31, 2018 and 2017, respectively is as follows (in thousands):

	Lease impairments	Asset write-downs	Severance	Other restructuring costs	Total
Balance as of December 31, 2016	\$ —	—	5,183	6,243	11,426

BALANCE AS OF DECEMBER 31, 2018	\$ 397	—	7,866	250	8,513

The Company expects the remaining severance and other restructuring costs to be paid over the next year.

Note 5. Receivables

	December 31, 2018	December 31, 2017
Customers, trade	\$1,562,284	1,538,348
Income tax receivable	17,217	9,835
Other	101,376	96,079
	1,680,877	1,644,262
Less allowance for discounts, returns, claims and doubtful accounts	74,718	86,103
Receivables, net	\$1,606,159	1,558,159

The following table reflects the activity of allowances for discounts, returns, claims and doubtful accounts for the years ended December 31:

	Balance at beginning of year	Acquisitions	Additions charged to net sales or costs and expenses	Deductions ⁽¹⁾	Balance at end of year
2016	\$78,947	—	296,419	297,031	78,335
2017	78,335	6,510	308,507	307,249	86,103
2018	86,103	4,240	317,716	333,341	74,718

(1) Represents charge-offs, net of recoveries.

Note 6. Inventories

The components of inventories are as follows:

	December 31, 2018	December 31, 2017
Finished goods	\$1,582,112	1,326,038
Work in process	165,616	159,921
Raw materials	539,887	462,704
Total inventories	\$2,287,615	1,948,663

Note 7. Goodwill and Other Intangible Assets

The Company conducted its annual impairment assessment on the first day of the fourth quarter of 2018 and determined the fair values of its reporting units and trademarks exceeded their carrying values. As a result, no impairment was indicated.

The following table summarizes the components of intangible assets:

Goodwill:

	Global Ceramic	Flooring NA	Flooring ROW	Total
Balances as of December 31, 2016				
Goodwill	\$1,482,226	869,764	1,249,861	3,601,851

	\$1,033,057	531,144	956,765	2,520,966

Intangible assets:

During the third quarter of 2016, the Company determined that it needed to simplify the branding strategy in the Flooring NA segment by consolidating products under the Mohawk Group brands and discontinuing the Lees brand. This resulted in the Company writing off the full value of the Lees tradename and recording an impairment charge of \$47,905 in selling, general and administrative expenses in the consolidated statements of operations.

2021	28,021
2022	26,190
2023	24,558

Note 8. Property, Plant and Equipment

Following is a summary of property, plant and equipment:

December 31,	2018	2017
Land	\$ 407,780	385,027
Buildings and improvements	1,584,240	1,413,877
Machinery and equipment	5,334,060	4,603,911
Furniture and fixtures	230,644	211,730
Leasehold improvements	94,683	78,803
Construction in progress	575,667	792,936
	8,227,074	7,486,284
Less accumulated depreciation and amortization	3,527,172	3,215,494
Net property, plant and equipment	\$4,699,902	4,270,790

Additions to property, plant and equipment included capitalized interest of \$10,684, \$8,543 and \$5,608 in 2018, 2017 and 2016, respectively. Depreciation expense was \$487,411, \$408,646 and \$366,233 for 2018, 2017 and 2016, respectively. Included in property, plant and equipment are capital leases with a cost of \$7,106 and \$5,984 and accumulated depreciation of \$2,333 and \$2,071 as of December 31, 2018 and 2017, respectively.

Note 9. Long-Term Debt

Senior Credit Facility

On March 26, 2015, the Company amended and restated its 2013 senior credit facility increasing its size from \$1,000,000 to \$1,800,000 and extending the maturity from September 25, 2018 to March 26, 2020 (as amended and restated, the "2015 Senior Credit Facility"). The 2015 Senior Credit Facility eliminated certain provisions in the 2013 Senior Credit Facility, including those that: (a) accelerated the maturity date to 90 days prior to the maturity of senior notes due in January 2016 if certain specified liquidity levels were not met; and (b) required that certain subsidiaries guarantee the Company's obligations if the Company's credit ratings fell below investment grade. The 2015 Senior Credit Facility also modified certain negative covenants to provide the Company with additional flexibility, including flexibility to make acquisitions and incur additional indebtedness. On March 1, 2016, the Company amended the 2015 Senior Credit Facility to, among other things, carve out from the general limitation on subsidiary indebtedness the issuance of Euro-denominated commercial paper notes by subsidiaries. Additionally, at several points in 2016, the Company extended the maturity date of the 2015 Senior Credit Facility from March 26, 2020 to March 26, 2021. In the first half of 2017, the Company amended the 2015 Senior Credit Facility to extend the maturity date from March 26, 2021 to March 26, 2022.

At the Company's election, revolving loans under the 2015 Senior Credit Facility bear interest at annual rates equal to either (a) LIBOR for 1, 2, 3 or 6 month periods, as selected by the Company, plus an applicable margin ranging between 1.00% and 1.75% (1.125% as of December 31, 2018), or (b) the higher of the Wells Fargo Bank, National Association prime rate, the Federal Funds rate plus 0.5%, or the Eurocurrency Rate (as defined in the 2015 Senior Credit Facility) rate plus 1.0%, plus an applicable margin ranging between 0.00% and 0.75% (0.125% as of December 31, 2018). The Company also pays a commitment fee to the lenders under the 2015 Senior Credit Facility on the average amount by which the aggregate commitments of the lenders exceed utilization of the 2015 Senior Credit Facility ranging from 0.10% to 0.225% per annum (0.125% as of December 31, 2018). The applicable margins and the commitment fee are determined based on whichever of the Company's Consolidated Net Leverage Ratio or its senior unsecured debt rating (or if not available, corporate family rating) results in the lower applicable margins and commitment fee (with applicable margins and the commitment fee increasing as that ratio increases or those ratings decline, as applicable).

The obligations of the Company and its subsidiaries in respect of the 2015 Senior Credit Facility are unsecured.

The 2015 Senior Credit Facility includes certain affirmative and negative covenants that impose restrictions on the Company's financial and business operations, including limitations on liens, subsidiary indebtedness, fundamental changes, asset dispositions, dividends and other similar restricted payments, transactions with affiliates, future negative pledges, and changes in the nature of the Company's business. The Company is also required to maintain a Consolidated Interest Coverage Ratio of at least 3.0 to 1.0 and a Consolidated Net Leverage Ratio of no more than 3.75 to 1.0, each as of the last day of any fiscal quarter.

The limitations contain customary exceptions or, in certain cases, do not apply as long as the Company is in compliance with the financial ratio requirements and is not otherwise in default.

The 2015 Senior Credit Facility also contains customary representations and warranties and events of default, subject to customary grace periods.

In 2017, the Company paid financing costs of \$567 in connection with the extension of its 2015 Senior Credit Facility from March 26, 2021 to March 26, 2022. These costs were deferred and, along with unamortized costs of \$6,873 are being amortized over the term of the 2015 Senior Credit Facility.

As of December 31, 2018, amounts utilized under the 2015 Senior Credit Facility included \$57,896 of borrowings and \$54,591 of standby letters of credit related to various insurance contracts and foreign vendor commitments. The outstanding borrowings of \$1,339,843 under the Company's U.S. and European commercial paper programs as of December 31, 2018 reduce the availability of the 2015 Senior Credit Facility. Including commercial paper borrowings, the Company has utilized \$1,452,330 under the 2015 Senior Credit Facility resulting in a total of \$347,670 available as of December 31, 2018.

Commercial Paper

On February 28, 2014 and July 31, 2015, the Company established programs for the issuance of unsecured commercial paper in the United States and Eurozone capital markets, respectively. Commercial paper issued under the U.S. and European programs will have maturities ranging up to 397 and 183 days, respectively. None of the commercial paper notes may be voluntarily prepaid or redeemed by the Company and all rank pari passu with all of the Company's other unsecured and unsubordinated indebtedness. To the extent that the Company issues European commercial paper notes through a subsidiary of the Company, the notes will be fully and unconditionally guaranteed by the Company.

The Company uses its 2015 Senior Credit Facility as a liquidity backstop for its commercial paper programs. Accordingly, the total amount outstanding under all of the Company's commercial paper programs may not exceed \$1,800,000 (less any amounts drawn on the 2015 Senior Credit Facility) at any time.

The proceeds from the issuance of commercial paper notes will be available for general corporate purposes. As of December 31, 2018 there was \$632,668 outstanding under the U.S. commercial paper program, and the euro equivalent of \$707,175 under the European program. The weighted-average interest rate and maturity period for the U.S. program were 2.98% and 27.64 days, respectively. The weighted-average interest rate and maturity period for the European program were (0.21)% and 28.61 days, respectively.

Senior Notes

On May 18, 2018, Mohawk Capital Finance S.A. ("Mohawk Finance"), an indirect wholly-owned finance subsidiary of the Company, completed the issuance and sale of €300,000 aggregate principal amount of its Floating Rate Notes due May 18, 2020 ("2020 Floating Rate Notes"). The 2020 Floating Rate Notes

are senior unsecured obligations of Mohawk Finance and rank pari passu with all of Mohawk Finance's other existing and future senior unsecured indebtedness. The 2020 Floating Rate Notes are fully, unconditionally and irrevocably guaranteed by the Company on a senior unsecured basis. These notes bear interest at a rate per annum, reset quarterly, equal to three-month EURIBOR plus 0.3% (but in no event shall the interest rate be less than zero). Interest on the 2020 Floating Rate Notes is payable quarterly on August 18, November 18, February 18, and May 18 of each year. Mohawk Finance paid financing costs of \$890 in connection with the 2020 Floating Rate Notes. These costs were deferred and are being amortized over the term of the 2020 Floating Rate Notes.

On September 11, 2017, Mohawk Finance completed the issuance and sale of €300,000 aggregate principal amount of its Floating Rate Notes due September 11, 2019 ("2019 Floating Rate Notes"). The 2019 Floating Rate Notes are senior unsecured obligations of Mohawk Finance and rank pari passu with all of Mohawk Finance's other existing and future senior unsecured indebtedness. The 2019 Floating Rate Notes are fully, unconditionally and irrevocably guaranteed by the Company on a senior unsecured basis. These notes bear interest at a rate per annum, reset quarterly, equal to three-month EURIBOR plus 0.3% (but in no event shall the interest rate be less than zero). Interest on the 2019 Floating Rate Notes is payable quarterly on September 11, December 11, March 11, and June 11 of each year. Mohawk Finance paid financing costs of \$911 in connection with the 2019 Floating Rate Notes. These costs were deferred and are being amortized over the term of the Floating Rate Notes.

On June 9, 2015, the Company issued €500,000 aggregate principal amount of 2.00% Senior Notes ("2.00% Senior Notes") due January 14, 2022. The 2.00% Senior Notes are senior unsecured obligations of the Company and rank pari passu with all of the Company's existing and future unsecured indebtedness. Interest on the 2.00% Senior Notes is payable annually in cash on January 14 of each year, commencing on January 14, 2016. The Company paid financing costs of \$4,218 in connection with the 2.00% Senior Notes. These costs were deferred and are being amortized over the term of the 2.00% Senior Notes.

On January 31, 2013, the Company issued \$600,000 aggregate principal amount of 3.85% Senior Notes ("3.85% Senior Notes") due February 1, 2023. The 3.85% Senior Notes are senior unsecured obligations of the Company and rank pari passu with all

of the Company's existing and future unsecured indebtedness. Interest on the 3.85% Senior Notes is payable semi-annually in cash on February 1 and August 1 of each year. The Company paid financing costs of \$6,000 in connection with the 3.85% Senior Notes. These costs were deferred and are being amortized over the term of the 3.85% Senior Notes.

On January 17, 2006, the Company issued \$900,000 aggregate principal amount of 6.125% Senior Notes due January 15, 2016. During 2014, the Company purchased for cash approximately \$254,445 aggregate principal amount of its outstanding 6.125% senior notes due January 15, 2016. On January 15, 2016, the Company paid the remaining \$645,555 outstanding principal of its 6.125% Senior Notes (plus accrued but unpaid interest) utilizing cash on hand and borrowings under its U.S. commercial paper program.

As defined in the related agreements, the Company's senior notes contain covenants, representations and warranties and events of default, subject to exceptions, and restrictions on the Company's financial and business operations, including limitations on liens, restrictions on entering into sale and leaseback transactions, fundamental changes, and a provision allowing the holder of the notes to require repayment upon a change of control triggering event.

Accounts Receivable Securitization

On December 19, 2012, the Company entered into a three-year on-balance sheet trade accounts receivable securitization agreement (the "Securitization Facility"). On September 11, 2014, the Company made certain modifications to its Securitization Facility, which modifications, among other things, increased the aggregate borrowings available under the facility from \$300,000 to \$500,000 and decreased the interest margins on certain borrowings. Amounts borrowed under the Securitization Facility bore interest at LIBOR plus an applicable margin of 0.70% per annum and the borrower paid a commitment fee at a per annum rate of 0.30% on the unused amount of each lender's commitment. On December 10, 2015, the Company extended the termination date to December 19, 2016, and on December 13, 2016, the Company extended the termination date to December 19, 2017. The Company paid financing costs of \$250 in connection with the second extension. These costs were deferred and amortized over the term of the Securitization Facility. The Securitization Facility expired in accordance with its terms on December 19, 2017.

The fair values and carrying values of the Company's debt instruments are detailed as follows:

	December 31, 2018		December 31, 2017	
	Fair Value	Carrying Value	Fair Value	Carrying Value
3.85% senior notes, payable February 1, 2023; interest payable semiannually	\$ 599,904	600,000	622,752	600,000
Floating Rate Notes, payable May 18, 2020; interest payable quarterly	343,004	343,289	—	—
2.00% senior notes, payable January 14, 2022; interest payable annually	587,487	572,148	634,193	600,096
Floating Rate Notes, payable September 11, 2019, interest payable quarterly	343,560	343,289	360,807	360,058
U.S. commercial paper	632,668	632,668	228,500	228,500
European commercial paper	707,175	707,175	912,146	912,146
Five-year senior secured credit facility, due March 26, 2022	57,896	57,896	62,104	62,104
Capital leases and other	6,664	6,664	6,934	6,934
Unamortized debt issuance costs	(5,155)	(5,155)	(6,260)	(6,260)
Total debt	3,273,203	3,257,974	2,821,176	2,763,578
Less current portion of long term debt and commercial paper	1,742,373	1,742,373	1,203,683	1,203,683
Long-term debt, less current portion	\$1,530,830	1,515,601	1,617,493	1,559,895

The fair values of the Company's debt instruments were estimated using market observable inputs, including quoted prices in active markets, market indices and interest rate measurements. Within the hierarchy of fair value measurements, these are Level 2 fair values.

The aggregate maturities of total debt as of December 31, 2018 are as follows:

2019	\$1,742,373
2020	344,323
2021	617
2022	572,568
2023	600,420
Thereafter	2,828
	\$3,263,129

Note 10. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses are as follows:

December 31,	2018	2017
Outstanding checks in excess of cash	\$ 14,624	8,879
Accounts payable, trade	811,879	810,034
Accrued expenses	430,431	363,919
Product warranties	47,511	39,035
Accrued interest	21,908	22,363
Accrued compensation and benefits	197,513	207,442
Total accounts payable and accrued expenses	\$1,523,866	1,451,672

Note 11. Stock-Based Compensation

The Company recognizes compensation expense for all share-based payments granted for the years ended December 31, 2018, 2017 and 2016 based on the grant-date fair value estimated in accordance with the provisions of ASC 718-10. Compensation expense is recognized on a straight-line basis over the options' or other awards' estimated lives for fixed awards with ratable vesting provisions.

Under the Company's 2012 Incentive Plan ("2012 Plan"), the Company reserved up to a maximum of 3,200 shares of common stock for issuance upon the grant or exercise of stock options, restricted stock, restricted stock units ("RSUs") and other types of awards, to directors and key employees through December 31, 2022. Option awards are granted with an exercise price equal to the market price of the Company's common stock on the date of the grant and generally vest between three and five years with a 10-year contractual term. The grant date fair value of restricted stock and RSUs is equal to the market price of the Company's common stock on the date of the grant and generally vest between three and five years.

On May 19, 2017, the Company's stockholders approved the 2017 Long-Term Incentive Plan ("2017 Plan"), which allows the Company to reserve up to a maximum of 3,000 shares of common stock for issuance upon the grant or exercise of awards under the 2017 Plan. No additional awards may be granted under the 2012 Plan after May 19, 2017.

Stock Option Plans

Additional information relating to the Company's stock option plans follows:

	2018	2017	2016
Options outstanding at beginning of year	63	91	169
Options exercised	—	(28)	(78)
Options forfeited and expired	—	—	—
Options outstanding at end of year	63	63	91
Options exercisable at end of year	63	63	90
Option prices per share:			
Options exercised during the year	\$ —	57.34-66.14	28.37-93.65
Options forfeited and expired during the year	\$ —	—	—
Options outstanding at end of year	57.34-66.14	57.34-66.14	57.34-66.14
Options exercisable at end of year	57.34-66.14	57.34-66.14	57.34-66.14

During 2018, 2017 and 2016, a total of 1 share was awarded each year to certain non-employee directors in lieu of cash for their annual retainers.

A summary of the Company's options under its long-term incentive plans as of December 31, 2018, and changes during the year then ended is presented as follows:

	Shares	Weighted average exercise price	Weighted average remaining contractual term (years)	Aggregate intrinsic value
Options outstanding, December 31, 2017	63	\$ 62.86		
Granted	—	—		
Exercised	—	—		
Forfeited and expired	—	—		
Options outstanding, December 31, 2018	63	\$62.86	2.8	\$3,415
Vested and expected to vest as of December 31, 2018	63	\$62.86	2.8	\$3,415
Exercisable as of December 31, 2018	63	\$62.86	2.8	\$3,415

The Company has not granted options since the year ended December 31, 2012. The total intrinsic value of options exercised during the years ended December 31, 2018, 2017, and 2016 was \$0, \$5,005 and \$10,571, respectively. Total compensation expense recognized for the years ended December 31, 2018, 2017 and 2016 was \$0 (\$0, net of tax), \$6 (\$4, net of tax) and \$40 (\$24, net of tax), respectively, which was allocated to selling, general and administrative expenses. The remaining unamortized expense for non-vested compensation expense as of December 31, 2018 was \$0.

The following table summarizes information about the Company's stock options outstanding as of December 31, 2018:

Exercise price range	Outstanding			Exercisable	
	Number of shares	Average life	Average price	Number of shares	Average price
\$57.34-\$57.34	23	2.15	57.34	23	57.34
\$66.14-\$66.14	40	3.14	66.14	40	66.14
Total	63	2.77	\$62.86	63	\$62.86

Restricted Stock Plans

A summary of the Company's RSUs under the Company's long-term incentive plans as of December 31, 2018, and changes during the year then ended is presented as follows:

	Shares	Weighted average grant date fair value	Weighted average remaining contractual term (years)	Aggregate intrinsic value
Restricted Stock Units outstanding, December 31, 2017	555	\$147.28		
Granted	136	231.25		
Released	(235)	156.56		
Forfeited	(10)	211.16		
Restricted Stock Units outstanding, December 31, 2018	446	\$166.56	1.1	\$51,501
Expected to vest as of December 31, 2018	440		1.1	\$50,746

The Company recognized stock-based compensation costs related to the issuance of RSUs of \$31,382 (\$24,436, net of taxes), \$36,316 (\$22,037, net of taxes) and \$35,019 (\$21,250, net of taxes) for the years ended December 31, 2018, 2017 and 2016, respectively, which has been allocated to selling, general and administrative expenses. Pre-tax unrecognized compensation expense for unvested RSUs granted to employees, net of estimated forfeitures, was \$20,834 as of December 31, 2018, and will be recognized as expense over a weighted-average period of approximately 1.26 years.

Additional information relating to the Company's RSUs under the Company's long-term incentive plans are as follows:

	2018	2017	2016
Restricted Stock Units outstanding, January 1	555	695	750
Granted	136	154	187
Released	(235)	(284)	(226)
Forfeited	(10)	(10)	(16)
Restricted Stock Units outstanding, December 31	446	555	695
Expected to vest as of December 31	440	546	682

Note 12. Other Expense (Income)

Following is a summary of other expense (income):

	2018	2017	2016
Foreign currency losses	\$9,613	8,395	1,099
Release of indemnification asset	4,606	4,459	5,371
All other, net	(6,921)	(7,649)	(8,199)
Total other expense (income)	\$7,298	5,205	(1,729)

Note 13. Income Taxes

Following is a summary of earnings before income taxes for United States and foreign operations:

	2018	2017	2016
United States	\$ 387,564	754,562	627,567
Foreign	661,637	563,295	613,558
Earnings before income taxes	\$1,049,201	1,317,857	1,241,125

Income tax expense (benefit) for the years ended December 31, 2018, 2017 and 2016 consists of the following:

	2018	2017	2016
CURRENT INCOME TAXES:			
U.S. federal	\$ 22,700	327,697	247,917
State and local	14,521	17,811	31,939
Foreign	58,669	73,248	61,712
Total current	95,890	418,756	341,568
DEFERRED INCOME TAXES:			
U.S. federal	54,983	(17,419)	(16,167)
State and local	19,076	(3,046)	(22,115)
Foreign	14,397	(55,126)	4,273
Total deferred	88,456	(75,591)	(34,009)
Total	\$184,346	343,165	307,559

The geographic dispersion of earnings and losses contributes to the annual changes in the Company's effective tax rates. Approximately 37% of the Company's current year earnings before income taxes was generated in the United States at a combined federal and state effective tax rate that is higher than the Company's overall effective tax rate. The Company is also subject to taxation in other jurisdictions where it has operations, including Australia, Belgium, Brazil, Bulgaria, France, Ireland, Italy, Luxembourg, Malaysia, Mexico, the Netherlands, New Zealand, Poland, Russia, Spain, the U.K. and the Ukraine. The

effective tax rates that the Company accrues in these jurisdictions vary widely, but they are generally lower than the Company's overall effective tax rate. The Company's domestic effective tax rates for the years ended December 31, 2018, 2017 and 2016 were 28.7%, 43.1%, and 38.5%, respectively, and its non-U.S. effective tax rates for the years ended December 31, 2018, 2017 and 2016 were 11.0%, 3.2%, and 10.8%, respectively. The difference in rates applicable in foreign jurisdictions results from a number of factors, including lower statutory rates, historical loss carry-forwards, financing arrangements, and other factors. The Company's effective tax rate has been and will continue to be impacted by the geographical dispersion of the Company's earnings and losses. To the extent that domestic earnings increase while the foreign earnings remain flat or decrease, or increase at a lower rate, the Company's effective tax rate will increase.

Income tax expense (benefit) attributable to earnings before income taxes differs from the amounts computed by applying the U.S. statutory federal income tax rate to earnings before income taxes as follows:

	2018	2017	2016
Income taxes at statutory rate	\$220,332	461,250	434,394
State and local income taxes, net of federal income tax benefit	22,315	10,133	6,298
Foreign income taxes ^(a)	(39,915)	(113,520)	(111,217)
Change in valuation allowance	2,472	10,008	(21,106)
Manufacturing deduction	—	(11,911)	(15,186)
2017 revaluation of deferred tax assets and liabilities ^(b)	—	(150,546)	—
Transition Tax	28,201	105,165	—
Transition tax planning initiatives	(18,706)	14,825	3,881
Tax contingencies and audit settlements, net	(31,874)	23,097	2,496
Other, net	1,521	(5,336)	7,999
	\$184,346	343,165	307,559

(a) Foreign income taxes includes statutory rate differences, financing arrangements, withholding taxes, local income taxes, notional deductions, and other miscellaneous items. The significant decrease in foreign income taxes for 2018 is primarily due to the impact of the U.S. statutory rate reduction from 35% to 21% as a result of the Tax Cuts and Jobs Act ("TCJA") discussed below.

(b) 2017 revaluation of deferred tax assets and liabilities includes \$106,107 related to the TCJA and \$44,439 related to Belgium tax reform.

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities as of December 31, 2018 and 2017 are presented below:

	2018	2017
DEFERRED TAX ASSETS:		
Accounts receivable	\$ 8,312	18,481
Inventories	47,212	41,169
Employee benefits	37,335	42,191
Accrued expenses and other	71,621	52,635
Deductible state tax and interest benefit	2,904	2,087
Intangibles	16,134	22,119
Federal, foreign and state net operating losses and credits	575,625	530,978
Gross deferred tax assets	759,143	709,660
Valuation allowance	(347,786)	(362,963)
Net deferred tax assets	411,357	346,697
DEFERRED TAX LIABILITIES:		
Inventories	(18,332)	(14,423)
Plant and equipment	(477,734)	(397,668)
Intangibles	(181,436)	(170,817)
Other liabilities	(96,134)	(31,702)
Gross deferred tax liabilities	(773,636)	(614,610)
Net deferred tax liability	\$(362,279)	(267,913)

The Company evaluates its ability to realize the tax benefits associated with deferred tax assets by analyzing its forecasted taxable income using both historic and projected future operating results, the reversal of existing temporary differences, taxable income in prior carry-back years (if permitted) and the availability of tax planning strategies. The valuation allowance as of December 31, 2018, and 2017 is \$347,786 and \$362,963, respectively. The valuation allowance as of December 31, 2018 relates to the net deferred tax assets of certain of the Company's foreign subsidiaries as well as certain state net operating losses and tax credits. The total change in the 2018 valuation allowance was a decrease of \$15,177 which includes \$15,357 related to foreign currency translation. The total change in the 2017 valuation allowance was an increase of \$73,885, which includes \$36,792 related to foreign currency translation.

Management believes it is more likely than not that the Company will realize the benefits of its deferred tax assets, net of valuation allowances, based upon the expected reversal of deferred tax liabilities and the level of historic and forecasted taxable income over periods in which the deferred tax assets are deductible.

As of December 31, 2018, the Company has state net operating loss carry forwards and state tax credits with potential tax benefits of \$68,714, net of federal income tax benefit; these carry forwards expire over various periods based on taxing jurisdiction. A valuation allowance totaling \$37,870 has been recorded against these state deferred tax assets as of December 31, 2018. In addition, as of December 31, 2018, the Company has net operating loss carry forwards in various foreign jurisdictions with potential tax benefits of \$1,805,648. A valuation allowance totaling \$309,916 has been recorded against these deferred tax assets as of December 31, 2018.

The large increase in the foreign losses is predominantly from the Company's redemptions of Luxembourg hybrid instruments which resulted in a tax effected loss of \$1,298,737. The Company redeemed these hybrid instruments in response to changes in global tax regimes. The changes were triggered by the EU's Base Erosion and Profit Shifting "BEPS" and Anti-Tax Avoidance Directives "ATAD" I and II initiatives, recently adopted by various member states. The Company has recorded a ASC 740-10 liability for the full tax effected loss, as reflected in the *Tax Uncertainties* section below. This ASC 740-10-45 liability is recorded as a reduction to the related deferred tax asset in the financial statements as a result of management's determination that it is not more likely than not that the benefit will be realized.

Historically, the Company has not provided for U.S. federal and state income taxes on the undistributed accumulated earnings of its foreign subsidiaries because such earnings were deemed to be permanently reinvested. Due to the passage of the Tax Cuts and Jobs Act ("TCJA") on December 22, 2017, the Company was required to recognize U.S. federal and state taxes on the higher of its accumulated earnings as of November 2, 2017, or December 31, 2017. Accordingly, as of December 31, 2018, the Company recognized \$133,366 of income tax expense on its foreign earnings. As of December 31, 2018, the Company has recognized net income tax expense on earnings of approximately \$1,936,000 as discussed further below. Should these earnings be distributed in the form of dividends in the future, the Company might be subject to withholding taxes (possibly offset by U.S. foreign tax credits) in various foreign jurisdictions, but the Company would not expect incremental U.S. federal or state taxes to be accrued on these previously taxed earnings. Despite the new territorial tax regime created by the TCJA, the

Company continues to assert that earnings of its foreign subsidiaries are permanently reinvested.

The SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118"), which provides guidance on accounting for the income tax effects of the TCJA. SAB 118 provides a measurement period that should not extend beyond one year from the enactment date of the TCJA for companies to complete the accounting under ASC 740, *Income Taxes* ("ASC 740"). In accordance with SAB 118, a company must (1) reflect the income tax effects of those aspects of TCJA for which the accounting under ASC 740 is complete, (2) record a provisional estimate for those aspects of TCJA for which the accounting is incomplete but a reasonable estimate can be made, and/or (3) continue to apply ASC 740 on the basis of the provisions of tax laws in effect immediately before the enactment of the TCJA if no reasonable estimate can be made.

At December 31, 2017, the Company has recorded a net provisional tax expense of \$45,249 based on the initial impact of the TCJA and related transactions for the year ended December 31, 2017. This provisional expense primarily consisted of a tax expense of \$105,165 for the Deemed Repatriation Transition Tax and \$46,191 for related transactions, offset by a tax benefit of \$106,107 for the corporate tax rate reduction, and the associated revaluation of the Company's net deferred tax liability. In accordance with the SAB 118 measurement period, the Company has completed its accounting for the income tax effects of all elements of the TCJA and reduced the net provisional tax expense to \$25,564.

The Deemed Repatriation Transition Tax ("Transition Tax") is a tax on previously untaxed earnings of certain foreign subsidiaries. To determine the amount of the Transition Tax, the Company must determine, in addition to other factors, the amount of post-1986 earnings of the relevant foreign subsidiaries, as well as the amount of non-U.S. income and withholding taxes paid on such earnings. The Company has finalized its determination of the Transition Tax obligation and will elect to pay the transition tax liability of \$132,236 over the 8-year deferral period, with 8% due in each of the first five years, 15% in the sixth year, 20% in the seventh year, and 25% in the eighth year. This total liability, except for the first installment, is recorded in other long-term liabilities within the consolidated balance sheet. In addition, the Company will pay \$1,130 of state tax resulting from the transition tax with its 2018 state tax returns.

Due to the fiscal year end of the company's foreign subsidiaries, the new Global Intangible Low-Taxed Income ("GILTI") rules, are only applicable for one-twelfth of the Company's earnings for the calendar year ending December 31, 2018. The Company's accounting for the effects of GILTI have been completed and an accrual for the current year has been included in current tax expense. In accordance with U.S. GAAP guidance, the Company will elect to treat tax due on future U.S. inclusions in taxable income related to GILTI as a current-period expense when incurred (the "period cost method").

Tax Uncertainties

In the normal course of business, the Company's tax returns are subject to examination by various taxing authorities. Such examinations may result in future tax and interest assessments by these taxing jurisdictions. Accordingly, the Company

accrues liabilities when it believes that it is not more likely than not that it will realize the benefits of tax positions that it has taken in its tax returns or for the amount of any tax benefit that exceeds the cumulative probability threshold in accordance with ASC 740-10. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interest and penalties related to unrecognized tax benefits in income tax expense (benefit). Differences between the estimated and actual amounts determined upon ultimate resolution, individually or in the aggregate, are not expected to have a material adverse effect on the Company's consolidated financial position but could possibly be material to the Company's consolidated results of operations or cash flow in any given quarter or annual period.

As of December 31, 2018, the Company's gross amount of unrecognized tax benefits is \$1,330,713, excluding interest and penalties. If the Company were to prevail on all uncertain tax positions, \$23,477 of the unrecognized tax benefits would affect the Company's effective tax rate, exclusive of any benefits related to interest and penalties.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2018	2017
Balance as of January 1	\$ 65,631	46,434
Additions based on tax positions related to the current year ^(a)	1,304,447	28,663
Additions for tax positions of acquired companies	1,413	1,776
Additions for tax positions of prior years	5,098	876
Transition tax planning initiatives	(27,470)	—
Reductions resulting from the lapse of the statute of limitations	(8,110)	(14,502)
Settlements with taxing authorities	(9,773)	(655)
Effects of foreign currency translation	(523)	3,039
Balance as of December 31	\$1,330,713	65,631

(a) Includes tax effected loss of \$1,298,737 on Luxembourg hybrid instruments redemptions. This \$1,298,737 of unrecognized benefit is presented as a reduction to the related deferred tax asset in the balance sheet.

The Company will continue to recognize interest and penalties related to unrecognized tax benefits as a component of its income tax provision. As of December 31, 2018 and 2017, the Company has \$7,184 and \$8,252, respectively, accrued for the payment of interest and penalties, excluding the federal tax benefit of interest deductions where applicable. During the years ended December 31, 2018, 2017 and 2016, the Company accrued interest and penalties through the consolidated statements of operations of \$(1,085), \$165 and \$2,170, respectively.

The Company believes that its unrecognized tax benefits could decrease by \$9,166 within the next twelve months. The Company is currently under examination by the Internal Revenue Service for tax years 2014 and 2015 but has effectively settled all Federal income tax matters related to years prior to 2014. Various other state and foreign income tax returns are open to examination for various years.

Belgian Tax Matter

Between 2012 and 2014, the Company received assessments from the Belgian tax authority for the calendar years 2005 through 2010 in the amount of €46,135, €38,817, €39,635, €30,131, €35,567 and €43,117 respectively, including penalties, but excluding interest. The Belgian tax authority denied the Company's formal protests against these assessments and the Company brought all six years before the Court of First Appeal in Bruges. The Court of First Appeal in Bruges, ruled in favor of the Company on January 27, 2016, with respect to the calendar years ending December 31, 2005 and December 31, 2009; and on June 13, 2018, the Court of First Appeal in Bruges, ruled in favor of the Company with respect to the calendar years ending December 31, 2006, December 31, 2007, December 31, 2008 and December 31, 2010. The Belgian tax authority has lodged its Notification of Appeal for all six years with the Ghent Court of Appeal. In December 2018, the Belgian tax authority issued an assessment for the year ended December 31, 2011, in the amount of €37,991 including penalties, but excluding interest. In January of 2019, the Company received a "Notice of Change" from the Belgian tax authority for tax years 2012 through 2017 in the amount of €38,858, €11,108, €23,522, €30,610, €92,109 and €78,174 respectively, including penalties, but excluding interest. The Company intends to respond to these notices in a timely manner and will file formal protests should the tax authority issue assessments for these years. The Notices of Change are based on largely the same facts underlying the positive rulings, which the Belgian tax authority is appealing.

The Company continues to disagree with the views of the Belgian tax authority on this matter and will persist in its vigorous defense. Nevertheless, on May 24, 2016, the tax collector representing the Belgian tax authorities imposed a lien on the Company's properties in Wielsbeke (Ooigemstraat and Breestraat), Oostrozebeke (Ingelmunstersteenweg) and Desselgem (Waregemstraat) included in the Flooring ROW segment. The purpose of the lien is to provide security for payment should the Belgian tax authority prevail on its appeal. The lien does not interfere with the Company's operations at these properties.

Note 14. Commitments and Contingencies

The Company is obligated under various operating leases for office and manufacturing space, machinery, and equipment. Future minimum lease payments under non-cancelable capital and operating leases (with initial or remaining lease terms in excess of one year) as of December 31 are as follows:

	Capital	Operating	Total Future Payments
2019	\$1,494	116,110	117,604
2020	1,195	93,724	94,919
2021	766	66,129	66,895
2022	562	42,247	42,809
2023	555	22,207	22,762
Thereafter	3,215	26,097	29,312
Total payments	7,787	366,514	374,301
Less amount representing interest	1,123		
Present value of capitalized lease payments	\$6,664		

Rental expense under operating leases was \$143,513, \$145,176 and \$125,103 in 2018, 2017 and 2016, respectively.

The Company had approximately \$54,591 and \$56,267 in standby letters of credit for various insurance contracts and commitments to foreign vendors as of December 31, 2018 and 2017, respectively that expire within two years.

The Company is involved in litigation from time to time in the regular course of its business. Except as noted below and in Note 13—Income Taxes *Belgian Tax Matter*, there are no material legal proceedings pending or known by the Company to be contemplated to which the Company is a party or to which any of its property is subject.

Alabama Municipal Litigation

In September 2016, the Water Works and Sewer Board of the City of Gadsden, Alabama (the "Gadsden Water Board") filed an individual complaint in the Circuit Court of Etowah County, Alabama against certain manufacturers, suppliers, and users of chemicals containing specific perfluorinated compounds, including the Company. On October 26, 2016, the defendants removed the case to the United States District Court for the Northern District of Alabama, Middle Division, alleging diversity of citizenship and fraudulent joinder. The Gadsden Water Board filed a motion to remand the case back to the state court, and the defendants opposed the Gadsden Water Board's motion. The federal court granted Gadsden Water Board's motion for remand.

In May, 2017, the Water Works and Sewer Board of the Town of Centre, Alabama (the "Centre Water Board") filed a very similar complaint to the Gadsden Water Board complaint in the Circuit Court of Cherokee County. On June 19, 2017, the defendants removed this case to the United States District Court for the

Northern District of Alabama, Middle Division, again alleging diversity of citizenship and fraudulent joinder. The Centre Water Board filed a motion to remand the case back to state court, and the defendants opposed the Centre Water Board's motion. The federal court granted Centre Water Board's motion for remand.

Certain defendants, including the Company, filed dispositive motions in each case arguing that the state court lacks personal jurisdiction over them. Both state courts denied those motions. In June and September 2018, certain defendants, including the Company, petitioned the Alabama Supreme Court for Writs of Mandamus directing each lower court to enter an order granting the defendants' dispositive motions on personal jurisdiction grounds. Those petitions have been fully briefed and the Company awaits a decision from the Alabama Supreme Court.

The Company has never manufactured the perfluorinated compounds at issue but purchased them for use in the manufacture of its carpets prior to 2007. The Gadsden and Centre Water Boards are not alleging that chemical levels in the Company's wastewater discharge exceeded legal limits. Instead, the Gadsden and Centre Water Boards are seeking lost profits based on allegations that their customers decreased water purchases, as well as reimbursement for the cost of a filter and punitive damages.

General

The Company believes that adequate provisions for resolution of all contingencies, claims and pending litigation have been made for probable losses that are reasonably estimable. These contingencies are subject to significant uncertainties and we are unable to estimate the amount or range of loss, if any, in excess of amounts accrued. The Company does not believe that the ultimate outcome of these actions will have a material adverse effect on its financial condition but could have a material adverse effect on its results of operations, cash flows or liquidity in a given quarter or year.

The Company is subject to various federal, state, local and foreign environmental health and safety laws and regulations, including those governing air emissions, wastewater discharges, the use, storage, treatment, recycling and disposal of solid and hazardous materials and finished product, and the cleanup of contamination associated therewith. Because of the nature of the Company's business, the Company has incurred, and will continue to incur, costs relating to compliance with such laws and regulations. The Company is involved in various proceedings relating to environmental matters and is currently engaged in environmental investigation, remediation and post-closure care programs at certain sites. The Company has provided accruals for such activities that it has determined to be both probable and reasonably estimable. The Company does not expect that the ultimate liability with respect to such activities will have a material adverse effect on its financial condition but could have a material adverse effect on its results of operations, cash flows or liquidity in a given quarter or year.

Note 15. Consolidated Statements of Cash Flows Information

Supplemental disclosures of cash flow information are as follows:

	2018	2017	2016
NET CASH PAID (RECEIVED) DURING THE YEARS FOR:			
Interest	\$ 46,186	33,952	57,269

Additions to property, plant and equipment	\$ (4,672)	30,643	—
Fair value of net assets acquired in acquisition	\$ 831,760	369,956	—
Liabilities assumed in acquisition	(257,515)	(119,157)	—
	\$ 574,245	250,799	—

Note 16. Segment Reporting

The Company has three reporting segments: the Global Ceramic segment, the Flooring NA segment and the Flooring ROW segment. The Global Ceramic segment designs, manufactures, sources and markets a broad line of ceramic tile, porcelain tile, natural stone, quartz, porcelain slab countertops and other products, which it distributes primarily in North America, Europe, South America and Russia through its network of regional distribution centers and Company-operated service centers using company-operated trucks, common carriers or rail transportation. The segment's product lines are sold through Company-operated service centers, independent distributors, home center retailers, tile and flooring retailers and contractors. The Flooring NA segment designs, manufactures, sources and markets its floor covering product lines, including carpets, rugs, carpet pad, hardwood, laminate and vinyl products, including luxury vinyl tile ("LVT"), which it distributes through its network of regional distribution centers and satellite warehouses using company-operated trucks, common carrier or rail transportation. The segment's product lines are sold through various selling channels, including independent floor covering retailers, distributors, home centers, mass merchandisers, department stores, shop at home, buying groups, commercial contractors and commercial end users. The Flooring ROW segment designs, manufactures, sources, licenses and markets laminate, hardwood flooring, roofing elements, insulation boards, medium-density fiberboard ("MDF"), chipboards, other wood products, sheet vinyl and LVT, which it distributes primarily in Europe, Australia, New Zealand and Russia through various selling channels, which include retailers, independent distributors and home centers.

The accounting policies for each operating segment are consistent with the Company's policies for the consolidated financial statements. Amounts disclosed for each segment are prior to any elimination or consolidation entries. Corporate general and administrative expenses attributable to each segment are estimated and allocated accordingly. Segment performance is evaluated based on operating income. No single customer accounted for more than 10% of net sales for the years ended December 31, 2018, 2017 or 2016.

Segment information is as follows:

Note 18. Subsequent Event

On January 31, 2019, the Company completed an acquisition of a hard surface flooring distribution company based in the Netherlands for approximately €60.6 million.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Based on an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended), which have been designed to provide reasonable assurance that such controls and procedures will meet their objectives, as of the end of the period covered by this report, the Company's Chief Executive Officer and Chief Financial Officer have concluded that such controls and procedures were effective at a reasonable assurance level for the period covered by this report.

Management's Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). The Company maintains internal control over financial reporting designed to provide

reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Therefore, internal control over financial reporting determined to be effective provides only reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

The Company acquired Godfrey Hirst Group during 2018, and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2018, Godfrey Hirst Group's internal control over financial reporting associated with total assets of \$199.6 million and total net sales of \$146.9 million included in the consolidated financial statements of the Company as of and for the year ended December 31, 2018.

The Company acquired Eliane S/A Revestimentos Ceramicos ("Eliane") during 2018, and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2018, Eliane's internal control over financial reporting associated with total assets of \$186.5 million and total net sales of \$35.1 million included in the consolidated financial statements of the Company as of and for the year ended December 31, 2018.

Under the supervision and with the participation of management, including the Company's Principal Executive Officer and Principal Financial Officer, the Company conducted an evaluation of the effectiveness of the design and operation of the Company's internal control over financial reporting as of December 31, 2018. In conducting this evaluation, the Company used the

framework set forth in the report titled "Internal Control-Integrated Framework (2013)" published by the Committee of Sponsoring Organizations of the Treadway Commission. Based on the results of this evaluation, management has concluded that the Company's internal control over financial reporting was effective as of December 31, 2018.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2018 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their audit report which is included herein.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Limitations on the Effectiveness of Controls

The Company's management recognizes that a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this item is incorporated by reference to information contained in the Company's Proxy Statement for the 2019 Annual Meeting of Stockholders under the following headings: "Election of Directors—Director, Director Nominee and Executive Officer Information," "—Nominees for Director," "—Continuing Directors," "—Contractual Obligations with respect to the Election of Directors", "—Executive Officers," "—Meetings and Committees of the Board of Directors," "Section 16(a) Beneficial Ownership Reporting Compliance," "Audit Committee" and "Corporate Governance." The Company has adopted the Mohawk Industries, Inc. Standards of Conduct and Ethics, which applies to all of its directors, officers and employees. The standards of conduct and ethics are publicly available on the Company's website at <http://www.mohawkind.com>

and will be made available in print to any stockholder who requests them without charge. If the Company makes any substantive amendments to the standards of conduct and ethics, or grants any waiver, including any implicit waiver, from a provision of the standards required by regulations of the Commission to apply to the Company's chief executive officer, chief financial officer or chief accounting officer, the Company will disclose the nature of the amendment or waiver on its website. The Company may elect to also disclose the amendment or waiver in a report on Form 8-K filed with the SEC. The Company has adopted the Mohawk Industries, Inc. Board of Directors Corporate Governance Guidelines, which are publicly available on the Company's website and will be made available to any stockholder who requests it.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is incorporated by reference to information contained in the Company's Proxy Statement for the 2019 Annual Meeting of Stockholders under the following headings: "Compensation Discussion and Analysis," "Executive Compensation—Summary Compensation Table," "—Grants of Plan Based Awards," "—Outstanding Equity Awards at Year End," "—Option Exercises and Stock Vested," "—Nonqualified Deferred Compensation," "—Certain Relationships and Related Transactions," "—Compensation Committee Interlocks and Insider Participation," "—Compensation Committee Report" and "Director Compensation."

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item is incorporated by reference to information contained in the Company's Proxy Statement for the 2019 Annual Meeting of Stockholders under the following headings: "Executive Compensation—Equity Compensation Plan Information," and "—Principal Stockholders of the Company."

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item is incorporated by reference to information contained in the Company's Proxy Statement for the 2019 Annual Meeting of Stockholders under the following heading: "Election of Directors—Meetings and Committees of the Board of Directors," and "Executive Compensation—Certain Relationships and Related Transactions."

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this item is incorporated by reference to information contained in the Company's Proxy Statement for the 2019 Annual Meeting of Stockholders under the following heading: "Audit Committee—Principal Accountant Fees and Services" and "Election of Directors—Meetings and Committees of the Board of Directors."

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) 1. Consolidated Financial Statements

The Consolidated Financial Statements of Mohawk Industries, Inc. and subsidiaries listed in Item 8 of Part II are incorporated by reference into this item.

2. Consolidated Financial Statement Schedules

Schedules not listed above have been omitted because they are not applicable or the required information is included in the consolidated financial statements or notes thereto.

3. Exhibits

The exhibit number for the exhibit as originally filed is included in parentheses at the end of the description.

Mohawk Exhibit Number	Description	Mohawk Exhibit Number	Description
*2.1	Agreement and Plan of Merger dated as of December 3, 1993 and amended as of January 17, 1994 among Mohawk, AMI Acquisition Corp., Aladdin and certain Shareholders of Aladdin. (Incorporated herein by reference to Exhibit 2.1(a) in the Company's Registration Statement on Form S-4, Registration No. 333-74220.)	*4.5	First Supplemental Indenture, dated as of September 11, 2017, by and among Mohawk Capital Finance S.A., as issuer, Mohawk Industries, Inc., as parent guarantor, U.S. Bank National Association, as trustee, initial registrar and transfer agent and Elavon Financial Services DAC, UK Branch, as initial paying agent and calculation agent. (Incorporated herein by reference to Exhibit 4.2 to the Company's Current Report on Form 8-K dated September 11, 2017.)

The Company supplements its condensed consolidated financial statements, which are prepared and presented in accordance with US GAAP, with certain non-GAAP financial measures. As required by the Securities and Exchange Commission rules, the tables above present a reconciliation of the Company's non-GAAP financial measures to the most directly comparable US GAAP measure. Each of the non-GAAP measures set forth above should be considered in addition to the comparable US GAAP measure, and may not be comparable to similarly titled measures reported by other companies. The Company believes these non-GAAP measures, when reconciled to the corresponding US GAAP measure, help its investors as follows: Non-GAAP revenue measures that assist in identifying growth trends and in comparisons of revenue with prior and future periods and non-GAAP profitability measures that assist in understanding the long-term profitability trends of the Company's business and in comparisons of its profits with prior and future periods.

The Company excludes certain items from its non-GAAP revenue measures because these items can vary dramatically between periods and can obscure underlying business trends. Items excluded from the Company's non-GAAP revenue measures include: foreign currency transactions and translation and the impact of acquisitions.

The Company excludes certain items from its non-GAAP profitability measures because these items may not be indicative of, or are unrelated to, the Company's core operating performance. Items excluded from the Company's non-GAAP profitability measures include: restructuring, acquisition and integration-related and other costs, acquisition purchase accounting, including inventory step-up, release of indemnification assets and the reversal of uncertain tax positions.

RECONCILIATION OF OPERATING INCOME TO ADJUSTED OPERATING INCOME AND ADJUSTED EBITDA

For the Years Ended December 31,	2013	2014	2015	2016	2017	2018
Operating Income	\$546,931	772,796	837,566	1,279,943	1,354,173	1,095,326

ANNUAL MEETING OF STOCKHOLDERS

The Annual Meeting of Stockholders of Mohawk Industries, Inc. will be held at the time and location specified in our Notice of Annual Meeting of Stockholders for 2019.

COMPANY STOCK

Mohawk's common stock is traded on the New York Stock Exchange under the symbol MHK.

EQUAL OPPORTUNITY

Mohawk is an Equal Opportunity/Affirmative Action employer committed to attracting a diverse pool of applicants and sustaining an inclusive workforce.

NYSE AFFIRMATION CERTIFICATIONS

As a listed company with the New York Stock Exchange ("NYSE"), Mohawk is subject to certain Corporate Governance standards as required by the NYSE and/or the Securities and Exchange Commission ("SEC"). Among other requirements, Mohawk's CEO, as required by Section 303A.12(a) of the NYSE Listing Company Manual, must certify to the NYSE each year whether or not he is aware of any violations by the Company of NYSE Corporate Governance listing standards as of the date of the certification. On June 19, 2018, Mohawk's CEO Jeffrey S. Lorberbaum submitted such a certification to the NYSE which stated that he was not aware of any violation by Mohawk of the NYSE Corporate Governance listing standards.

The Company has filed the certifications of its Chief Executive Officer and Chief Financial Officer required by Section 302 of Sarbanes-Oxley Act of 2002 as an exhibit to the Company's Form 10-K for the year ended December 31, 2018.

STOCK PERFORMANCE GRAPH

The following is a line graph comparing the yearly change in the Company's cumulative total stockholder returns to those of the Standard & Poor's 500 Index and a group of peer issuers beginning on December 31, 2012 and ending on December 31, 2018.

The peer group includes the following companies: Armstrong Flooring, Inc.; Dixie Group, Inc.; Interface, Inc.; Leggett & Platt, Inc.; MASCO Corporation and Stanley Black & Decker. Total return values were calculated based on cumulative total return, assuming the value of the investment in the Company's Common Stock and in each index on December 31, 2012 was \$100 and that all dividends were reinvested. The Company is not included in the peer group because management believes that, by excluding the Company, investors will have a more accurate view of the Company's performance relative to peer companies.
